

Mathematical Modelling of Natural Phenomena

Instructions for authors

Foreword:

The objective of the journal ***Mathematical Modelling of Natural Phenomena*** is to provide for each issue a different topic in physics, chemistry, biology, etc. It is then necessary for the authors to specify the issue that has been chosen for publication among the issues planned for the current year or among forthcoming issues.

The manuscript has to correspond to the topic of the issue. Applied aspects of the work have to be clearly stated and mathematical models should be justified. Papers have to be written in such a way that they can be accessible to as much readership as possible.

Submission:

Authors are required to submit their papers electronically as a pdf file. They should be written in English and prepared with the text editor Latex following the template given in the website. The latex file and the file with macros can be downloaded [here](#). Authors should contact one member of the Editorial Board (guest or permanent) as handling editor for their article. They are also requested to add names and current e-mail addresses of three scientists who may be contacted as referees for their paper.

Manuscript format:

We would like to bring the authors' particular attention to the style of references. They should be given in the alphabetic order (as specified in the template). Figures should be placed in the text and accompanied by captions. Authors are requested not to put the list of captions at the end of the paper. In the electronic version, figures can be in color. They will be printed black and white unless the authors pay in addition for printing color figures (150 euros per page, this amount can be modified). Electronic version of the paper can be accompanied by short movies with simulations or experiments (< 10 Mb). In this case, it should be indicated in the text of the paper.

Revisions:

Authors requested by the editor to revise the text of a manuscript, may revise and submit it again within 3 months. After this period, the manuscript will be regarded as a new submission.
