Introductory Note
References such as ‘178–79’ indicate (not necessarily continuous) discussion of a topic across a range of pages. Wherever possible in the case of topics with many references, these have either been divided into sub-topics or only the most significant discussions of the topic are listed. Because the entire work is about ‘constitutionalism,’ the use of this term (and certain others that occur constantly throughout the book) as entry points has been minimized. Information will be found under the corresponding detailed topics.
