

Index

THE NUMBERS REFER TO PAGES

- abscissa, 16, 106
 absolute measure, 44, 106
 age-specific death-rate, 83, 85, 106
 arbitrary origin, 23, 40, 79
 arithmetic mean, 23, 29, 30, 106
 array of points, 50
 averages, 28, 106
- bar diagrams, 87
 birth-rate, 13, 106
 bivariate distribution, 46, 107
- central tendency, 106
 circular diagrams, 87
 coefficient of correlation, 56, 106
 coefficient of rank correlation, 62, 106
 coefficient of regression, 49, 106
 coefficient of variation, 44, 106
 composite price relative, 79
 continuous variation, 2, 106
 corrected death-rate, 83, 85, 106
 correlation, 45, 56, 62
 correlation by ranks, 62, 106
 correlation coefficient, 56, 106
 cost-of-living index, 80
 covariance, 56
 crude death-rate, 82, 106
 cumulative frequency, 15
 cyclical variations, 75
- dependent variable, 51
 direct correlation, 46
 discrete variation, 2, 106
 dispersion, 32, 42
- four-quarterly moving averages, 66
 frequency curve, 5
 frequency distribution, 1
 frequency polygon, 3
- Galton graph, 56
 general trend, 66, 74
 geometric mean, 30, 106
- harmonic mean, 30, 107
- histogram, 1
 historigram, 66
- ideograph, 90
 independent variable, 51
 index numbers, 79
 index of retail prices, 80
 infant mortality, 13, 107
 interim index of retail prices, 80
 interpercentile range, 35
 inverse correlation, 48
- J*-type distribution, 9
- line of regression, 49
 lower quartile, 19, 107
- mean, 23, 29, 30, 107
 mean deviation, 36, 107
 mean of an array, 50
 median, 18, 19, 107
 mid-interval values, 25
 minimum values of correlation coefficient, 58
 modal class (or group), 2
 mode (or norm), 1, 29, 107
 mode, determination of, 10, 30
 modulus, 36, 107
 moving averages, 66
- negative skewness, 6, 9, 107
 normal frequency curve, 5, 9, 107
- ogive, 15, 107
 ordinate, 16, 107
- parameters, 107
 percentage relative, 78
 percentiles, 17, 107
 picturegram (or pictogram), 86
 pie diagrams, 90
 positive skewness, 6, 10, 107
 price index, 79
 price relative, 78
 product-moment, 57

INDEX

- quality control, 92
 quartile deviation, 35, 107
 quartiles, 19, 108
 questionnaires, 95
 quota sampling, 94
- random sample, 92, 93
 range, 32, 34
 rank correlation, 62, 106
 rectangular distribution, 7
 regression coefficient, 49, 106
 regression line, 49
 relative measure, 44, 108
 reverse-*J* type distribution, 9
- sampling, 92
 scatter diagram, 46
 seasonal variation, 66, 75
 second moment, 57
 semi-interquartile range, 35, 107
 seven-day moving average, 70
 sigma Σ , 26
 skewed distribution, 6, 107
- skewness, negative, 6, 9, 107
 skewness, positive, 6, 10, 107
 Spearman, 62
 special variations, 75
 standard age distribution, 83
 standard deviation, 38, 108
 standardized death-rate, 82, 108
- ten-yearly moving average, 70
 time series, 66, 74
 trend, 66
 twelve-monthly moving average, 69
- unequal class intervals, 11, 28
 upper quartile, 19, 108
U-type distribution, 14
- variability, 32
 variance, 43
 variation, coefficient of, 44, 106
- weighted average, 78
 working zero, 23
