Introduction to Igneous Petrology	1	Introduction to Silicate Melts and Magmas	39
1.1 Introduction	1	3.1 Introduction	39
1.2 The Scope of Igneous Petrology	2	3.2 Role of Volatiles	40
1.3 Classification of Igneous Rocks	2	3.2.1 Role of H ₂ O	40
1.3.1 Preliminary Classification	3	3.2.2 Role of CO ₂	41
1.3.2 IUGS Classification of Plutonic Rocks	3	3.3 Physical Properties of Magma	42
1.3.3 IUGS Classification of Volcanic and Hypabyssal Rocks	5	3.3.1 Temperature	42
1.4 Igneous Textures	5	3.3.2 Heat Capacity and Heat of Fusion	42
1.4.1 The Crystallization of Igneous Melts	5	3.3.3 Viscosity	43
1.4.2 Crystal Size	7	3.3.4 Density	43
1.4.3 Crystal Shape	9	3.4 Ascent of Magmas	44
1.5 Igneous Structures	10	3.5 Magmatic Differentiation	45
1.5.1 Structures in Volcanic Flows	10	3.5.1 Partial Melting	45
1.5.2 Structures in Pyroclastic Deposits	11	3.5.2 Crystallization Processes	45
1.5.3 Structures in Hypabyssal Rocks	14	3.5.3 Liquid-Liquid Fractionation	46
1.5.4 Structures in Plutonic Rocks	16	3.5.4 Assimilation	46
Summary	17	3.5.5 Magma Mixing	47
Questions and Problems	18	Summary	47
Further Reading	19	Questions and Problems	48
Note	19	Further Reading	49

An Introduction to Igneous Phase Diagrams	20	Chemistry of Igneous Rocks	50
2.1 Introduction	20	4.1 Introduction	50
2.2 The Phase Rule	21	4.2 Modal Mineralogy versus Normative Mineralogy	51
2.3 The Lever Rule	22	4.3 Variation Diagrams Based on Major Elements	51
2.4 Two-Component Systems Involving Melt	23	4.4 Major-Element Indices of Differentiation	54
2.4.1 Binary Systems with a Eutectic	23	4.4.1 Modified Alkali-Lime Index	54
2.4.2 Binary Systems with a Peritectic	26	4.4.2 Iron-Enrichment Index	57
2.4.3 Binary Systems with a Thermal Barrier	28	4.4.3 Aluminum-Saturation Index	58
2.4.4 Binary Systems with Solid Solution	29	4.4.4 Alkalinity Index	59
2.4.5 Binary Systems with Partial Solid Solution	30	4.4.5 Feldspathoid Silica-Saturation Index	59
2.5 Phase Diagrams of Ternary Systems	31	4.5 Identification of Differentiation Processes Using Trace Elements	59
2.5.1 The Ternary System CaAl ₂ Si ₂ O ₈ -CaMgSi ₂ O ₆ -Mg ₂ SiO ₄	32		
2.6 Implications for Petrology	34		

4.5.1 <i>Use of Trace Elements to Model Melting and Crystallization Processes</i>	60	7.2.2 <i>Refinements of the Ophiolite Model</i>	93
4.5.2 <i>Graphical Representations of Trace-Element Compositions</i>	62	7.3 Petrography and Geochemistry of Oceanic Magmatism	97
Summary	64	7.3.1 <i>Mid-Ocean Ridge Basalt</i>	97
Questions and Problems	64	7.3.2 <i>Off-Ridge Magmatism</i>	102
Further Reading	66	Summary	107
5		Questions and Problems	107
.....		Further Reading	108
Application of Stable and Radiogenic Isotopes in Petrology	67	8	
5.1 Introduction	67	
5.2 Stable-Isotope Geochemistry	68	Convergent-Margin Magmatism	109
5.2.1 <i>Stable-Isotope Geothermometry</i>	69	8.1 Introduction	109
5.2.2 <i>Stable-Isotope Tracers of Magmatic Processes</i>	69	8.2 Oceanic and Continental Arcs	110
5.3 Radiogenic Isotope Geochemistry	71	8.2.1 <i>Island Arc Magmatism</i>	110
5.3.1 <i>Geochronology</i>	72	8.2.2 <i>Continental Arc Magmatism</i>	110
5.3.2 <i>Isotopic Petrogenesis</i>	75	8.2.3 <i>Structure of Island and Continental Arcs</i>	112
Summary	78	8.2.4 <i>Examples of Island and Continental Arcs</i>	112
Questions and Problems	79	8.3 Petrographic Characteristics of Island and Continental Arc Rocks	116
Further Reading	81	8.3.1 <i>Petrography of Island Arc Rocks</i>	116
6		8.3.2 <i>Petrography of Continental Arc Rocks</i>	117
.....		8.4 Geochemical Characteristics of Convergent-Margin Magma Series	120
Basalts and Mantle Structure	82	8.4.1 <i>Comparison of Oceanic and Arc Differentiation Trends</i>	120
6.1 Introduction	82	8.4.2 <i>Comparison of Island and Continental Arc Magma Series</i>	121
6.2 Basalt Petrology	83	8.4.3 <i>Comparison of Oceanic and Continental Arc (Cordilleran) Plutonic Complexes</i>	123
6.2.1 <i>Classification</i>	83	8.4.4 <i>Geochemical and Isotopic Identification of Contrasting Processes Forming Segua and Mount Saint Helens</i>	124
6.2.2 <i>Chemistry and Petrography</i>	83	8.5 Magma Generation at Convergent Margins	125
6.3 Melt Generation from the Mantle	84	8.5.1 <i>Primary Arc Magma-Forming Processes</i>	125
6.3.1 <i>Mantle Composition</i>	84	8.5.2 <i>Evolution of Arc Magmas During Ascent Through the Crust</i>	125
6.3.2 <i>Crust and Mantle Structure</i>	84	Summary	127
6.3.3 <i>Mechanisms for Partial Melting of the Mantle</i>	85	Questions and Problems	128
6.3.4 <i>The Process of Mantle Melting</i>	86	Further Reading	129
6.3.5 <i>Origin of Tholeiitic versus Alkali Basalts</i>	86		
6.4 Environments where Magmas are Generated	87		
Summary	88		
Questions and Problems	88		
Further Reading	89		
Note	89		
7			
.....			
Oceanic Magmatism	90		
7.1 Introduction	90		
7.2 Petrology and Structure of the Oceanic Crust	92		
7.2.1 <i>Ophiolites as a Model of the Oceanic Crust</i>	92		

9		11	
Intracontinental Volcanism	130	Interpretation of Granitic Rocks	168
9.1 Introduction	130	11.1 Introduction	168
9.2 Continental Flood Basalt Provinces	131	11.2 Classification of Granitic Rocks	169
9.2.1 <i>The Columbia Plateau–Snake River Plain Province</i>	132	11.2.1 <i>Mineralogical Classification</i>	169
9.2.2 <i>Petrography and Chemistry of Continental Flood Basalts</i>	134	11.2.2 <i>Classification Based on Opaque Oxides</i>	169
9.2.3 <i>Models for the Generation of Continental Flood Basalts</i>	135	11.2.3 <i>Alphabetic Classification</i>	169
9.3 Bimodal Volcanism	135	11.2.4 <i>Geochemical Classification</i>	169
9.3.1 <i>Bimodal Volcanism in the Yellowstone–Snake River Plain Province</i>	135	11.3 Peraluminous Leucogranites	170
9.3.2 <i>Geochemistry of the Yellowstone–Snake River Plain Bimodal Suite</i>	136	11.3.1 <i>Himalayan Leucogranites</i>	172
9.3.3 <i>Models for the Generation of Bimodal Volcanism</i>	137	11.3.2 <i>Geochemistry of Peraluminous Leucogranites</i>	172
9.4 Alkaline Volcanism	139	11.4 Caledonian Granites	173
9.4.1 <i>Sodic Alkaline Magmatism of the East African Rift</i>	140	11.4.1 <i>The Etive Granite</i>	174
9.4.2 <i>Potassic Alkaline Volcanism</i>	142	11.4.2 <i>Geochemistry and Origin of Caledonian Granites</i>	175
9.5 Origin of the Chemical Diversity of Intracontinental Basaltic Magmas	144	11.5 Review of the Four Main Granite Types	176
Summary	145	Summary	181
Questions and Problems	146	Questions and Problems	181
Further Reading	146	Further Reading	181
10		12	
Intracontinental Plutonism	147	Introduction to Metamorphic Petrology	183
10.1 Introduction	147	12.1 Introduction	183
10.2 Layered Mafic Intrusions	149	12.2 Scope of Metamorphism	184
10.2.1 <i>The Bushveld Intrusion</i>	151	12.3 Types of Metamorphism	184
10.2.2 <i>Mineralogical Variation in LMIs</i>	151	12.3.1 <i>Regional Metamorphism</i>	184
10.2.3 <i>Granitic Rocks Associated with LMIs</i>	152	12.3.2 <i>Contact Metamorphism</i>	184
10.2.4 <i>Tectonic Environments of LMIs</i>	153	12.3.3 <i>Burial Metamorphism</i>	185
10.3 Anorthosites and Related Rocks	154	12.3.4 <i>Dynamic Metamorphism</i>	185
10.3.1 <i>Archean Anorthosites</i>	154	12.3.5 <i>Hydrothermal Metamorphism</i>	185
10.3.2 <i>Massif Anorthosites</i>	156	12.3.6 <i>Impact Metamorphism</i>	185
10.3.3 <i>Lunar Anorthosites</i>	159	12.4 Basic Goals of Metamorphic Petrology	185
10.4 Ferroan Granites	159	12.5 Identification of Protolith	186
10.4.1 <i>The Pikes Peak Batholith</i>	159	12.5.1 <i>Rocks of Clearly Sedimentary Parentage</i>	186
10.4.2 <i>Composition of Ferroan Granites</i>	160	12.5.2 <i>Rocks of Clearly Igneous Parentage</i>	187
10.5 Alkaline Complexes	161	12.5.3 <i>Rocks of Uncertain Parentage</i>	187
10.5.1 <i>Geology of the Ilimaussaq Intrusion</i>	161	12.6 Determination of Metamorphic Conditions	188
Summary	164	12.6.1 <i>Stability Range of Single Minerals</i>	188
Questions and Problems	166	12.6.2 <i>Stability of Mineral Assemblages</i>	188
Further Reading	166	12.6.3 <i>Metamorphic Facies</i>	188
		12.6.4 <i>Thermobarometry</i>	188

12.7 Metamorphic Textures	188		
12.7.1 <i>Primary Textures</i>	188		
12.7.2 <i>Metamorphic Textures</i>	190		
12.8 Naming a Metamorphic Rock	193		
Summary	193		
Questions and Problems	194		
Further Reading	195		
Note	195		
13			
.....			
Interpretation of Metamorphic Phase Diagrams	196		
13.1 Introduction	196		
13.2 A Little History	197		
13.3 Use of Chemographic Projections	197		
13.3.1 <i>Chemographic Projections in a Two-Component System</i>	198		
13.3.2 <i>Chemographic Projections in a Three-Component System</i>	199		
13.3.3 <i>Chemographic Projections in Systems with Four and More Components</i>	201		
Summary	202		
Questions and Problems	202		
Further Reading	205		
14			
.....			
Metamorphic Facies and the Metamorphism of Mafic Rocks	206		
14.1 Introduction	206		
14.2 Definition of Metamorphic Facies	207		
14.3 Facies of Regional Metamorphism	207		
14.3.1 <i>Greenschist Facies</i>	207		
14.3.2 <i>Blueschist Facies</i>	208		
14.3.3 <i>Amphibolite Facies</i>	208		
14.3.4 <i>Very Low-Temperature Metamorphism</i>	209		
14.3.5 <i>Granulite Facies</i>	210		
14.3.6 <i>Eclogite Facies</i>	211		
14.4 Facies of Contact Metamorphism	211		
14.5 Textural Changes during Metamorphism	211		
14.6 Mafic Mineral Assemblages at Increasing Temperature and Pressure	213		
14.6.1 <i>Relations at Very Low Temperatures</i>	214		
14.6.2 <i>Relations at Low Pressure with Increasing Temperature</i>	214		
14.6.3 <i>Relations at Low Temperature with Increasing Pressure</i>	215		
Summary	215		
Questions and Problems	215		
Further Reading	216		
15			
.....			
Metamorphism of Peridotitic Rocks	217		
15.1 Introduction	217		
15.2 The Process of Serpentinization	218		
15.3 Prograde Metamorphism of Serpentinite: Reactions in the System CaO–MgO–SiO ₂ –H ₂ O	218		
15.4 Role of Minor Components	222		
15.4.1 <i>Iron</i>	222		
15.4.2 <i>Aluminum</i>	224		
15.5 Metaperidotites and Metamorphic Facies	225		
15.6 Role of CO ₂ in Metamorphism of Peridotites	226		
15.7 Metasomatism of Peridotites	228		
15.8 Examples of Metaperidotites in the Field	229		
15.8.1 <i>Malenco Serpentinite</i>	229		
15.8.2 <i>Ingalls Peridotite</i>	230		
Summary	232		
Questions and Problems	232		
Further Reading	233		
16			
.....			
Metamorphism of Pelitic Rocks	234		
16.1 Introduction	234		
16.2 Chemographic Projections for Pelitic Systems	235		
16.2.1 <i>Chemographic Projections for Continuous Reactions</i>	235		
16.2.2 <i>AFM Projections for Pelitic Rocks</i>	237		
16.3 Progressive Metamorphism of Pelitic Rocks: Barrovian Metamorphism	238		
16.3.1 <i>The Protolith: The Mineralogy of Shale</i>	238		
16.3.2 <i>Low-Grade Metamorphism of Pelitic Rocks</i>	238		
16.3.3 <i>Barrovian Metamorphism of Pelitic Schists</i>	239		
16.4 Pressure–Temperature Conditions for Metamorphic Assemblages in Metapelitic Rocks	243		
16.4.1 <i>Metapelitic Assemblages and Metamorphic Facies</i>	243		
16.4.2 <i>Pressure Information from Metapelitic Rocks</i>	245		
Summary	248		
Questions and Problems	249		
Further Reading	252		

17

Metamorphism of Calcareous Rocks and the Role of Fluids in Metamorphism 253

- 17.1 Introduction 253
- 17.2 Metamorphism of Impure Dolomitic Marble 254
 - 17.2.1 *Stability of Metamorphic Assemblages in T-X Space* 255
 - 17.2.2 *Examples of How Mineral Assemblages Can Monitor Fluid Flow in Aureoles* 256
- 17.3 Buffering of Other Fluid Components 258
- 17.4 Buffering of pH 259
- Summary 262
- Questions and Problems 262
- Further Reading 263

18

Thermobarometry and the Conditions of Metamorphism 264

- 18.1 Introduction 264
- 18.2 Review of Thermodynamics 265
 - 18.2.1 *Free Energy* 265
 - 18.2.2 *Effect of Changes in Pressure and Temperature on ΔG* 265
 - 18.2.3 *Equilibrium Constant* 265
 - 18.2.4 *Activity-Composition Relations* 266
- 18.3 Thermobarometers 267
 - 18.3.1 *Geothermometry* 267
 - 18.3.2 *Geobarometry* 268
 - 18.3.3 *Thermobarometry* 269
 - 18.3.4 *Metamorphic Assemblage Diagrams (Pseudosections)* 270
- 18.4 Conditions of Metamorphism 273
 - 18.4.1 *P-T Conditions for the Metamorphic Facies* 273
 - 18.4.2 *Upper Temperature Limits to Metamorphism and Migmatites* 275
 - 18.4.3 *Upper Pressure Limit of Metamorphism* 276
- Summary 276
- Questions and Problems 277
- Further Reading 277

19

Regional Occurrence and Tectonic Significance of Metamorphosed Rocks 278

- 19.1 Introduction 278
- 19.2 Metamorphism in Continental Collisions 279

- 19.2.1 *Examples of Continental Collisions* 280

- 19.3 Metamorphism along Convergent Plate Margins 281

- 19.3.1 *Subduction-Zone Metamorphism* 281

- 19.3.2 *Metamorphism in Island Arcs* 282

- 19.3.3 *Metamorphism in Accretionary Prisms* 282

- 19.3.4 *Metamorphism in Continental Arcs* 282

- 19.4 Metamorphism in Rifting Terrains 284

- 19.5 Sea-Floor Metamorphism 285

- 19.6 Burial Metamorphism 287

- 19.7 Metamorphism in Archean Terrains 287

- 19.7.1 *Greenstone Belts* 289

- 19.7.2 *Gneiss Terrains* 289

- 19.7.3 *Tectonic Interpretation of Archean Metamorphic Belts* 290

- Summary 290

- Questions and Problems 291

- Further Reading 292

Appendix: Review of Mineralogy 293

- A.1 Introduction 293

- A.2 Leucocratic Rock-Forming Minerals 293

- A.2.1 *Quartz* 293

- A.2.2 *Feldspars and Feldspathoids* 294

- A.2.3 *Carbonates* 298

- A.3 Ferromagnesian Minerals 299

- A.3.1 *Olivine* 299

- A.3.2 *Pyroxenes* 299

- A.3.3 *Amphiboles* 302

- A.3.4 *Phyllosilicates* 305

- A.4 Aluminum-Excess Minerals 307

- A.4.1 *Aluminosilicates (Andalusite, Kyanite, and Sillimanite)* 307

- A.4.2 *Garnets* 308

- A.4.3 *Staurolite* 309

- A.4.4 *Cordierite* 309

- A.4.5 *Chloritoid* 309

- A.5 Calcium-Aluminum Silicates 309

- A.5.1 *Clinzoisite-Epidote* 309

- A.5.2 *Prehnite* 310

- A.5.3 *Pumpellyite* 310

- A.5.4 *Lawsonite* 310

- A.5.5 *Laumontite* 310

- A.6 Oxide, Sulfide, and Other Nominally Opaque Phases 310

- A.6.1 *Iron-Titanium Oxides (Magnetite and Ilmenite)* 310

- A.6.2 *Other Spinel Minerals* 311

A.6.3	<i>Iron Sulfides</i>	311	A.7.3	<i>Apatite</i>	312
A.6.4	<i>Graphite</i>	311	A.7.4	<i>Monazite</i>	312
A.6.5	<i>Rutile</i>	311		Summary	312
A.7	Accessory Minerals	311		Glossary	315
A.7.1	<i>Zircon</i>	312		References	325
A.7.2	<i>Titanite (or Sphene)</i>	312		Index	343
