THE CAMBRIDGE ECONOMIC HISTORY OF THE GRECO-ROMAN WORLD

Edited by
Walter Scheidel, Ian Matthew Morris, and Richard Paul Saller

The first comprehensive survey of the economies of classical antiquity

www.cambridge.org/scheidel
The Cambridge Economic History of the Greco-Roman World comprises twenty-eight chapters summarising the current state of scholarship in this area. Together they reflect the new interest in economic growth in antiquity and offers new methods for measuring economic development, often combining textual and archaeological data that have previously been treated separately. Accessible to a broad readership, the volume represents a major advance in our understanding of the economic expansion that made the civilisation of the classical Mediterranean world possible.

- Presents an authoritative overview of the current state of knowledge and ideas on the ancient economy
- Provides a novel focus on economic growth
- Combines textual and archaeological evidence that has often not been linked before
Contents
