

**THE GLOBAL REGIME FOR THE ENFORCEMENT
OF INTELLECTUAL PROPERTY RIGHTS**

In *The Global Regime for the Enforcement of Intellectual Property Rights*, Xavier Seuba offers a comprehensive description of the international norms and bodies dealing with the enforcement of intellectual property rights. The book analyses multilateral, plurilateral and bilateral treaties, and their national implementation, along with civil, border and criminal enforcement. The book also explores the interface between the enforcement of intellectual property rights and the norms regulating international trade, competition and human rights, as well as the conceptual and systemic aspects of enforcement, while illustrating the importance of these rights with examples in litigation. The book should be read by anyone interested in how intellectual property rights are being enforced around the world and how these efforts relate to other legal regimes.

Xavier Seuba, Ph.D., is Senior Lecturer at the Center for International Intellectual Property Studies (CEIPI) of the University of Strasbourg. At CEIPI he is Academic Coordinator and Judicial Training Manager and co-directs the CEIPI-BETA Project in the Law and Economics of Intellectual Property. He teaches courses in various European and American universities in international intellectual property law, international health law and international economic law. His research is focused on intellectual property enforcement, intellectual property and health and the economics of intellectual property. Seuba has advised national governments and has also been a consultant for several international organizations.

Acknowledgements

This book has greatly benefited from exchanges with many people. In some cases, the conversations maintained have been decisive when drafting chapters or developing ideas. This has been the case of exchanges with Frederick Abbott, Carlos Correa, Christophe Geiger, Mariano Genovesi, Henning Grosse Ruse-Khan, Elena Izyumenko, Roger Kampft, José Massaguer, Juan Camilo Pérez, Antoni Puig-Rubí, Santiago Ripol, Pedro Roffe, Miguel Vidal-Quadras, Horst Vissel, Raquel Xalabarder and Peter Yu. Thomas Colon and Anja Halle have reviewed the book for linguistic consistency. Rebecca Jackaman and Jeevitha Baskaran have taken care of the final editing of the book.

Elena Dan has carefully peer-reviewed the entire book. Her comments have greatly improved the quality of the text and footnotes and have also influenced the substantive content of several chapters. This is, in particular, the case of the two chapters on criminal enforcement and Chapter 8, which she co-authors. While she deserves big credit for her contribution, all possible errors are mine.

This book has been possible thanks to the research environment of the Center for International Intellectual Property Studies (CEIPI) and the Internet Interdisciplinary Institute (IN³), which hosted me while conducting the research.
