ELEMENTARY TRIGONOMETRY

CHAPTER I

Definitions	1
Negative Angles	4
Relations between the Ratios	4
Identities	5
Magnitude of Angles. Degrees	6
Magnitude of Angles. Radians	6
Periodicity of the Trigonometrical Ratios	7
Ratios of $(\frac{1}{2}\pi \pm \alpha)$	9
Inverse Functions	10
Projection	11
Addition Theorems	12
Sum and Difference Formulae	14
Double Angles and Half Angles	14
<i>Examples 1</i>	18

FINITE DIFFERENCES

CHAPTER II

DEFINITIONS AND FUNDAMENTAL FORMULAE

Definitions	22
Difference Table	23
Symbolic Notation	24
Symbols of Operation	27
Separation of Symbols	36
Factorial Notation	38
Detached Coefficients	40
<i>Examples 2</i>	41

CHAPTER III

INTERPOLATION FOR EQUAL INTERVALS

	PAGE
Definition of Interpolation	44
Newton's Formula	47
Applications of Newton's Formula	48
Change of Origin	49
Subdivision of Intervals	51
<i>Examples 3</i>	53

CHAPTER IV

INTERPOLATION FOR UNEQUAL INTERVALS

Divided Differences	57
Newton's Divided Difference Formula	58
Lagrange's Interpolation Formula	62
<i>Examples 4</i>	65

CHAPTER V

CENTRAL DIFFERENCES

Gauss's Formula	68
Stirling's Formula	70
Bessel's Formula	71
Everett's Formula	72
Sheppard's Rules	73
Relative Accuracy of the Formulae	76
<i>Examples 5</i>	80

CHAPTER VI

INVERSE INTERPOLATION

Underlying Principles	84
Successive Approximation	89
Elimination of Third Differences	90
<i>Examples 6</i>	95

CHAPTER VII

SUMMATION

Definitions	97
Methods of Summation	98
Summation by Parts	102

CONTENTS	vii
	PAGE
Relation between the Operators Σ and Δ	104
Other Uses of the Symbol Σ	105
Application of the Relation between Σ and Δ	106
Series in General	108
<i>Examples 7</i>	110

CHAPTER VIII

MISCELLANEOUS THEOREMS

Differences of Zero	114
The Compound Function $u_x v_x$	116
Functions of two Variables	118
Central Difference Formulae: Fraser's Diagrams	123
Further Applications of the Calculus of Operations	126
“Summation n ”	128
<i>Examples 8</i>	131

FUNCTIONS AND LIMITS

CHAPTER IX

Algebraic Functions	134
Transcendental Functions	135
Rates	135
Continuous Functions	139
Limits	140
Limit of a Sequence	143
The Function $\{(x+h)^n - x^n\}/h$	144
The Function $(1 + 1/n)^n$	145
Asymptotes	147
<i>Examples 9</i>	148

DIFFERENTIAL CALCULUS

CHAPTER X

DEFINITIONS; STANDARD FORMS; SUCCESSIVE
DIFFERENTIATION

Definitions	150
Geometrical Interpretation	151
Standard Forms: Algebraic	156
Standard Forms: Trigonometrical	158

viii	CONTENTS	PAGE
Miscellaneous Examples of Differentiation		159
Successive Differentiation		162
Leibnitz's Theorem		164
<i>Examples 10</i>		167
<i>CHAPTER XI</i>		
EXPANSIONS		
Rolle's Theorem		174
Mean Value Theorem		176
Taylor's Theorem		177
Examples on the above Theorems		180
The Series $x/(e^x - 1)$		183
Differentiation of a Known Series		185
Trigonometrical Series		186
<i>Examples 11</i>		187
<i>CHAPTER XII</i>		
MAXIMA AND MINIMA		
Maxima and Minima		190
Examples on Maxima and Minima		194
Points of Inflexion		196
Miscellaneous Applications		199
<i>Examples 12</i>		202
<i>CHAPTER XIII</i>		
MISCELLANEOUS THEOREMS		
Indeterminate Forms		206
Partial Differentiation		209
Euler's Theorem		212
Relation between the Operators d/dx and Δ		213
Osculatory Interpolation		216
<i>Examples 13</i>		220
INTEGRAL CALCULUS		
<i>CHAPTER XIV</i>		
DEFINITIONS AND STANDARD FORMS		
Definitions		223
Geometrical Interpretation of an Integral		225
Standard Forms		228
<i>Examples 14</i>		233

CONTENTS

ix

CHAPTER XV

MORE DIFFICULT INTEGRALS; INTEGRATION
BY PARTS

	PAGE
Method of Substitution	235
Further Examples of Substitution	239
Integrals involving Simple Irrational Expressions	246
Integration by Parts	249
Reduction Formulae	252
<i>Examples 15</i>	256

CHAPTER XVI

DEFINITE INTEGRALS; AREAS; MISCELLANEOUS
THEOREMS

Definite Integrals	262
Product of two Functions	267
The Functions $x^n e^{-x}$ and $x^{n-1} (1-x)^{m-1}$	268
Areas of Curves	271
Differentiation under the Integral Sign	274
Double Integrals	277
<i>Examples 16</i>	280

CHAPTER XVII

APPROXIMATE INTEGRATION

Simpson's Rule	286
Change of Unit	289
Change of Origin	290
The "three-eighths" Rule	293
Weddle's Rule	294
Hardy's Formulae	295
Practical Applications of the Formulae	296
The Euler-Maclaurin Expansion	299
Lubbock's Formula	302
Woolhouse's Formula	304
Other Formulae for Approximate Integration	306
<i>Examples 17</i>	309

CONTENTS

PROBABILITY

CHAPTER XVIII

	PAGE
Numerical Definitions of Probability.	314
The Addition Rule	316
Illustrative Examples	317
The Multiplication Rule	319
Illustrative Examples	321
Most Probable Value	328
Expectation and Probable Value	331
The Method of Induction.	333
Miscellaneous Examples on Probability	336
<i>Examples 18</i>	341

CHAPTER XIX

MEAN VALUE. THE APPLICATION OF THE CALCULUS
TO THE SOLUTION OF QUESTIONS IN PROBABILITY

Mean Value	354
Application of the Calculus to Mean Value Problems	355
The Use of Double Integrals	357
Application of the Calculus to Probability.	360
Geometrical Solutions	364
<i>Examples 19</i>	368
<i>Miscellaneous Examples</i>	371
<i>Answers to the Examples</i>	383
<i>Index</i>	397
