

Journal of Psychiatric Intensive Care

The *Journal of Psychiatric Intensive Care* is devoted to issues affecting the care and treatment of people with mental disorders who manifest severely disturbed mental or behavioural functioning. The journal is peer reviewed, international and multi-disciplinary in its approach. It serves the interest of all professionals concerned with these topics whether they work in Psychiatric Intensive Care Units (PICUs), Low Secure Unit, Challenging Behaviour, Emergency Psychiatry, Intensive Treatments or in other parts of the wider mental health system. All aspects of psychiatric intensive care are covered within the journal that seeks to encourage informed debate and exchange of opinion and thereby become the essential journal in this field. The content of the journal includes editorials, original articles, brief reports, reviews, conference reports, news and notices. Preference is given to original research of a high scientific quality.

The journal publishes:

- Editorial
- Original research articles
- Correspondence
- Case reports
- Notices
- Review articles
- Informative commentary on recent developments
- The activities of the National Association of Psychiatric Intensive Care Units
- Book reviews

Submissions: Manuscripts should be submitted online via our manuscript submission and tracking site:

<http://mc.manuscriptcentral.com/jpic>

Full instructions for electronic submission are available directly from this site.

Submissions

A paper is accepted for publication on the understanding that it is not being submitted simultaneously to another journal in the English language.

The Editor reserves the right to make editorial and literary corrections. Any opinions expressed or policies advocated do not necessarily reflect the opinions or policies of the Editor or the National Association for Psychiatric Intensive Care Units.

Full Papers

Full papers should be not more than 4,000 words in length, with each section beginning on a separate page. There should be a title page, abstract, 3-6 key words, acknowledgments, references, tables and captions to any illustrations.

The title page should give the following information:

- Title of the article.
- Full given name and initials of each author.
- Name and address of the department or institution to which the work should be attributed.
- Name, address, telephone number and e-mail address for the author responsible for correspondence.
- Sources of support in the form of grants.

An abstract should be included with each full paper and consist of not more than 200 words, summarising the contents of the article. Headings should be appropriate to the nature of the paper. In general, those for experimental papers should follow the usual conventions. Other papers can be subdivided as the author desires. The use of appropriate headings enhances readability.

The accuracy of references is the responsibility of the author. References should be in the Harvard style.

Tables, diagrams and illustrations should be presented on a separate file. Each table should be presented on a separate page and should contain only horizontal rules. Do not submit tables as images.

Care should be taken to ensure that all units are included, a short description title should appear above each table and any footnotes, suitably identified, should appear below. Ensure that each table is cited in the text.

Case reports, that add new information or an alternative view to care, treatment and practice, should be considered. Articles published in this section should have no more than 3 authors, 1,000 words, and should include an abstract of approximately 60 words. The author should include 3–6 key words, no more than 2 figures or tables and a maximum of 10 references.

Illustrations

Any illustrations or photographs will be the responsibility of the authors to produce and supply relevant artwork at their own cost. Please consult the [Cambridge Journals Artwork Guide](#) for guidance on creating suitable electronic figures. If any further instruction is needed on providing images, please contact the journal editorial office (journal@napicu.org.uk). If you request colour figures in the printed version, you will be contacted by CCC-Rightslink who are acting on our behalf to collect Author Charges. Please follow their instructions in order to avoid any delay in the publication of your article.

Reference Format

References should be presented in the Harvard style. The accuracy of the reference you provide is your responsibility. In the text your reference should state the author's surname and the year of publication e.g. (Smith, 2002). If there are two authors, you should give both surnames (Smith & Black, 2001). When a source has more than two authors give the name of the first named author followed by 'et al'. Where a quotation is used within your paper; the author, date and page number should be given, for example:

'prisoners in England and Wales who are mentally ill are treated against their wishes under common law only rarely and in situations of dire emergency. We believe that current practice is based on a mistaken interpretation of the common law, and is at odds with an evidence based approach to management of mental illness.'

(Wilson & Forrester, 2002 p. 1)

A list of all the references in your manuscript should be typed in alphabetical order, double line spaced, on a separate page titled 'References'. Each reference to a paper needs to include authors' surnames and

initials, year of publication, full title of paper, full name of journal, volume number, and first and last page numbers.

Here is an example:

Wilson, S., Forrester, A. (2002) Too little, too late? The treatment of mentally incapacitated prisoners. *Journal of Forensic Psychiatry*. 13(1): 1–8.

References to books should be given in a slightly different form, as in these examples:

Breakwell, G.M. (1997) *Coping with Aggressive Behaviour*. Leicester, BPS Books.

Goldstein, M. (2001) Psychological Approaches to Acute Patient Care. In: Beer, M., Pereira, S., Paton, C. (eds) *Psychiatric Intensive Care*. pp. 93–107. Greenwich Medical Media Limited, London.

Required Statements

Acknowledgements

You may acknowledge individuals or organisations that provided advice, support (non-financial). Formal financial support and funding should be listed in the following section.

Financial support

Please provide details of the sources of financial support for all authors, including grant numbers. For example, “This work was supported by the Medical research Council (grant number XXXXXXXX)”. Multiple grant numbers should be separated by a comma and space, and where research was funded by more than one agency the different agencies should be separated by a semi-colon, with “and” before the final funder. Grants held by different authors should be identified as belonging to individual authors by the authors’ initials. For example, “This work was supported by the Wellcome Trust (A.B., grant numbers XXXX, YYYY), (C.D., grant number ZZZZ); the Natural Environment Research Council (E.F., grant number FFFF); and the National Institutes of Health (A.B., grant number GGGG), (E.F., grant number HHHH)”. Where no specific funding has been provided for research, please provide the following statement: “This research received no specific grant from any funding agency, commercial or not-for-profit sectors.”

Conflict of interest

Please provide details of all known financial, professional and personal relationships with the potential to bias the work. Where no known conflicts of interest exist, please include the following statement: “None.”

Ethical standards

Where research involves human and/or animal experimentation, the following statements should be included (as applicable): “The authors assert that all procedures contributing to this work comply with the ethical standards of the relevant national and institutional committees on human experimentation and with the Helsinki Declaration of 1975, as revised in 2008.” and “The authors assert that all procedures contributing to this work comply with the ethical standards of the relevant national and institutional guides on the care and use of laboratory animals.”

Letters to the Editors

Readers will be encouraged to write about any topic that relates to the practice of psychiatric intensive care or relevant to contents of the journal. Such letters will be published in a distinct section. They should be no more than 500 words in length and include no more than 3 references. Short reports, reviews and newsworthy commentary will be considered for publication in the journal. Authors are encouraged to contact the Editor to determine the appropriateness for inclusion.

Author Language Services

Cambridge recommends that authors have their manuscripts checked by an English language native speaker before submission; this will ensure that submissions are judged at peer review exclusively on academic merit. We [list a number of third-party services](#) specialising in language editing and / or translation, and suggest that authors contact as appropriate. Use of any of these services is voluntary, and at the author's own expense.

Speak to the Editors

The Editor in Chief, Deputy Editor or members of the Editorial Board are happy to be approached by any potential authors. Contact can be made at the addresses, telephone numbers and email details listed below.

Roland Dix
Editor-in-Chief,
The Montpellier Unit,
Wotton Lawn Hospital,
Horton Road, Gloucester GL1 3WL.
Telephone: 01452 891581/891589
E-mail: journal@napicu.org.uk

Dr Jim Laidlaw,
Deputy Editor
The Montpellier Unit,
Wotton Lawn Hospital,
Horton Road, Gloucester GL1 3WL.
Telephone: 01452 891581/891589
E-mail: Jim.laidlaw@glos.nhs.uk

Dr Stephen Dye
Assistant Editor
St Clement's Hospital
Suffolk Mental Health Partnership NHS Trust
Email: Stephen.Dye@smhp.nhs.uk
