

CLIMATE CHANGE AND OCEAN GOVERNANCE

Politics and Policy for Threatened Seas

Climate Change and Ocean Governance brings together authors from political science and cognate disciplines to examine the political and policy dimensions of climate change for our oceans. The environmental, social, and economic consequences of oceanic change present tremendous challenges for governments and other actors. New and innovative policies for governing oceans and seas – and for managing vital marine resources – have never been more important. Existing national and international institutions for marine governance that were created when oceanic conditions were relatively static may not be adequate for a future characterized by continuous oceanic change. Responses to oceanic change will result in winners and losers, and thus will involve politics in all its manifestations. This book reveals the unavoidable connections between climate change, the oceans, and questions of governance. It provides valuable lessons for researchers, policymakers, and activists concerned about governing oceanic change into the future.

PAUL G. HARRIS is a political scientist and the Chair Professor of Global and Environmental Studies at the Education University of Hong Kong. He is author and editor of many books on global environmental politics, policy, and ethics, including *Global Ethics and Climate Change, Second Edition* (2016, Edinburgh University Press), the *Routledge Handbook of Global Environmental Politics* (2016, Routledge), and *What's Wrong with Climate Politics and How to Fix It* (2013, Polity).

Contributors

Justin Alger is a doctoral candidate in Political Science at the University of British Columbia.

Mohammad Al-Saidi is an assistant professor for Sustainable Development Policy at the Center for Sustainable Development, Qatar University.

Lisa Benjamin is an assistant professor in the LL.B. Program and co-founder of the Climate Change Initiative at the University of the Bahamas.

Thomas L. Brewer is a senior fellow at the International Center for Trade and Sustainable Development, and a visiting scholar at the MIT Center for Energy and Environmental Policy Research.

Dorothy J. Dankel is a researcher in the Department of Biological Sciences at the University of Bergen, Norway and a board member of the Nordic Marine Think Tank.

Pedro Fidelman is a senior research fellow in the Centre for Policy Futures at the University of Queensland, Australia.

David Glassom is a lecturer in the School of Life Sciences at the University of KwaZulu-Natal, South Africa.

Arne Harms is a lecturer at Uni Leipzig's Institute of Anthropology and senior researcher at the Collaborative Research Center on Processes of Spatialization under the Global Condition.

Paul G. Harris is the Chair Professor of Global and Environmental Studies at the Education University of Hong Kong.

Marcus Haward is a professor of Ocean and Antarctic Governance at the Institute for Marine and Antarctic Studies, University of Tasmania, Australia.

Benjamin Hofmann is a research associate and doctoral candidate at the Institute of Political Science, University of St.Gallen, Switzerland.

Yanasivan Kisten is a postdoctoral fellow in the Department of Zoology at Nelson Mandela University, South Africa.

Konstantia Koutouki is a professor of law at the faculty de droit, Université de Montréal, and executive director of the Nomomente Institute, Canada.

Anastasia Kuswardani is a researcher at the Agency for Marine and Fisheries Research and Human Resource Development, Ministry of Marine Affairs and Fisheries, Republic of Indonesia.

Judith van Leeuwen is an assistant professor in the Environmental Policy Group at Wageningen University, the Netherlands.

Reuben Makomere is a doctoral candidate in the Faculty of Law, University of Tasmania, Hobart, Australia.

Kennedy Liti Mbeva is a doctoral candidate in the Department of Political Science at the University of Melbourne, Australia.

Ian McGregor is a lecturer in Management at the UTS Business School, University of Technology, Sydney (UTS).

Elizabeth Mendenhall is an assistant professor in the Department of Marine Affairs at the University of Rhode Island.

Wendy E. Morrison is an analyst of Fishery Management Policy at the US National Marine Fisheries Service.

Kapil Narula is a senior research fellow at the University of Geneva and a former Indian naval officer.

John T. Oliver is the senior ocean policy advisor on the Emerging Policy Staff, US Coast Guard Headquarters, and an adjunct professor at the Georgetown Law Center, Washington, DC.

Joe-Mar Perez is a training specialist at the Office of Civil Defense, the Philippines, and a member of the ASEAN Emergency Response and Assessment Team.

Freedom-Kai Phillips is a research associate with the International Law Research Program at the Centre for International Governance Innovation, Canada.

Kamleshan Pillay is a climate finance researcher at the Center for International Climate and Environmental Research-Oslo (CICERO), Norway.

Achmad Poernomo is the senior research scientist and lecturer, Agency for Marine and Fisheries Research and Human Resource Development, Ministry of Marine Affairs and Fisheries, Republic of Indonesia.

Christina Reichert is a policy counsel of the Climate and Energy Program, Nicholas Institute for Environmental Policy Solutions, Duke University.

Acknowledgments

I am grateful to the contributors for sharing my interest in, and concerns about, climate change and ocean governance. Without their scholarship, this volume would not be possible. (A number of contributors have expressed acknowledgments in their own chapters.)

Matt Lloyd, Editor for Earth and Environmental Sciences, and Publishing Director for Science, Technology and Medicine (Americas), at Cambridge University Press, diligently guided the project through the complex review process, for which he has my genuine thanks. I am grateful to the anonymous reviewers commissioned by Cambridge University Press. They saw the scholarly merits of the project and provided valuable insights. The Press Syndicate of Cambridge University Press (the Press' editorial board) generously agreed to publish the volume, for which I am grateful. My thanks also go to other people at Cambridge University Press for their help in bringing this volume to readers, including Mariela Valdez-Cordero, editorial assistant; Esther Miguéliz Obanos, content manager for academic books in science, technology, and medicine; Ashwani Radjassegarane, project manager; Lisa McCoy, copyeditor; and other individuals and teams at the press who have contributed behind the scenes.

Finally, I give my special thanks to Keith, Mobie, and Susie for companionship and forbearance during this project and many similar projects in the past.

This volume is dedicated to the countless people around the world who are actively engaged in ocean governance in its myriad manifestations. If this volume assists their efforts to respond effectively to climate change at sea, it will be very worthwhile indeed.
