Index

Locators in **bold** refer to glossary entries
Locators in *italic* to figures/tables

- absolute humidity: 77, 240
- absorption, radiation: 57, 63
- electron transition: 60
- selective absorbers: 63
- tropics vs. polar regions: 66, 67
- vibration and rotation: 62
- absorption spectrum, visible window: 60
- accretion (riming), ice crystals: 120, 240
- accuracy, weather forecasts: 209, 212
- acid rain: 122, 224, 240
- acidification of oceans, climate change: 237
- adiabatic compression: 100
- adiabatic cooling: 92, 93, 240
- adiabatic lapse rate: 240, see also dry adiabatic lapse rate; moist adiabatic lapse rate
- adiabatic processes: 88, 240
- cloud formation: 92-94
- definition: 93
- adiabatic warming: 240
- advection: 240
- advection fog: 91, 240
- aerosols: 43, 49, 77, 79, 240
- as anchor points: 90
- impact of human activity: 235
- role in air pollution: 225
- role in cloud formation: 90
- aggregation, ice crystals: 120, 240
- air masses: 21, 240
- continental Arctic: 168
- continental polar: 167
- continental tropical: 168
- maritime polar: 168
- maritime tropical: 168
- midlatitude cyclones: 167-168
- source region: 167
- air parcels: 2, 240
- air pollution: 223, 229
- aerosols: 225
- concentration in valley bottoms: 228
- concentration under temperature inversion: 228
- dispersion: 225-226
- dispersion by wind: 225, 226
- effect of atmospheric stability: 225-226, 227
- large-scale patterns: 228
- mixed layer: 226
- mixing: 225
- topography: 228
- air temperature: 3, see also temperature
- aircraft, use in wind measurement: 13
- albedo: 58, 67, 240
- definition: 58
- polar regions: 68
- tropics vs. polar regions: 67
- typical examples: 58
- Aleutian low: 151, 240
- altocumulus: 114, 240
- altostratus: 115, 240
- altostratus: 115, 240
- Andes Mountains: 140, 181
- anemometers: 11
- aneroid barometers: 11
- angular momentum: 240
- conservation of: 192, 242
- animals, impacts of climate change: 237
- Antarctic ice sheet: 138, 157
- Antarcrica: 146
- katabatic winds: 143
- technically a desert: 151
- anticyclones: 96, 228, 241
- anticyclonic wind rotation: 136
- Archimedes’ principle: 53, 102, 103, 241
- Area Forecast Discussion, US National Weather Service: 220
- Atlantic jet stream: 151
- Atlantic storm tracks: 180
- atmosphere: xi, 42-50
- aspect: 42
- averaged: 146
- composition: 42-43
- effects of climate change: 232-233
- future evolution: 45-47
- general circulation: 145
- permanent gases: 42-43, 49
- origin and evolution: 43-45
- single-cell model of circulation: 152-154
- synoptic view: 25
- thinness of: 42, 49
- three-cell model of circulation: 154-155
- variable gases: 49
- vertical structure: 47-49
- atmospheric pressure: 6-10, 241
- adjustment to mean sea level: 24
- barometers: 8-9
- definition: 7
- measurement: 16
- pressure maps: 22, 24
- station model: 18
- units: 9
- useful numbers to remember: 10
- vertical distribution: 7-8, 47-49
- Automated Surface Observing Systems (ASOS): 15
- Automated Weather Observing Systems (AWOS): 15
- automated weather stations: 14, 15
- averaged atmosphere: 146
- precipitation: 151-152
- surface pressure: 151
- surface temperature: 146-147
- upper-level heights: 148-151
- balloons, weather, see radiosondes
- barometers: 8-9, 241
