Journal of the International Phonetic Association

is a forum for work in the fields of phonetic theory and description. As well as including papers on laboratory phonetics/phonology and related topics, the journal encourages submissions on practical applications of phonetics to areas such as computer speech processing, language and phonetics teaching and speech therapy. It is especially concerned with the theory behind the International Phonetic Alphabet and discussions of the use of symbols for illustrating the phonetic structures of a wide variety of languages.

Editors

Professor Peter Ladefoged, *University of California, USA*

Professor John K. Local, *University of York, UK*

Dr Linda Shockey, *University of Reading, UK*

IPA Secretary

Dr. John H. Esling, *University of Victoria, Canada*

Matthew Gordon, Paul Barthmaier and Kathy Sands

Reviews and Notes on the International Phonetic Alphabet

Illustrations of the phonetics of Burmese, Chicksaw, Ega, Friulian, Jicarilla Apache, Keo, Nara, Nuuchahnulth, and Shipibo

Phonology is the only journal devoted exclusively to this fast-moving discipline. It covers both the theoretical and empirical aspects of the discipline and creates a unique forum for the productive interchange of ideas among phonologists and those working in related areas. As well as research articles by leading scholars, each issue carries in-depth book reviews plus *Squibs and replies* – shorter pieces on topics of current or controversial interest.

Published three times a year, *Phonology* is the best way to stay in touch with the latest developments in this dynamic and innovative field.

'Phonology is one journal that every serious phonologist must read regularly. I couldn't do without it.'

James W. Harris, Professor Emeritus,
Massachusetts Institute of Technology

Handbook of the International Phonetic Association

A Guide to the Use of the International Phonetic Alphabet

The essential reference work for all those involved in the analysis of speech, *The Handbook* is a comprehensive guide to the International Phonetic Alphabet. It presents the basics of phonetic analysis so that the principles underlying the Alphabet can be readily understood, and gives examples of the use of each of the phonetic symbols. The application of the Alphabet is then demonstrated in nearly 30 'Illustrations' – concise analyses of the sound systems of a range of languages, each of them accompanied by a phonetic transcription of a passage of speech.

Downloadable sound files are available at <http://uk.cambridge.org/linguistics/resources/ipahandbook/>

1999 214 pages 6 figures
0 521 63751 1 Paperback £12.95/\$19.00

Papers in Laboratory Phonology

Volumes in this series, like the conferences from which they were derived, have been influential in establishing Laboratory Phonology as a discipline in its own right.

Between the Grammar and Physics of Speech

Papers in Laboratory Phonology I

Edited by John Kingston and Mary E. Beckman

1991 516 pages
