

INDEX

- Annuities, annuities-certain**, 32; life, 9–11, 26–29, 32; increasing life, 32; temporary life, 32, 33
Approximations, 1, 12, 13, 20, 22, 23, 28, 29
Bertelsen, N. P., 19
Biometric functions, 2–9; e_x , 4–8, 31; l_x , 3–11, 23, 26; μ_x , 2–11, 23, 29, 33; p_x , 3–11; q_x , 3–11
Bortkiewicz, L. v., 32
Bruns, H., 37
Charlier, C. V. L., 37–39
Compatibility of frequency-constants, 19
Continuous functions, 35, 38–40, 42, 47
Contradictions, 1, 4, 15, 16, 19, 20
Convergence, 26, 39
Cramér, H., 48
Derivates of l_x , 23, 26; D_x , 26; normal error-function, 38; $\phi(x)$, 45–47
Determination of constants in frequency-functions, 15–17, 20, 39, 44–47
Development in a series, 37–39
Difference table of $\sin \frac{x}{10}$, 21
Differences of Poisson's frequency-function, 38; $\phi(x)$, 44–47
Discontinuous functions, 35, 40, 42, 43
Divergence, of moments of Charlier's function, 39
Edgeworth, F. Y., 37, 48
Elderton, W. P., 35, 41
Endowment assurances, policy values of, 33
Equivalence, of various classes of frequency-constants, 12, 14, 42; moments to observations, 12
Errors, 7, 28; Gauss' Law of, 15, 47; normal error-function, 47; theory of, 7; mean, 15
Euler, 26
Expectation of life, 4–8, 31; death, 3; mathematical, 3, 12, 13, 18
Factorial moments, 41, 42, 47
Fisher, R. A., 18
Force of mortality, 2–11, 23, 31–33
Free policy, in the case of a pure endowment, 34
Frequency-constants, 11–20
Frequency-functions, 2, 15, 20, 35–48
Friedli, W., 28
Functions, discontinuous, 35, 40, 42, 43; gamma, 37; generating, 24, 40; monotonic, 3; non-decreasing, 4, 5, 7, 33; non-increasing, 5, 29, 33; positive, 29; undefined, 22
Gamma functions, 37
Gauss, 12, 13, 15–17, 20, 38, 40
Generating functions, 24, 40
Graduation, 1, 8, 22, 39
Gumbel, E. J., 32
Imaginary values of observations, 19; constants characterizing observations, 37; frequency-functions, 18
Increasing life-annuities, 32
Inequalities, 1, 4–10, 25–34; a general proposition, 29, 30; between moments, 31; between integrals, 30
Infinite durations, 7
Integrals, repeated, 3; inequalities between, 30
Intercalation, 22, 23
Interpolation, 1, 8, 22, 23
Least squares, method of, 15
Life-annuities, 9–11, 26–28, 32, 33
Life-assurances, equal policy values of, 9
Limits, 2, 4, 6, 10, 12, 22, 23, 26, 28, 32
Makeham's formula, 6, 8, 9, 11, 23, 26
Mathematical expectation, 3, 12, 18
Maxima and minima of frequency-functions, 48
Mean, 11, 47; error, 15; theorem of mean value, 27; weighted, 29
Moments, 3, 11–19, 31, 41, 46
Monotonic functions, 3
Mortality Tables, $O^{M(s)}$ table, 6, 8, 28, 29; H^M table, 11; producing the same policy values, 9

Cambridge University Press

978-1-316-60191-4 - Some Recent Researches in the Theory of Statistics and Actuarial Science

INDEX

- Non-decreasing functions, 4, 5, 7, 33
 Non-increasing functions, 5, 29, 33
 Notation for frequency-constants, 49
- “Oldest age,” doctrine of, 6
- Paid-up policies, in the case of a pure endowment, 34
 Pearson, Karl, 32, 35, 36, 37, 40, 48
 Poisson, 38
 Policy values of endowment assurances, 33; different mortality tables producing the same, 9
 Polynomials $G_n(\xi, \theta)$, 24–27
 Positive functions, 29
 Presumptive values of frequency-constants, 11–20
 Probabilities, 6, 7, 11, 20, 39, 40; of dying, 3; of surviving, 3
 Pure endowments, paid-up policies in the case of, 34
- Remainder term, 23, 26–29, 32
- Semi-invariants, 11, 14, 19, 41, 43, 47
 Series: *A*-series, 38–48; *B*-series, 38–48
 Sheppard, W. F., 41
 Significant figures, 8
 Smoothness, 8
 Standard deviation, 14, 18, 19
 Steffensen, J. F., 2, 16, 22, 23, 29, 31, 39, 40, 41, 44
 Symmetrical functions of observations, 11
- Table of $\sin \frac{x}{10}$, 21
 Taylor’s theorem, 24
 Tchebychef, 30
 Thiele, T. N., 12, 14, 20, 37
 True values, of frequency-constants, 12
 Tschuprow, A. A., 18, 20
- Undefined functions, 22
 Weighted mean, 29
