Travel and Exploration

The history of travel writing dates back to the Bible, Caesar, the Vikings and the Crusaders, and its many themes include war, trade, science and recreation. Explorers from Columbus to Cook charted lands not previously visited by Western travellers, and were followed by merchants, missionaries, and colonists, who wrote accounts of their experiences. The development of steam power in the nineteenth century provided opportunities for increasing numbers of ‘ordinary’ people to travel further, more economically, and more safely, and resulted in great enthusiasm for travel writing among the reading public. Works included in this series range from first-hand descriptions of previously unrecorded places, to literary accounts of the strange habits of foreigners, to examples of the burgeoning numbers of guidebooks produced to satisfy the needs of a new kind of traveller - the tourist.

The Voyage of the Jeannette

George W. De Long (1844–81) was a US Navy officer who set out to find a new route to the North Pole via the Bering Strait. During his voyage, which left San Francisco in 1879, he claimed the De Long Islands for the USA. But when his vessel, the Jeannette, sank, he and his crew abandoned ship, and he eventually died of starvation in Siberia. His doomed expedition is documented in these two volumes, compiled by his wife Emma from his journals and the testimony of the mission’s survivors. First published in 1883, Volume 1 begins by sketching De Long’s early years and his preparations for the expedition. The remaining chapters record the crew’s experiences in the treacherous Arctic, and their brave but vain attempts to save the Jeannette. Providing a vivid account of nineteenth-century polar exploration, it remains of great interest to scholars of geography and maritime studies.
Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
The Voyage of the Jeannette

The Ship and Ice Journals of George W. De Long
Lieutenant-Commander U.S.N. and Commander of the Polar Expedition of 1879–1881

Volume 1

Edited by Emma De Long
THE

VOYAGE OF THE JEANNETTE.

THE SHIP AND ICE JOURNALS

OF

GEORGE W. DE LONG,

LIEUTENANT–COMMANDER U. S. N., AND COMMANDER

EDITED BY HIS WIFE,

EMMA DE LONG,

WITH A STEEL PORTRAIT, MAPS, AND MANY

ILLUSTRATIONS ON WOOD AND STONE.

IN TWO VOLUMES.

VOL. I.

LONDON

KEGAN PAUL, TRENCH AND COMPANY

1 PATERNOSTER SQUARE

1883

All rights reserved.
PREFACE.

In the preparation of this volume the editor has availed herself first, of the private papers of Captain De Long, and her own recollection and notes; and secondly, of the testimony given in public and private by the survivors of the Jeannette. It seemed right, in a work which is essentially a tribute to human worth, to introduce the narrative with a brief biographical sketch of the commander of the expedition up to the inception of the undertaking, with special reference to the qualities of character and education of circumstances which led directly to his proposal of an Arctic expedition. The preparations for the voyage continue this personal sketch, as well as put the reader in possession of all necessary facts relating to the plans of the projectors and the measures taken to ensure success.

So much was requisite as an introduction to the narrative itself. For that recourse was had to the letters written by Captain De Long after leaving San Francisco, and before dismissing the consort which accompanied the Jeannette to St. Lawrence Bay; to the private journal which he kept from the beginning of the voyage to the sinking of the ship, and to the two small journals in which he recorded the fortunes of the expedition after the ship was abandoned.
PREFACE.

In preparing the closing chapters of the work, the testimonies given by the survivors have been carefully compared and made the basis for a consecutive narrative which should complete the history of the expedition.

The illustrations have been studied with great care. The smaller ones in the text have been reproduced from diagrams and sketches made in the journals, by Mr. Newcomb, the naturalist of the party, and by Captain Grünbeck of the Lena; the larger ones have been from the hand of Mr. M. J. Burns, whose experience in the Arctic had given him special facility for making truthful renderings, and his work has been carefully examined and approved by officers of the expedition. The portraits have been taken from the best sources. That of Captain De Long is from a painting by Mr. E. W. Perry; that of Mr. Bennett was engraved for this work; and those of the officers and other members of the expedition are from the best photographs obtainable. The frontispiece of the second volume is from a drawing made on the spot by Mr. A. Larsen. The maps were drawn for the work, with the exception of that descriptive of the route of the Little Juniata, which is a reduction of the government map in the "Voyage of the Polaris."

The scientific results of the expedition are only partially recorded in the text of the work and in papers included in the Appendix. The government will hereafter issue the notes of the naturalist, the meteorological observations, and the electrical and auroral
PREFACE.

observations of Lieutenant Chipp, and it has been thought advisable, therefore, to omit them from this work.

The thanks of the editor are due to Mr. James Gordon Bennett for his constant sympathy, interest, and aid; to Chief-Engineer Melville for his frequent assistance and special contributions; to the other survivors of the Jeannette for their cheerful and ready response to all requests for information; to Colonel W. B. Remy, Judge Advocate General U. S. N., and Lieutenant W. H. Jaques, U. S. N. Finally, the editor desires to acknowledge gratefully the consideration and kindness which her work has met with from the Secretary of the Navy and other members of the Department at Washington.
