

## Index

---

- algebra of symmetric tensors, 145
- annihilation and creation
  - Fock space fields, 163
  - single Boson mode, 59
  - single Fermion mode, 57
- Araki–Woods representation, 183
- bag, 17
- Baker–Campbell–Hausdorff formula, 61
- Bargmann vectors, 63
- Bargmann–Fock representation, 189
- basis systems
  - Bose, 150
  - Fermi, 154
- Belavkin–Holevo matrices, 284
- Belavkin–Holevo representation, 282
- Bell numbers, 16
- Bell polynomials, 23
- blocks, 20
- Bogoliubov transformation, 68
- Boson Fock Space, 86
- canonical anticommutation relations, 57, 164, 166
- canonical commutation relations, 59, 164, 166
  - equal time, 172, 235, 248
- canonical ensemble, 6
- canonical momentum field operator, 234, 247
- canonical partition function, 8
- Charlier polynomials, 35
- co-gradient operator, 259
- coherent state, 66, 173
- combinatorial species, 89
- composition formula, 78
- conjugation, 139
- connected (truncated) Green’s functions, 242
- convolution
  - stochastic Wick, 195
  - Poisson–Wick, 195
  - Wiener–Wick, 195
- cumulants, 38
  - Green’s functions, 79
- decapitated functions, 280
- derivation (algebraic), 161
- diagonal-free
  - exponential, 48
  - integral, 45
- differential second quantization  $d\Gamma(H)$ , 160
- distribution
  - Gamma, 40
  - Gaussian, 39
  - Poisson, 39
- Dyson series, 294
- Dyson–Schwinger Equation, 109, 110
- empirical measures, 131
- ensemble
  - canonical, 6
  - grand canonical, 8
  - microcanonical, 4
- entropy
  - Boltzmann, 4
  - Boltzmann H-function, 11
  - differential, 124
  - relative, 124, 126
  - Shannon, 123
  - statistical ensembles, 11
  - surprise, 122

- ergodicity, 4
- Evans–Hudson symbol, 266
- exponential vector, 172
- Faà di Bruno Formula, 24
- factorial powers
  - falling, 14
  - rising, 14
- Feynman propagator, 221
- field operator
  - local, 212, 215
  - Segal, 166, 214, 234
- Field–Source relations, 118
- Fock scales, 150
- Fock space, 143
  - of antisymmetric tensors, 151
  - of symmetric tensors, 144
- free scalar field, 199
- fundamental quantum stochastic processes, 267
- Gell-Mann and Low series, 243, 244
- generalized vectors, 169, 170, 208
- Gibb’s inequality, 126
- gradient operator, 259
- grand canonical ensemble, 8
- grand canonical partition function, 8
- graph, 94
- Grassmann algebra, 153
- Green’s functions, 74
  - cumulants, 79
  - nonsymmetric, 85
- Group
  - Heisenberg, 61
- Guichardet notation, 76
- Heisenberg Group, 61, 282
- Hermite polynomials, 32
- hierarchies, 26
- Holevo time-ordered exponential, 280
- incidence kernel, 28
- Itô–Fock isomorphism, 193
- Källén–Lehmann representation, 239
- Klein–Gordon equation, 201
- Kullbeck–Leiber divergence, 126
- Large Deviation Property, 129
- Law of Large Numbers, 126
- Legendre transforms, 115
- Lemma
  - $\mathfrak{L}$ , 78
  - $\sum \prod \leftrightarrow \prod \sum$ , 9
  - Accardi–Frigerio–Lu, 297
  - Baker–Campbell–Hausdorff, 61
  - Chain Rule for Field Calculus, 83
  - Hudson–Parthasarathy, 273
  - linked cluster expansion, 108, 244
  - linked Feynman diagram, 107
  - local field operator, 247
  - Lorentz group, 199
  - LSZ condition, 239
  - Maassen kernels, 252
  - macrostate, 4
  - martingale, 43
  - microcanonical ensemble, 4
  - microstate, 4
  - Minkowski spacetime, 199
  - moment generating function, 38
  - moments
    - cumulant, 38
    - factorial, 41
    - random variable, 37
  - multiset, 17
  - neutral scalar field, 237
  - no coincidence principle, 75
  - normal product, 219, 225
  - number operator, 62
  - number vectors, 62
  - observables, 56
  - occupation numbers
    - bags, 18
    - partitions, 22
    - permutations, 24
    - urns, 2
  - one-particle irreducibility, 115
  - Osterwalder–Schrader axioms, 241
  - partitions, 20
    - lattice, 22
    - Möbius kernel, 28
    - multiplicative functions, 27
    - partial ordering, 22
    - partition function, 31
    - segment, 29
  - permanent, 149
  - permutations, 19
  - phylogenetic tree, 114

- Poincaré group, 199  
 polynomials  
   Charlier, 35  
   Hermite, 32  
 Principal Terms in the Dyson Series, 296  
 propagator  
   advanced, 221  
   Euclidean, 223  
   Feynman, 221  
   retarded, 221  
 Pulé  
   inequalities, 298  
   permutations, 299
- q-representation, 59  
 quantum Itô algebras, 287  
 quantum Itô formula, 268  
 quantum stochastic exponentials, 279  
 quantum stochastic integrals, 268  
 quantum Stratonovich (=symmetric) integrals, 276  
 quantum white noise, 277
- S-matrix, 249  
 Schwinger functions, 223, 224, 230, 241  
 second quantization  $\Gamma(S)$ , 159  
 Segal field operator, 166  
 self-energy, 119  
 semimartingale, 43  
 squeezing, 67  
 statistics  
   Bose–Einstein, 10  
   Fermi–Dirac, 11  
   Maxwell–Boltzmann, 9  
 Stirling numbers, 15  
 Stratonovich exponential, 53  
 surprise, 122  
 symplectic area, 59
- T-product, 222, 227, 240  
 $\tau$ -functions, 222, 227, 241  
 tensor  
   algebra, 142  
   antisymmetric, 151  
   product, 140  
   spaces, 140  
   symmetric, 144  
 theorem  
   Araki–Woods, 183  
   Cameron–Martin–Girsanov, 197  
   Chebotarev, 276  
   composition formula, 23  
   Contraction Principle, 130  
   Cramér, 131  
   cumulant expansion, 79  
   Deformation Principle, 131  
   Dyson–Schwinger Equation, 110  
   Faà di Bruno Formula, 24  
   Freidlin–Wentzell, 137  
   Gärtner–Ellis, 130  
   Haag, 198  
   Möbius inversion formula for partitions, 30  
   Sanov, 132  
   Schilder, 135  
   Varadhan, 130  
   Wick Expansion, 109  
 thermal fields, 183  
 time-ordered product of field operators, 223  
 transport of combinatorial species, 90  
 tree expansions, 113
- Van Hove model, 246
- Weyl displacement operator, 175  
 Weyl displacement unitary, 60  
 Weyl operator, 176  
 Weyl quantization, 71  
 Weyl relations, 175, 176  
 Wick integrals, 262  
 Wick ordering, 69  
 Wick power, 219  
 Wick product  $\diamond$ , 77  
 Wiener product, 191  
 Wiener–Segal representation, 191  
 Wightman functions, 215, 224, 238
- Yang–Feldman equation, 243
- zeta kernel, 28  
 zeta transformation, 30
