Preface *page* ix

1 Outline, Notation, Preliminaries **1**
1.1 General Context 1
1.2 Timeline of Major Events 2
1.3 Notation and Conventions 3
1.4 Preliminaries 4
1.5 An Analogy to Fluid Dynamics: Particle Diffusion 4
1.6 Outline of This Book 6

2 Modern Theory of Fluid Dynamics **8**
2.1 Classical Fluid Dynamics in Equilibrium 8
2.2 Fluids Near Equilibrium 16
2.3 Out of Equilibrium Fluid Dynamics 29
2.4 Hydrodynamic Collective Modes 40
2.5 Resummed Second-Order Hydrodynamics 45
2.6 Fluctuating Hydrodynamics 52

3 Microscopic Theory Background **59**
3.1 Kinetic Theory Flyby 59
3.2 Gauge/Gravity Duality Flyby 74
3.3 Finite Temperature QFT Flyby 83
3.4 Lattice Gauge Theory Flyby 87
3.5 Regime of Applicability of Microscopic Approaches 93

4 Simulating Relativistic Nuclear Collisions **96**
4.1 Brief Introduction to Relativistic Nuclear Collisions 97
4.2 Overview of Simulation Components 98
4.3 Initial Condition Models 99
4.4 The Glauber Model for Nuclear Collisions 104
4.5 Theory of Collisions at Extremely Weak Coupling 107
4.6 Theory of Collisions at Extremely Strong Coupling 116
4.7 Initial State Eccentricities 121
4.8 Numerical Algorithms for Fluid Dynamics 123
4.9 Hadronization and Hadronic Cascade 130
4.10 Observables and Event Averaging 135
4.11 Physics Interpretation of Observables in a Simplified Model 140

Paul Romatschke , Ulrike Romatschke
Table of Contents
More Information

5 Comparison to Experimental Data **144**
5.1 Applicability of Hydrodynamic Simulations 144
5.2 Model Simulation Package: superSONIC 146
5.3 Heavy-Ion Collisions 148
5.4 Heavy-on-Light Ion Collisions 152
5.5 Proton–Proton Collisions 154

6 Conclusions **157**
6.1 Relativistic Fluid Dynamics Theory in the Twenty-First Century 157
6.2 Fluid Dynamics Simulations of Relativistic Nuclear Collisions 158
6.3 Challenges and Open Problems 159

Appendix A Relativistic Velocities **162**

Appendix B Riemann, Ricci, Christoffels, and All That **163**

Appendix C Coordinate Systems Used **168**
C.1 Coordinate Transformations 168
C.2 Minkowski Space-Time 169
C.3 Light-Cone Coordinates $x^{\pm}$ 169
C.4 Milne Coordinates 170
