Contents

How to use HOTmaths with this book  page ix

Chapter 1 Teaching mathematics today with tomorrow in mind 1
  in the primary setting 1
  The TPACK framework 4
  Summary of chapters 9
  How to use this book 11
  Websites for exploration 12

Chapter 2 Exploring early number concepts 13
  Early number concepts 15
  Number frameworks 16
  Linking with curriculum documents 17
  Early number activities and strategies 21
  Extending counting beyond 10 23
  Linking numbers with quantities 26
  Subitising 26
  Early operations with number 33
  Mental computation strategies 35
  Drill and practice 37
  Alternatives to traditional drill and practice 39
  Further reading/websites for exploration 44

Chapter 3 Exploring measurement 46
  Learning sequence for measurement 47
  Measurement topics 51
  Measuring with non-standard units 65
  Measurement misconceptions and difficulties 67
  Extending measurement concepts into older years 74
  Reflection 81
  Websites for exploration 81
## Table of Contents

**Chapter 4 Exploring geometry**  
Geometrical concepts 83  
Taking geometry outside the classroom 85  
Theoretical framework 86  
Geometry in the primary classroom 92  
The van Hiele teaching phases 112  
Reflection 119  
Websites for exploration 120

**Chapter 5 Exploring whole number computation**  
Operations with whole numbers 123  
A word about calculators 133  
Drill and practice 135  
Reflection 137  
Further reading/websites for exploration 137

**Chapter 6 Part-whole numbers and proportional reasoning**  
Some background 142  
Proportional reasoning 153  
Reflection 157  
Further reading 157

**Chapter 7 Exploring patterns and algebra**  
Linking with curriculum 160  
Pattern and structure 161  
Developing an understanding of relationships 168  
Equals and equivalence 170  
Generalisation in upper primary 178  
Reflection 187  
Websites for exploration 188

**Chapter 8 Exploring data and statistics**  
The importance of understanding statistics 190  
Asking questions (problem) 193  
Collecting and recording data (plan, data) 194  
Analysing and representing data (analyse) 200  
Telling a story from the data (conclusions) 209  
Using data in social contexts 212  
Reflection 213  
Websites for exploration 214

**Chapter 9 Exploring chance and probability**  
Why is probability important? 216  
Understanding probability 217  
Early primary years 220
Middle primary years 222
Upper primary years 226
Representing probability 234
Reflection 237
Websites for exploration 237

**Chapter 10 Capitalising on assessment for, of and as learning** 239
- Assessment 240
- Assessment for learning 241
- Quality of student responses 246
- National testing 254
- Online assessment item banks 262
- Assessment as learning 265
- Reflection 265
- Websites for exploration 266

**Chapter 11 Capitalising on ICT in the mathematics classroom** 267
- Supporting students’ learning in technology 270
- Considering teacher knowledge 271
- Developing an understanding of place value 271
- Other suggestions for capitalising on ICT in the classroom 276
- HOTmaths as a one-stop shop 278
- Capitalising on ICT through an integrated unit 283
- Pedagogical commentary 291
- Reflection 293
- Websites for exploration 294

**Chapter 12 Diversity in the primary mathematics classroom** 295
- Teachers’ beliefs 298
- Children with physical disabilities 299
- Children with intellectual disabilities 305
- Children with social, emotional and behavioural disabilities 309
- Multicultural classrooms 311
- Children who are gifted and talented 313
- Reflection 314
- Further reading/websites for exploration 315

**Chapter 13 Surviving as an ‘out of field’ teacher of mathematics** 316
- Shortage of secondary mathematics teachers and associated issues 317
- Secondary lesson structures 322
- Issues to think about in the secondary context within each strand 328
- Sample secondary sequence 331
- Reflection 336
- Websites for exploration 337
# Table of Contents

## Chapter 14 Teaching mathematics beyond the urban areas
- Rural and remote areas 339
- Being flexible 340
- Considering classroom structures 346
- National testing 350
- Resourcing 351
- Reflection 357
- Websites for exploration 358

## Chapter 15 Planning and sustainability in the mathematics classroom
- The TPACK framework 360
- TPACK in the mathematics classroom 362
- Planning for teaching mathematics with technology 367
- Leading the teaching of ICT within your school 369
- Professional reading and ICT viewing 374
- Website evaluation 376
- Collating resources 377
- Involving the community 378
- Leadership, ICT and change 380
- Reflection 381
- Websites for exploration 381
