

Journal of Helminthology

Journal of Helminthology provides an international vehicle for the publication of original papers and review articles on all aspects of pure and applied helminthology. The journal publishes papers on helminth parasites of environmental health, medical or veterinary importance. Research papers on helminths in wildlife hosts including plant and insect parasites will also be welcome. Taxonomic contributions will be acceptable if they contribute to the systematics of a group, particularly those studies that employ biochemical or molecular biological techniques.

Page format

The Journal is printed in a two-column format (column width of 80mm) with a text area of 170x225mm.

Text

Papers should be single column with double line spacing and ample margins (at least 1.5cm) on each side in a clear, legible font. Italics should be used for taxonomic nomenclature and bold for headings. Standard abbreviations (e.g. fig. and figs.) and metric units must be used. Use British rather than American spellings. Use 'z' rather than 's' spellings in words with 'ize'. A short title should be provided as a running head.

Abstract

Each paper must commence with an accurate, informative abstract in one paragraph without reference to text or figures that is complete in itself. It should not exceed 250 words.

Tables

Tables should be reduced to the simplest form and present only essential data. They should be submitted on separate pages at the end of the article, or, preferably, as separate files. Captions should be typed on a separate sheet. The use of vertical rules should be avoided.

Line drawings

These should be sharp and clear and lettering and lines should be of sufficient thickness and quality to allow for reduction. Computer generated figures and graphs should not contain grey tints or complicated hatching. All figures should be uploaded as separate files or a zip file in a format suitable for printing.

Half-tone photographs

Black and white half-tone photographs are acceptable where they are a real contribution to the text.

Voucher specimens

The deposition of voucher specimens should be considered where appropriate.

References

References must be based on the name and year system, provide full journal titles and conform to the following styles:

Journal

Molloy, S., Holland, C. & O'Regan, M. (1995) Population biology of *Pomphorhynchus laevis* in brown trout from two lakes in the west of Ireland. *Journal of Helminthology* **69**, 229-235.

Book

Bailey, N.T.J. (1995) *Statistical methods in biology*. 3rd edn. 255 pp. Cambridge, Cambridge University Press.

Chapter in a book

Sanderson, C. J. (1993) Cytokines active in eosinophils. pp. 274-284 in Makino, S. & Fukuda, T. (Eds) *Eosinophils: biological and clinical aspects*. Boca Raton, CRC Press. Citation of authors in the text should appear in the form: Polaszek (1996) or (Polaszek, 1996). Authors should be cited in chronological order as (Blackman *et al.*, 1994; Roberts & Kumar, 1995).

Ethics

The authors must demonstrate the experimental procedures employed conform to the accepted principles of animal welfare in experimental science. The principles defined and explained in the European Convention for the Protection of Vertebrate Animals used for Experimental and Other Scientific Purposes and its appendix and/or the National Research Council Guide for the Care and Use of Laboratory Animals should be followed. If experimental methodology raises particular ethical or welfare concerns then the Editor will take additional guidance from Animals (Scientific Procedures) Act 1986, when making decisions. The Editor's decision with regard to ethics will be final.

Proofs

Authors will receive a PDF file of page proofs by email.

Offprints

If you wish to purchase paper offprints of your article, complete the offprint order form and return with your corrected proof. Orders must be received before the issue has gone to press. Authors will receive a PDF of their article via email.

Copyright

Authors will be supplied with a copyright form which must be completed and returned to the Publisher. Papers are accepted on the understanding that the work has been submitted exclusively to the Journal and has not previously been published elsewhere unless otherwise stated.

Disposal of material

Once published, all copies of the manuscript, correspondence and artwork will be held for 6 months before disposal. Authors must contact the Editor if they wish to have material returned.

Manuscript Submission

To facilitate rapid reviewing, communications for peer review will be electronic and you will need to supply a current e-mail address when registering to use the system.

Please submit an electronic version, preferably in Microsoft Word or other standard word processing programme to: <http://www.editorialmanager.com/joh>.

When submitting your manuscript you will need to supply:

- Manuscript file to include title, authors, correspondence details, abstract (250 words), main text, references and captions for tables and figures. Tables and figures should be provided as separate files and numbered as they appear in the text. For large files these can be uploaded as zip files.
- Covering letter, stating that the manuscript is an original contribution that has not been published elsewhere in substantially the same form, that it is not currently under consideration elsewhere, and that permission has been obtained for any copyrighted material used.
- Authority to publish form; please send a hard copy of the signed copyright form to the Production Editor, Journal of Helminthology, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU.
