

INDEX

Locators in **bold** refer to tables; those in *italic* to figures

- acidification of the oceans 54–55, 232
- Africa
 - energy 60, 70
 - food wastage 39
 - inequality/wealth distribution 132–34
 - population growth 150
- agriculture *see* food and agriculture
- air pollution 107–9, 217
- air travel 4–5, 212
 - food miles 30–32
 - impact of virtual meetings 113–14
 - low carbon 110–12
 - personal actions 112–13
 - risks of further growth 122
- algal biofuels 78–79
- Anderson, Kevin 113
- animal sources of food 16–21, 230–31
 - inefficiency of animal feeds 212–13
 - laboratory grown meat 45–46, 67–68
 - micro-nutrients 19–20
 - protein 17–18, 18
 - risks of further growth 120
- Anthropocene 2, 61, 195–97, 213
- antibiotics resistance 20–21, 25–26
- appearances, over-valuing 182
- appreciation, simple pleasures 123, 187–88, 191
- armaments industry, and employment 152
- artificial intelligence 167
- atomic particles analogy of wealth distribution 136–39
- Australia 69–70, 70, 89–90
- autonomous cars 109–10
- autonomy/being in control 266
- awareness *see* appreciation; self-awareness
- balloon squeezing effect *see* rebound effects
- Bangladesh 70, 70–71, 210
- batteries, storage of renewable energy 71–72
- Belgium 70, 70–71
- belief systems 192–93, 237
- belonging 266
- Berners-Lee, Mike
 - Burning Question* (with Clark) 4, 92, 215
 - How Bad Are Bananas?* 32, 147–48, 227
- big picture perspective 186, 191, 195–97
- biodiversity 44, 53–54, 101–3, 102–3, **103–4**, 214
 - big picture perspective 195–96
 - pressure on land 78–79, 91
- Bioregional, One Planet Living 160–62, 162
- boats/shipping 114–16, 235–36
- Brazil 69–70, 70

- Brexit 214
 Buddhism 193, 208
 bullshit 179, 214; *see also* fake news; truth
Burning Question (Berners-Lee and Clark) 4, 92, 215
 business as usual 8, 128, 204
 businesses 158, 215
 environmental strategies 163–64
 fossil fuel companies 223
 perspectives/vision 159
 role in wealth distribution 138–39
 science-based targets 164–66
 systems approaches 159–62, 161–62
 technological changes 166–68
 useful/beneficial organisations 158–59
 values 159, 174
 see also food retailers
- call centres, negative effect of
 performance metrics 125–26
 calorific needs 12, 242–43
 carbohydrates, carbon footprint 23–25, 25
 carbon budgets 51–52, 88, 146, 169–70, 201–2, 204–5
 carbon capture and storage (CCS) 91–92, 141, 211, 215
 carbon dioxide emissions,
 exponential growth 202–4, 203, 220; *see also* greenhouse gas emissions
 carbon footprints
 agriculture 22–25, 23, 29–30
 carbohydrates 25
 local food/food miles 30–32
 population growth 149
 protein 24
 sea travel 114–16
 vegetarianism/veganism 27
 carbon pricing 145–47, 209–10
 carbon scrubbing 211, 216
 carbon taxes 142–43
 CCS *see* carbon capture and storage
 celebrities 182
 change, embracing *see* open-mindedness
 chicken farms 25–26
 Chilean seabass (Patagonian toothfish) 33–34
 China 216
 global distribution of fossil fuel reserves 89–90
 sunlight/radiant energy 69–70, 70
 choice//being in control 266
 cities, urban planning and transport 104–6
 citizen's wages 136–39, 153–54
 Clark, Duncan: *Burning Question* (with Berners-Lee) 4, 92, 215
 climate change 3–4, 51, 55, 216
 big picture perspective 195
 biodiversity impacts 53–54
 evidence against using fossil fuels 64–66
 ocean acidification 54–55
 plastics production/pollution 55–58, 56–57
 rebound effects 52, 128, 165–66, 206–7, 206
 science-based targets 164–66
