Econometric Exercises – a new textbook series

Each volume in the series:

- contains solved examples and applications in a specific field of econometrics, and computer exercises where appropriate
- increases in difficulty as the topics become more specialized, helping students to build up knowledge gradually
- begins with a short technical introduction and overviews the most relevant theorems and results
- is self-contained, has a full index, and includes cross-reference to other volumes in the series

Series Editors:
Karim M. Abadir, University of York, United Kingdom
Jan R. Magnus, Tilburg University, The Netherlands
Peter C. B. Phillips, Yale University, United States of America

Series ISBN:
978 0 521 53357 7 (0 521 53357 0)

Future titles in the series available in 2006

Statistics
Hardback 978 0 521 82288 6 (0 521 82288 2)
Paperback 978 0 521 53745 2 (0 521 53745 2)

Econometric Theory, I:
Hardback 978 0 521 83027 0 (0 521 83027 3)
Paperback 978 0 521 53725 4 (0 521 53725 8)

Imperical Applications, I:
Hardback 978 0 521 83718 7 (0 521 83718 9)
Paperback 978 0 521 54559 4 (0 521 54559 5)

First textbook in the series

Matrix Algebra
Karim M. Abadir, University of York
AND Jan R. Magnus, Tilburg University

- Only textbook that is devoted to solved examples in matrix algebra
- Features 684 solved exercises
- Can be used either as a self-contained course in matrix algebra or as a supplementary text

Publication November 2005
228 x 152 mm  485 pages
684 solved exercises
HB 978 0 521 82289 3 (0 521 82289 0)  £22.99
PB 978 0 521 53746 9 (0 521 53746 0)  £50.00
