Part I Transport of Radioactive Materials in the Environment	1
1 Introduction: Basic Concepts Regarding the Fukushima Accident and Radiation and Radioactivity	5
1.1 Overview of the Fukushima Accident	5
TERUYUKI NAKAJIMA, TOSHIMASA OHARA, MITSUO UEMATSU AND YUICHI ONDA	
1.2 Radioactive Elements, Radioactive Nuclides and Radioactive Substances	10
MITSURU EBIHARA AND ATSUSHI SHINOHARA	
1.3 Measurement of Radiation	12
MITSURU EBIHARA AND ATSUSHI SHINOHARA	
1.4 Example of γ -Ray Spectrometry to Determine Accurate Radioactivity Values	15
MITSURU EBIHARA, ATSUSHI SHINOHARA AND YASUNORI HAMAJIMA	
1.5 Radioactivity and Radiation Dose	20
MITSURU EBIHARA AND ATSUSHI SHINOHARA	
1.6 Effects of Radioactive Substances on Humans	22
YASUHITO IGARASHI AND TATSUO AONO	
1.7 Environmental Transfer of Radioactive Substances	25
YASUHITO IGARASHI	
1.8 Temporal Trends of Radioactive Substances after and before the Fukushima Daiichi Nuclear Power Plant Accident : Quantitative Comparison	28
YASUHITO IGARASHI, MICHIO AOYAMA AND MASAYUKI TAKIGAWA	
	vii

1.9	Characteristics of Anthropogenic Radionuclides in the Atmosphere after the Fukushima Daiichi Nuclear Power Plant Accident	33
	YASUHITO IGARASHI	
1.10	Time-Dependent Change of Radiation Levels in the 80 km Zone for Five Years after the Fukushima Accident	38
	KIMIYAKI SAITO	
	<i>References</i>	44
2	Estimation of Environmental Releases of Radioactive Materials	50
2.1	Release of Radioactive Materials into the Atmosphere	50
	MASAMICHI CHINO AND HARUYASU NAGAI	
2.2	Reverse Estimation Method for the Source Term	51
	MASAMICHI CHINO AND HARUYASU NAGAI	
2.3	Release Rates of Radionuclides from the FDNPS	52
	MASAMICHI CHINO AND HARUYASU NAGAI	
2.4	Evaluation of the Release Rates	53
	MASAMICHI CHINO AND HARUYASU NAGAI	
2.5	Estimation of the Direct Release into the Ocean	55
	DAISUKE TSUMUNE AND YUKIO MASUMOTO	
	<i>References</i>	59
3	Diffusion in the Atmosphere	62
3.1	The Atmospheric Transport Process for Radioactive Substances and the Effects of Meteorological Conditions	62
	HISASHI NAKAMURA, YU MORINO AND MASAYUKI TAKIGAWA	
3.2	Atmospheric Transportation and Deposition of the Radioactive Materials	63
	YU MORINO, MASAYUKI TAKIGAWA AND HISASHI NAKAMURA	
3.3	Atmospheric Dispersion of Releases	73
	ANNE MATHIEU, OLIVIER SAUNIER, DENIS QUÉLO AND DAMIEN DIDIER	
3.4	What Would Have Happened if This Accident Had Occurred in a Different Season or at a Different Power Plant?	80
	HISASHI NAKAMURA, YU MORINO AND MASAYUKI TAKIGAWA	
3.5	Factors Contributing to Uncertainty in Atmospheric Diffusion Models	82
	MASAYUKI TAKIGAWA, YU MORINO AND HISASHI NAKAMURA	
3.6	Behaviour of Radioactive Substances Based on Atmospheric Monitoring at Fukushima University	84
	AKIRA WATANABE	

	<i>Contents</i>	ix
3.7	Atmospheric Radionuclides Concentrations Just After the Fukushima Accident	91
	HARUO TSURUTA, YASUJI OURA, MITSURU EBIHARA AND DAISUKE GOTO	
3.8	Monitoring the Radioactivity of Atmospheric Aerosols and the Influence of Resuspension from the Ground	98
	KAZUYUKI KITA AND MIZUO KAJINO	
3.9	Characteristics of Radioactive Materials in Aerosols	103
	YOSHIO TAKAHASHI AND NAOHIRO YOSHIDA	
3.10	Sizes and Distributions of Metallic Particles Caused by Burning or Explosion	105
	ISAO TANIHATA AND MAMORU FUJIWARA	
	<i>References</i>	106
4	Global Transport of Radioactive Materials	112
4.1	Global Observation of Radioactive Material	112
	TAICHU YASUMICHI TANAKA, TOSHIHIKO TAKEMURA AND MICHIO AOYAMA	
4.2	Simulations of the Long-Range Transport of Radioactive Materials after the Accident	116
	TAICHU YASUMICHI TANAKA, TOSHIHIKO TAKEMURA AND MICHIO AOYAMA	
4.3	Estimation of the Transport Pathway and Simulation of Radioactive Materials Using Global-Scale Models	117
	TAICHU YASUMICHI TANAKA, TOSHIHIKO TAKEMURA AND MICHIO AOYAMA	
4.4	Inverse Estimation of Emission Fluxes Based on Global Observations and Numerical Simulations	120
	TAICHU YASUMICHI TANAKA, TOSHIHIKO TAKEMURA AND MICHIO AOYAMA	
4.5	Future Issues in the Global Simulation of Radioactive Materials	123
	TAICHU YASUMICHI TANAKA, TOSHIHIKO TAKEMURA AND MICHIO AOYAMA	
	<i>References</i>	125
5	Ocean Transport of Radioactive Materials	128
5.1	Introduction	128
	MICHIO AOYAMA, MITSUO UEMATSU, SEIYA NAGAO, TAKASHI ISHIMARU, JOTA KANDA, TATSUO AONO, YUKIO MASUMOTO AND DAISUKE TSUMUNE	

5.2	Measurement of Radioactive Materials Over the Marine Atmosphere	129
	MITSUO UEMATSU	
5.3	Behaviour of Radiocaesium from Rivers to the Coastal Marine Environment	131
	SEIYA NAGAO	
5.4	Transport of Radiocaesium in the North Pacific Ocean	134
	MICHIO AOYAMA	
5.5	Dispersion Simulation and Estimation of the Total Amount of ^{137}Cs Directly Discharged into the Ocean	138
	YUKIO MASUMOTO AND DAISUKE TSUMUNE	
5.6	Investigation of Radioactive Contamination of Marine Biota: A Chronicle	141
	TAKASHI ISHIMARU	
5.7	Pollution in Coastal Environments: Seawater and Sediment	144
	JOTA KANDA	
5.8	Pollution of Marine Fish and Shellfish	148
	TAKASHI ISHIMARU AND TATSUO AONO	
5.9	Transfer Mechanisms of Radionuclides in the Marine Ecosystem	154
	JOTA KANDA AND TAKASHI ISHIMARU	
5.10	Radioactive Caesium from the Fukushima Nuclear Power Plant in Migratory Marine Animals	157
	ZOFIA BAUMANN, DANIEL J. MADIGAN AND NICHOLAS S. FISHER	
	<i>References</i>	162
6	Diffusion and Deposition of Radioactive Materials in the Terrestrial Environment	167
6.1	Overview of the Large-Scale Measurement of Radioactive Materials Deposited on Ground Surfaces	167
	ISAO TANIHATA, MAMORU FUJIWARA AND YUICHI ONDA	
6.2	Radionuclide Transfer from Forest Environments	176
	YUICHI ONDA	
6.3	Sediment and Radionuclide Transfer from the Land to the Ocean: International Research Perspectives	182
	OLIVIER EVRARD AND J. PATRICK LACEBY	
6.4	Distribution and Migration of Radioiodine in Terrestrial Environment	186
	TETSUYA MATSUNAKA AND KIMIKAZU SASA	
6.5	Understanding the Migration Behaviour of Radiocaesium at the Molecular Scale	191
	YOSHIO TAKAHASHI, KAZUYA TANAKA AND AYA SAKAGUCHI	

	<i>Contents</i>	xi
6.6	Effects on Agricultural Products and Wild Plants CHISATO TAKENAKA	197
	<i>References</i>	206
	Part II Development and Future Issues for the Infrastructure of Disaster Prevention	213
	Preliminary remarks TOKUSHI SHIBATA	215
7	Monitoring System	219
7.1	Introduction HIROMI YAMAZAWA	219
7.2	Radiation Monitoring Facilities HIROMI YAMAZAWA	220
7.3	Information Necessary for Off-Site Countermeasures HIROMI YAMAZAWA	224
7.4	Other Infrastructure HIROMI YAMAZAWA	225
7.5	Monitoring of Rivers YUICHI ONDA	228
	<i>References</i>	228
8	Dispersion Modelling of Radioactive Materials	230
8.1	Overview of SPEEDI HARUYASU NAGAI AND HIROMI YAMAZAWA	230
8.2	Role of SPEEDI in the Emergency Response Framework HARUYASU NAGAI AND HIROMI YAMAZAWA	233
8.3	Response to the Fukushima Daiichi Nuclear Power Station Accident HARUYASU NAGAI AND HIROMI YAMAZAWA	235
8.4	How Should We Have Utilised SPEEDI? HARUYASU NAGAI AND HIROMI YAMAZAWA	236
8.5	Lessons and Tasks for SPEEDI from the Accident HARUYASU NAGAI AND HIROMI YAMAZAWA	238
8.6	Recent Status of Atmospheric Dispersion Modelling HARUYASU NAGAI AND HIROMI YAMAZAWA	239
	<i>References</i>	241
9	Off-Site Decontamination	243
9.1	Concept of Decontamination and Its Application YUICHI MORIGUCHI	243

xii	<i>Contents</i>	
9.2	Decontamination Techniques Used at Contaminated Sites YUICHI MORIGUCHI	245
9.3	Timeline of the Decontamination-Related Events Following the Disaster YUICHI MORIGUCHI	246
9.4	Demonstration Tests and Demonstration Model Projects for Decontamination Technologies YUICHI MORIGUCHI	249
9.5	Contamination Levels Required to Trigger Intensive Survey for the Necessity of Decontamination Work and of the Goals of Decontamination YUICHI MORIGUCHI	251
9.6	Temporary and Interim Storage, Processing and the Final Disposal of Soil and Waste Generated by Decontamination YUICHI MORIGUCHI	253
9.7	Conclusion YUICHI MORIGUCHI	255
	<i>References</i>	256
	Part III Lessons and Future Issues from the Fukushima Accident	257
10	Urgent Actions by Scientists	261
10.1	The Gathering and Distribution of Information Required for Applying Countermeasures at the Disaster Site TOKUSHI SHIBATA	261
10.2	The Need for Interdisciplinary Research TOSHIMASA OHARA	262
10.3	Explanation of Scientific Phenomena and Uncertainties: The Importance of Validation –Lessons from the IPCC TERUYUKI NAKAJIMA	268
10.4	Proposal for <i>Group Voice</i> : Going beyond the Limits of <i>One Voice</i> and Making Information Provided by Scientists Available to the Public in Emergency Situations HIROMI YOKOYAMA	271
10.5	The Autonomous Dissemination of Information from Scientists MASATOSHI IMADA	277
11	Emergency Actions and Messages Related to the Fukushima Accident	284
11.1	Reports from Fukushima University AKIRA WATANABE	284

	<i>Contents</i>	xiii
11.2	Efforts of the Science Council of Japan and Scientific Societies and Unions	291
	TERUYUKI NAKAJIMA, TOKUSHI SHIBATA AND TOMOYUKI TAKAHASHI	
11.3	Urgent Atmospheric Measurements Under Collaboration between Geoscientists and Radiological Chemists	294
	HARUO TSURUTA AND TERUYUKI NAKAJIMA	
11.4	Urgent Survey for the Disaster at Sea	297
	MITSUO UEMATSU, TAKESHI KAWANO AND ATSUSHI TSUDA	
11.5	Participation of Nuclear Physicists in the Screening Survey	305
	ISAO TANIHATA AND MAMORU FUJIWARA	
11.6	Large-Scale Investigation of Deposited Radioactive Materials	309
	TOKUSHI SHIBATA, ISAO TANIHATA, MAMORU FUJIWARA, TAKAHARU OTSUKA AND SUSUMU SHIMOURA	
11.7	Scientists' Contribution to the Study of Forests	323
	YUICHI ONDA	
11.8	Specific Characteristics of the Fukushima Accident	325
	ANNE MATHIEU, DENIS QUÉLO, OLIVIER SAUNIER AND DAMIEN DIDIER	
	<i>References</i>	326
12	Recommendations for the Fukushima Project from Foreign Scientists	328
12.1	Emergency Response Improvements Following the Fukushima Nuclear Accident	328
	ANNE MATHIEU, DENIS QUÉLO, OLIVIER SAUNIER AND DAMIEN DIDIER	
12.2	Suggestions for Future Steps to be Taken by Japan	331
	NICHOLAS S. FISHER	
12.3	Recommendations to Japanese Researchers	333
	OLIVIER EVRARD	
	<i>References</i>	334
	<i>Glossary</i>	335
	<i>Names of Locations</i>	351
	<i>Index</i>	353
	<i>The colour plate section appears between pages 170 and 171.</i>
