Preface *page xi*

Part I Kinks and Solitary Waves

1 Sine-Gordon Model	3
1.1 The Dawning of Solitons: From the Frenkel–Kontorova Model to the Sine-Gordon Model	3
1.2 Bäcklund Transformation and Other Solutions for the Sine-Gordon Equation	12
1.3 Integrability: The Sine-Gordon Model	24
2 Kinks in Models with Polynomial Potentials in $(1 + 1)$ Dimensions	33
2.1 Model ϕ^4	33
2.2 Chaotic Dynamics of Kinks	44
2.3 Collective Coordinate Approximations	48
2.4 Oscillons	52
3 Non-Topological Solitons: The Korteweg–de Vries System	61
3.1 The Korteweg–de Vries Equation	61
3.2 From the Fermi–Pasta–Ulam Problem to the KdV Equation	66
3.3 The KdV Equation: Symmetries and Integrals of Motion	69
3.4 Compacton and Peakon Solutions of the Generalized KdV Equation	80

Part II $O(3)$ Sigma Model, Lumps, and Baby Skyrmions

4 $O(3)$ Nonlinear Sigma Model	87
4.1 Derrick’s Theorem	87
4.2 $O(3)$ Sigma Model	91
4.3 $O(3)$ Sigma Model versus CP^1 Model	93
4.4 Topological Classification and the Soliton Solutions	99
5 Baby Skyrmions	113
5.1 Baby Skyrme Model	114
5.2 Soliton Solutions of the Baby Skyrme Model	115

x	<i>Contents</i>	
5.3	Baby Skyrmions on the Topological Bound	128
5.4	Magnetic Skyrmions	133
Part III Q-Balls, Skyrmions, and Hopfions		
6	Q-Balls	139
6.1	$U(1)$ Q-Balls in 1 + 1 Dimensions	140
6.2	Q-Balls in 3 + 1 Dimensions	151
6.3	Isospinning Solitons	162
7	Skyrmions	171
7.1	Skyrme Model	173
7.2	Skyrmion Solutions	178
7.3	Spinning and Isospinning Skyrmions	200
7.4	Reduced Skyrme Model and the Topological Bound	210
8	Hopfions	221
8.1	Hopf Map	222
8.2	The Faddeev–Skyrme Model	225
8.3	Construction of the Hopfion Solutions	227
8.4	Hopfions in Reduced Models	242
	<i>Bibliography</i>	247
	<i>Index</i>	264
