

The Cambridge Handbook for the Anthropology of Ethics

The 'ethical turn' in anthropology has been one of the most vibrant developments in the discipline in the past quarter-century. It has fostered new dialogue between anthropology and philosophy, psychology, and theology and seen a wealth of theoretical innovation and influential ethnographic studies. This book brings together a global team of established and emerging leaders in the field and makes the results of this fast-growing body of diverse research available in one volume. Topics covered include: the philosophical and other intellectual sources of the ethical turn; inter-disciplinary dialogues; emerging conceptualizations of core aspects of ethical agency such as freedom, responsibility, and affect; and the diverse ways in which ethical thought and practice are institutionalized in social life, both intimate and institutional. Authoritative and cutting-edge, it is essential reading for researchers and students in anthropology, philosophy, psychology, and theology and will set the agenda for future research in the field.

JAMES LAIDLAW is William Wyse Professor of Social Anthropology at the University of Cambridge and Fellow of King's College. He is the author of *The Archetypal Actions of Ritual* (with Caroline Humphrey, 1994), *Riches and Renunciation* (1995), and *The Subject of Virtue* (2014), and the editor of *The Essential Edmund Leach* (with Stephen Hugh-Jones, 2000), *Ritual and Memory* (with Harvey Whitehouse, 2004), *Religion, Anthropology, and Cognitive Science* (with Harvey Whitehouse, 2007), and *Recovering the Human Subject* (with Barbara Bodenhorn and Martin Holbraad, 2018).
