CONTENTS

Preface .......................................................... ix

Materials Research Society Symposium Proceedings ................ xi

ADVANCED FLASH AND NANOFLOATING MEMORIES

* From SOI 1T-DRAMs to Unified Memory Concepts ................. 3
  Sorin Cristoloveanu and Maryline Bawedin

High-k Dielectrics for Hybrid Floating Gate Memory Applications .... 15
  J.G. Lisoni, L. Breuil, P. Blomme, and J. Van Houdt

Nonvolatile Memory Characteristics of Nanocrystalline
  Molybdenum Oxide Embedded High-k Film - Device Performance
  and Light Wavelength Effects ....................................... 21
  Yue Kuo, Xi Liu, Chia-Han Yang, and Chi-Chou Lin

GaN Quantum Dots as Charge Storage Elements for Memory
  Devices .................................................................. 29
  P. Dimitrakis, P. Normand, C. Bonafos,
  E. Papadomanolaki, and E. Iliopoulos

SONOS Memory Devices with Ion Beam Modified Nitride Layers .... 35
  D. Simatos, P. Dimitrakis, V. Ioannou-Sougleridis,
  P. Normand, K. Giannakopoulos, B. Pecassou,
  and G. BenAssayag

High-density Co/Al2O3 Core-shell Nanocrystal Memory ............... 41
  Huimei Zhou, Zonglin Li, Jian Huang, and Jianlin Liu

FERROELECTRIC AND MAGNETORESISTIVE MEMORIES

Electronic Transport in Organic Ferroelectric Gate Field-Effect
  Transistors with ZnO Channel ....................................... 49
  Hiroaki Yamada, Takeshi Yoshimura,
  and Norifumi Fujimura

*Invited Paper
Identification of the Location of Conductive Filaments Formed in Pt/NiO/Pt Resistive Switching Cells and Investigation on Their Properties ........................................... 159
Tatsuya Iwata, Yusuke Nishi, and Tsunenobu Kimoto

High Total-Dose Proton Radiation Tolerance in TiN/HfO2/TiN ReRAM Devices ........................................... 165
Xiaoli He and Robert E. Geer

Time Voltage Dependency in Resistance Switching TiO2 ............ 171
Christian Nauenheim, Dominique Drouin, Rainer Waser, and Andreas Ruediger

Improvement of RRAM Device Performance Through On-Chip Resistors.......................................... 177
Siddharth Gaba, Shinhyun Choi, Patrick Sheridan, Ting Chang, Yuchao Yang, and Wei Lu

First-principles Investigation of the Conductive Filament Configuration in Rutile TiO2-x ReRAM ........................ 183
Liang Zhao, Seong-Geon Park, Blanka Magyari-Köpe, and Yoshio Nishi

Electric-Field-Induced Al2O3/3C-SiC Resistance Memory ............. 189
Nobuo Yamaguchi and Yoshiyuki Suda

Author Index ........................................... 195

Subject Index ........................................... 197
