BACKWARDNESS IN READING
BACKWARDNESS IN READING

A

STUDY OF ITS NATURE

AND ORIGIN

BY

M. D. VERNON, M.A., Sc.D.

Professor of Psychology in the
University of Reading

CAMBRIDGE

AT THE UNIVERSITY PRESS

1960

I INTRODUCTION  1

II VISUAL PERCEPTION IN READING  8
  (1) The development of visual perception in children  8
  (2) The visual perception of printed forms  20

III AUDITORY PERCEPTION IN READING  31
  (1) The development of speech and the hearing of speech  31
  (2) The understanding of word meanings  36
  (3) The phonetic analysis of words  38

IV THE NATURE OF READING DISABILITY  46
  (1) The beginning of disability  46
  (2) Visual perception in the backward reader  48
  (3) Auditory perception in the backward reader  56
  (4) Defects of speech and language in backward readers  63
  (5) Cognitive difficulties of the backward reader  70

V INNATE FACTORS AS CAUSES OF DISABILITY IN READING  75
  (1) Intelligence  75
  (2) Congenital word blindness  78
  (3) Cerebral dominance  81
  (4) Sex differentiation  110
  (5) Conclusions  115

3. Reproduction of simple shapes  16
   Wood, L. and Shulman, E. (1940), *J. Educ. Psychol.* 31,
   592.

4. Silhouettes resembling word outlines  17
   Davidson, H. P. (1931), *Genet. Psychol. Monogr.* 9, 169,
   170, 171, 172.

5. Reversible figures  17

6. Reversible and irreversible figures  18
   Newson, E. (1955), *The Development of Line Figure Dis-
   crimination in Pre-school Children.*

7. Number of children recognizing a given number of
   words after 2, 4 and 7 months learning to read  46

8. Analysis of figures  49

9. Sensory stimulation occurring in perception of
   apparent movement with near and far fixation  90
   49, 453.

10. Distribution of good and poor readers among
    11-year-old children in various types of school  152
ACKNOWLEDGEMENTS

I wish to acknowledge with thanks the help which has been given me in studying the problem of reading backwardness: by Mrs Scott Blair, who drew my attention to the urgency of the problem, and assisted me in testing backward readers and in obtaining supplementary information about them; by the Chief Education Officer of Reading County Borough, who gave me permission to work in a Reading school; by the Head Teacher of the school, who was so helpful in making the necessary arrangements; by the staff of the Berkshire Child Guidance Clinic, who also gave me facilities for testing; and by the children themselves, who were always co-operative and willing. I should also like to thank Professor Zangwill for advising me and discussing the problem with me.

Acknowledgement for permission to reproduce figures is made to the following: Dr Lauretta Bender, the American Orthopsychiatric Association and the George Benda Publishing Company for Fig. 1; Archives de Psychologie for Fig. 2; the Journal of Educational Psychology for Figs. 3 and 5; the Journal Press for Fig. 4; Mrs E. Newson for Fig. 6; the American Journal of Psychology for Fig. 9.

Acknowledgement is also made for the tabular data quoted in the book.
