CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

British and Irish History, Seventeenth and Eighteenth Centuries

The books in this series focus on the British Isles in the early modern period, as interpreted by eighteenth- and nineteenth-century historians, and show the shift to 'scientific' historiography. Several of them are devoted exclusively to the history of Ireland, while others cover topics including economic history, foreign and colonial policy, agriculture and the industrial revolution. There are also works in political thought and social theory, which address subjects such as human rights, the role of women, and criminal justice.

Archbishop Herring's Visitation Returns, 1743

In 1743, the appointment of a new archbishop of York, Thomas Herring (1693–1757), led to the creation of one of the most useful historical records of parish life in eighteenth-century England. This five-volume edition of visitation returns was first published between 1928 and 1931. It contains the responses made by hundreds of clergymen to the archbishop's enquiries as to the social and religious character of their parishes. Incorporating records detailing clerical matters and covering subjects ranging from the number of families in residence to the popularity of Methodism and the provision of schools, these volumes comprise, in the words of the editors, 'a collection of facts which are valuable for the economic and social, as well as the ecclesiastical history of England'. Volume 5 contains biographical notes, an index of place names and an index of persons.

More information

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library and other partner libraries, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection brings back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
