

Contents

1	Introduction and Overview	<i>page</i> 1
	1.1 Motivation and Background	1
	1.2 Purpose of This Book	5
	1.3 How to Use This Book	6
	1.4 Suggested Reading	8
	1.5 A Brief History of Robot Grasp Mechanics	9
	References	12
	Part I Basic Geometry of the Grasping Process	15
2	Rigid-Body Configuration Space	17
	2.1 The Notion of Configuration Space	17
	2.2 Configuration Space Obstacles	20
	2.3 The C-Obstacle Normal	23
	2.4 The C-Obstacle Curvature	26
	Bibliographical Notes	30
	Appendix: Details of Proofs	31
	Exercises	34
	References	37
3	Configuration Space Tangent and Cotangent Vectors	38
	3.1 C-Space Tangent Vectors	38
	3.2 C-Space Cotangent Vectors	41
	3.3 Line Geometry of Tangent and Cotangent Vectors	43
	Bibliographical Notes	48
	Exercises	49
	References	52
4	Rigid-Body Equilibrium Grasps	54
	4.1 Rigid-Body Contact Models	54
	4.2 The Grasp Map	59
	4.3 The Equilibrium Grasp Condition	61

4.4	The Internal Grasp Forces	65
4.5	The Moment Labeling Technique	67
	Bibliographical Notes	71
	Appendix: Proof of Moment Labeling Lemma	72
	Exercises	73
	References	80
5	A Catalog of Equilibrium Grasps	81
5.1	Line Geometry of Equilibrium Grasps	81
5.2	The Planar Equilibrium Grasps	83
5.3	The Spatial Equilibrium Grasps	97
5.4	Equilibrium Grasps Involving Higher Numbers of Fingers	110
	Bibliographical Notes	111
	Appendix I: Proof Details	112
	Appendix II: The Dimension of the Set of Frictionless Equilibrium Grasps	117
	Exercises	120
	References	132
	Part II Frictionless Rigid-Body Grasps and Stances	133
6	Introduction to Secure Grasps	135
6.1	Immobilizing Grasps	135
6.2	Wrench Resistant Grasps	139
6.3	Duality of Immobilizing and Wrench-Resistant Grasps under Frictionless Contact Conditions	142
6.4	A Forward Look at the Chapters of Part II	144
	Bibliographical Notes	144
	Appendix: Proof Details	145
	References	146
7	First-Order Immobilizing Grasps	147
7.1	The First-Order Free Motions	147
7.2	The First-Order Mobility Index	151
7.3	First-Order Immobilization	154
7.4	Graphical Interpretation of the First-Order Mobility Index	157
	Bibliographical Notes	160
	Appendix: Proof Details	161
	Exercises	163
	References	166
8	Second-Order Immobilizing Grasps	167
8.1	The Second-Order Free Motions	167
8.2	The Second-Order Mobility Index	171

8.3	Second-Order Immobilization	173
8.4	Graphical Depiction of Second-Order Mobility	177
	Bibliographical Notes	182
	Appendix: Proof Details	183
	Exercises	188
	References	193
9	Minimal Immobilizing Grasps	194
9.1	Minimal First-Order Immobilizing Grasps	195
9.2	The Maximal Inscribed Disc	198
9.3	Minimal Second-Order Immobilizing Grasps	201
9.4	Minimal Second-Order Immobilization of Polygons	208
9.5	Minimal Second-Order Immobilization of Polyhedral Objects	212
	Bibliographical Notes	220
	Appendix I: Details Concerning the Inscribed Disc	220
	Appendix II: Details Concerning Minimal Second-Order Immobilization of 2-D Objects	222
	Exercises	225
	References	230
10	Multi-Finger Caging Grasps	232
10.1	Robot Hands Governed by a Scalar Shape Parameter	233
10.2	Configuration Space of One-Parameter Robot Hands	234
10.3	C-Space Representation of Cage Formations	236
10.4	The Caging Set Puncture Point	239
10.5	Graphical Depiction of Two-Finger Cage Formations	242
	Bibliographical Notes	246
	Appendix: Proof Details	247
	Exercises	250
	References	254
11	Frictionless Hand-Supported Stances under Gravity	256
11.1	C-Space Representation of Equilibrium Stances	257
11.2	The Stable Equilibrium Stances	261
11.3	The Stance Stability Test	264
11.4	Formulas for the Stance Stability Test	269
11.5	The Stable Equilibrium Region of 2-D Stances	271
11.6	The Stable Equilibrium Region of 3-D Stances	277
	Bibliographical Notes	285
	Appendix: Proof Details	286
	Exercises	289
	References	297

Part III	Frictional Rigid-Body Grasps and Stances	299
12	Wrench-Resistant Grasps	301
	12.1 Wrench Resistance and Internal Grasp Forces	302
	12.2 Wrench Resistance as a Linear Matrix Inequality	305
	12.3 Grasp Force Optimization	308
	12.4 Grasp Controllability	310
	Bibliographical Notes	315
	Exercises	315
	References	319
13	Grasp Quality Functions	321
	13.1 Quality Functions Based on Rigid-Body Kinematics	322
	13.2 Quality Functions Based on the Grasp Matrix	323
	13.3 Quality Functions Based on the Grasp Polygon	328
	13.4 Quality Functions Based on Contact Point Locations	330
	13.5 Quality Functions Based on Contact Force Magnitudes	333
	13.6 Finger Force Optimization Based on Task Specification	336
	Bibliographical Notes	339
	Appendix I: Review of Distance Metrics and Norms	340
	Appendix II: Behavior of the Grasp Matrix under Coordinate Transformations	341
	Appendix III: The Wrench Resistance Regions	343
	Exercises	344
	References	348
14	Hand-Supported Stances under Gravity – Part I	349
	14.1 Local Wrench-Resistant Stances	350
	14.2 The Feasible Equilibrium Region of 2-D Stances	352
	14.3 Graphical Construction of the 2-D Stance Equilibrium Region	355
	14.4 Safety Margin on the 2-D Stance Equilibrium Region	358
	Bibliographical Notes	363
	Appendix: Proof Details	363
	Exercises	365
	References	370
15	Hand-Supported Stances under Gravity – Part II	371
	15.1 Basic Properties of 3-D Equilibrium Stances	372
	15.2 The Tame Hand-Supported Stances	374
	15.3 A Scheme for Computing the Stance Equilibrium Region	377
	15.4 The Boundary of the Net Wrench Cone \mathcal{W}	379
	15.5 Critical Contact Forces That Contribute Boundary Facets to \mathcal{W}	383
	15.6 The Stance Equilibrium Region Boundary Curves	387
	15.7 Onset of Non-Static Motion Modes at the Contacts	391

	Bibliographical Notes	392
	Appendix: Proofs and Technical Details	393
	Exercises	403
	References	408
Part IV	Grasping Mechanisms	409
16	The Kinematics and Mechanics of Grasping Mechanisms	411
	16.1 The Relation between Finger-Joint Velocities and the Grasped Object Rigid-Body Velocity	411
	16.2 The Relation between Finger-Joint Torques and Grasped Object Wrenches	417
	16.3 The Four Types of Hand Mechanism Grasp Forces	421
	16.4 Effect of the Robot Hand on Wrench-Resistant Grasps	427
	Bibliographical Notes	434
	Appendix I: The Jacobian of a Single Finger Mechanism	434
	Appendix II: Resistant Contact Force Decomposition	435
	Exercises	436
	References	440
17	Grasp Manipulability	441
	17.1 Instantaneous Manipulability	442
	17.2 Local Manipulability	446
	Bibliographical Notes	449
	Appendix: Proof of the Local Manipulability Theorem	450
	Exercises	451
	References	453
18	Hand Mechanism Compliance	454
	18.1 One-Dimensional Stiffness and Compliance	454
	18.2 The Effects of Joint Compliance on Grasp Stiffness	457
	18.3 The Grasp Center of Stiffness	463
	18.4 Stability of Compliant Grasps	467
	Bibliographical Notes	471
	Appendix: Derivation of the Grasp Stiffness Matrix	471
	Exercises	475
	References	476
Appendix A	Introduction to Non-Smooth Analysis	478
Appendix B	Summary of Stratified Morse Theory	486
	<i>Index</i>	493
