

## Contents

	<i>Preface</i>	<i>page xi</i>
<b>1</b>	<b>Plasma Physics Fundamentals</b>	<b>1</b>
	Introduction	1
	1.1 Intrinsic Electromagnetic Forces	4
	1.2 Charged Particle Motion	7
	1.3 Debye Shielding Length	11
	1.4 Plasma Sheath	14
	1.5 Plasma Frequency	16
	1.6 Magnetohydrodynamic Waves in Plasma	18
	1.7 Landau Damping	22
	1.8 Joule Heating	23
	1.9 Plasma Kinetics Formulations	25
	1.10 Electric Conductivity	27
	1.11 Electric Conductivity in a Magnetic Field	29
	1.12 Ambipolar Diffusion	31
	References	35
<b>2</b>	<b>Plasma in a Magnetic Field</b>	<b>36</b>
	Introduction	36
	2.1 Hall Current and Parameter	39
	2.2 Transverse Waves	41
	2.3 Polarization of Electromagnetic Waves	44
	2.4 Microwave Propagation in Plasma	49
	2.5 Drift Diffusion in Transverse Magnetic Fields	56
	2.6 Magnetic Mirrors	61
	2.7 Plasma Pinch and Instability	65
	References	69
<b>3</b>	<b>Maxwell Equations</b>	<b>71</b>
	Introduction	71
	3.1 Faraday, Generalized Ampere, and Gauss Laws	73
	3.2 Maxwell Equations in the Time Domain	76

3.3	Poisson Equation of Plasma Dynamics	81
3.4	Interface Boundary Conditions	82
3.5	Eigenvalues and Characteristic Variables	87
3.6	Characteristic Formulation	91
3.7	Far-Field Boundary Conditions	96
3.8	High-Resolution Numerical Algorithms	100
	References	106
<b>4</b>	<b>Plasma Dynamics Formulation</b>	<b>108</b>
	Introduction	108
4.1	Boltzmann-Maxwell Equation	111
4.2	Fokker-Plank Equation and Lorentz Approximation	115
4.3	Vlasov Equations for Collisionless Plasma	117
4.4	Multi-temperature and Multi-fluid Models	118
4.5	Low Magnetic Reynolds Number Formulation	127
4.6	Transport Properties via Kinetic Theory	131
4.7	Solving Procedures	137
	References	144
<b>5</b>	<b>Magnetohydrodynamics Equations</b>	<b>146</b>
	Introduction	146
5.1	Basic Assumptions of MHD	148
5.2	Generalized Ohm's Law	150
5.3	Ideal MHD Equations	153
5.4	Eigenvalues and Electromagnetic Waves	160
5.5	Full MHD Equations	166
5.6	Similarity Parameters of MHD	171
5.7	Modified Rankine-Hugoniot Shock Conditions	174
5.8	Classic Solutions of MHD Equations	178
	References	183
<b>6</b>	<b>Ionization Processes in Gas</b>	<b>185</b>
	Introduction	185
6.1	Basic Ionization Mechanisms	188
6.2	Lighthill and Saha Equations	194
6.3	Electron Impact Ionization	197
6.4	Thermal Ionization by Chemical Kinetics	202
6.5	Inelastic Collision Ionization Models	210
6.6	Database of Chemical Kinetics	219
	References	222

<b>7</b>	<b>Plasma and Magnetic Field Generation</b>	225
	Introduction	225
	7.1 Direct Current Discharge	227
	7.2 Dielectric Barrier Discharge	234
	7.3 Shock Tubes	240
	7.4 MHD Electric Generators	243
	7.5 Arc Plasmatron	246
	7.6 Induction Plasma Generators	248
	7.7 Microwave Plasmatron	252
	7.8 Plasma by Radiation	255
	7.9 Magnetic Field Generations	258
	References	263
<b>8</b>	<b>Plasma Diagnostics</b>	266
	Introduction	266
	8.1 Electrode Arrangements of Langmuir Probe	268
	8.2 Data Reduction for Langmuir Probes	272
	8.3 Emission Spectroscopy	276
	8.4 Microwave Attenuation in Plasma	285
	8.5 Microwave Dispersion in Plasma	289
	8.6 Microwave Probing Simulations	292
	8.7 Retarding Potential Analyzer	300
	References	302
<b>9</b>	<b>Radiative Energy Transfer</b>	304
	Introduction	304
	9.1 Fundamental of Thermal Radiation	306
	9.2 Integro-differential Radiation Transfer Equation	309
	9.3 Half-Moment Method	313
	9.4 Spherical Harmonic ( $P_N$ ) Method	316
	9.5 Method of Discrete Ordinates	321
	9.6 Governing Equations of Gas Dynamics Radiation	325
	9.7 Ray-Tracing Procedure	328
	9.8 Monte Carlo Method	336
	References	339
<b>10</b>	<b>Applications</b>	342
	Introduction	342
	10.1 Ion Thrusters	345
	10.2 Reentry Thermal Protection	351
	10.3 Plasma Actuators for Flow Control	361

10.4 Remote Energy Deposition	369
10.5 Scramjet MHD Energy Bypass	373
10.6 Plasma-Assisted Ignition and Combustion	375
References	378
<i>Appendix: Physical Constants and Dimensions</i>	383
<i>Index</i>	385
