

## Contents

<i>Preface</i>	<i>page</i>	ix
<i>How to use this book</i>		x
<b>1 Paying for parking</b>		1
1.1 The problem		1
1.2 Coprime values		1
1.3 Which charges require change?		2
1.4 Which charges cannot be paid?		4
1.5 Three denominations of coins		6
<b>2 Lengths and angles</b>		7
2.1 The problem		7
2.2 A generalisation		9
2.3 Another generalisation		10
2.4 Diophantine equations		12
2.5 The value of $\pi$		14
<b>3 Magic squares</b>		17
3.1 Magic squares		17
3.2 The space of $3 \times 3$ magic squares		19
3.3 The space of $4 \times 4$ magic squares		21
3.4 The dimension of the space of magic squares		22
3.5 Lagrange's interpolation formula		24
<b>4 Intersecting chords</b>		26
4.1 Dividing a disc by chords		26
4.2 The recurrence relation for $R_n$		27
4.3 Lagrange's interpolation formula		29

4.4	Euler's formula	31
4.5	Similar problems	32
<b>5</b>	<b>Crossing squares</b>	<b>34</b>
5.1	The problem	34
5.2	Lattice points on the diagonal $D$	35
5.3	The general solution	36
5.4	An alternative approach	37
5.5	A combinatorial proof	38
5.6	The problem in three dimensions	39
<b>6</b>	<b>Repeated vector products</b>	<b>42</b>
6.1	The problem	42
6.2	Vector products	42
6.3	A geometric approach	43
6.4	An algebraic approach	44
6.5	Quaternions	46
<b>7</b>	<b>A rolling disc</b>	<b>48</b>
7.1	A disc rolling in a tray	48
7.2	One circuit of the tray	49
7.3	Periodic motion	50
7.4	Non-periodic motion	51
<b>8</b>	<b>Sums of powers of digits</b>	<b>54</b>
8.1	The sum of the digits	54
8.2	The sum of the squares of the digits	56
8.3	A general result	58
8.4	Working in base $B$	58
8.5	The fixed points of $f$ in base $B$	60
<b>9</b>	<b>The metric dimension</b>	<b>63</b>
9.1	A problem in robotics	63
9.2	The metric dimension of metric spaces	64
9.3	Bisectors	66
9.4	Cubes and hypercubes	68
9.5	Linear equations	70
9.6	A lower bound for $\beta(V^n)$	72
<b>10</b>	<b>Primes and irreducible elements</b>	<b>73</b>
10.1	Primes and the integers	73

<i>Contents</i>	vii
10.2 Primes and units in a ring	73
10.3 Gaussian integers	75
10.4 Irreducible matrices	76
10.5 Irreducible polynomials	78
<b>11 The symmetries of a quadrilateral</b>	<b>81</b>
11.1 The problem	81
11.2 Quadrilaterals	82
11.3 Symmetries	82
11.4 Plane quadrilaterals	83
11.5 Quadrilaterals in $\mathbb{R}^3$	86
<b>12 Removing a vertex</b>	<b>90</b>
12.1 Removing the vertex of a cube	90
12.2 Two geometric solutions to Problem 12.1	91
12.3 An analytic solution	93
12.4 A generalisation	93
12.5 More general tetrahedra	95
<b>13 Squares within squares</b>	<b>96</b>
13.1 Squares on a geoboard	96
13.2 The solutions	96
13.3 Areas of squares on a geoboard	98
13.4 Areas of polygons on a geoboard	98
13.5 Pick's Theorem	100
13.6 Higher dimensions	102
13.7 Pick's Theorem in higher dimensions	103
<b>14 Catalan numbers</b>	<b>104</b>
14.1 Introduction	104
14.2 Binary operations	105
14.3 Paths joining lattice points	106
14.4 The number of positive paths on $[0, 2n]$	108
14.5 Photographs	110
14.6 An explicit formula for $C_n$	111
14.7 Why is $0! = 1$	113
<i>References</i>	115
<i>Index</i>	116
