## BIOETHICS AND BIOPOLITICS IN ISRAEL

Although the “Israeli case” of bioethics has been well documented, this book offers a novel understanding of Israeli bioethics that is a milestone in the comparative literature of bioethics. Bringing together a range of experts, this book’s interdisciplinary structure employs a contemporary, sociopolitical approach to bioethics issues, with an emphasis on empirical analysis, that will appeal not only to scholars of bioethics but also to students of law, medicine, humanities, and social sciences around the world. Its focus on the development of bioethics in Israel makes it especially relevant to scholars of Israeli society – both in and out of Israel – as well as medical practitioners and health policy-makers in Israel.

Hagai Boas has published on brain death, organ transplantations, and bioethics. Since 2012, he has been the program director of the Edmond J. Safra Center for Ethics at Tel Aviv University. Beginning in October 2017, he will be the head of the Science and Technology section at the Van Leer Jerusalem Institute.

Yael Hashiloni-Dolev is a sociologist of health and illness, a professor at the school of government and society at the Academic College of Tel Aviv-Yaffo, and a member of Israel’s National Bioethics Council. Her areas of interest include new reproductive technologies, genetics, gender, bioethics, contemporary parenthood, and posthumous reproduction. She has authored two books: *A Life (Un)Worthy of Living: Reproductive Genetics in Israel and Germany* (2007) and *The Fertility Revolution* (2013, in Hebrew).

Nadav Davidovitch is an epidemiologist and public health physician. He is a full professor and director, school of public health, Ben-Gurion University of the Negev. His current research deals with health policy, health inequities, health and immigration, environmental health, and public health history and ethics.

Dani Filc is a professor at the Department of Politics and Government, Ben-Gurion University. He is the author of *Hegemony and Populism in Israel* (2006, in Hebrew), *Circles of Exclusion: The Politics of Health-Care in Israel* (2009), and *The Political Right in Israel* (2013).

Shai J. Lavi is a professor of law at Tel-Aviv University, where he is also the director of the Edmond J. Safra Center for Ethics. He is also the executive director of the Van Leer Jerusalem Institute. His book *The Modern Art of Dying: A History of Euthanasia in the United States* won the 2006 Distinguished Book Award in sociology of law from the American Sociological Association.
