Operative Obstetrics
2nd edition

Edited by
John Patrick O’Grady
Martin L. Gimovsky
Lucy Bayer-Zwirello
Kevin Giordano

This fully updated edition focuses on a wide spectrum of surgical procedures during pregnancy, with discussion of common surgical complications. It also considers complicated and controversial subjects such as cervical insufficiency, pregnancy termination, and instrumental delivery.

Each section includes an in-depth analysis of important ethical and legal issues underlying practice for the area in question.

Contents
Part I. Antepartum;
Part II. Intra Partum and Postpartum;
Part III. Surgery During Pregnancy;
Part IV. Special Issues.

June 2008  800 pp  153 line diagrams  40 half-tones  47 colour plates
978-0-521-68106-3  Paperback  £55.00
978-0-521-86248-6  Hardback  £100.00
Gynecologic laparoscopy has evolved into a major surgical tool used to treat a multitude of gynecologic indications and is the most common surgical procedure performed by gynecologists today.

This book describes different techniques in minimally invasive surgery and reviews the evidence-based medical literature supporting these techniques. It covers the full spectrum of laparoscopic procedures in gynecology, oncology, and infertility treatment. Included are sections on the management of complications during laparoscopy, ranging from vascular injury to bladder or bowel injury with expanded chapters on laparoscopic anatomy, operative hysteroscopy and pelvic floor repair.

The editors have pioneered some of the most important laparoscopic procedures used today with their work opening up the video laparoscopy field for surgeons worldwide.

Features

- Brings all clinicians and practitioners up-to-date with laparoscope use in state of the arts surgical treatments of gynecological malignancy
- Many of the contributors have established the surgical techniques discussed
- All procedures are well illustrated with colour drawings and photos

About the authors

**Dr Camran Nezhat** is Clinical Adjunct Professor of Gynecologic and Obstetric Surgery and Fellowship Director of the Centre for Special Minimally Invasive Surgery at Stanford University Medical School, USA.

**Dr Farr Nezhat** is Director of Minimally Invasive Surgery in the Department of Obstetrics, Gynecology and reproductive Science at Mount Sinai Medical Center, New York, USA.

**Dr Ceana Nezhat** is Director of the Nezhat Medical Center in Atlanta and Associate Clinical Professor of Obstetrics and Gynecology at Stanford University School of Medicine, USA.
## Contents

Foreword;
1. Introduction;
2. Equipment;
3. Anesthesia;
4. Laparoscopic trocar access;
5. Laparoscopic suturing;
6. Intraperitoneal and retroperitoneal anatomy;
7. Fertility:
   7.1. Frontiers in fertility;
   7.2. Assessment of the endometrial cavity in the patient with infertility;
   7.3. Ultrasound egg recovery;
   7.4. Ultrasonography and the embryo transfer;
   7.5. Salpingostomy and salpingectomy TBD;
8. Hysteroscopy:
   8.1. Evaluation and management of the uterine septum;
   8.2. Intrauterine adhesions: hysteroscopic evaluation and treatment;
   8.3. Hysteroscopic myomectomy;
   8.4. Hysteroscopic tubal cannulation;
   8.5. Hysteroscopic sterilization;
   8.6. Global endometrial ablation;
9. Management of adnexal masses:
   9.1. The adnexal mass;
   9.2. Ovarian cystectomy;
   9.3. Laparoscopic operations on the ovary;
   9.4. Management of the ectopic pregnancy;
   9.5. Management of tubo-ovarian abscesses;
   9.6. Surgical management of polycystic ovarian syndrome;
9.7. Ovarian remnant;
10. Endometriosis:
   10.1. The pathogenesis of endometriosis;
   10.2. Thoracic endometriosis;
11. Laparoscopic adhesiolysis;
12. Leiomyomas:
   12.1. Laparoscopic myomectomy;
   12.2. Uterine fibroid embolization;
13. Hysterectomy:
   13.1. Laparoscopy and hysterectomy;
   13.2. Laparoscopic excision of rudimentary uterine horn;
14. Pelvic floor:
   14.1. Laparoscopic burch colposuspension;
   14.2. Minimally invasive slings;
   14.3. Laparoscopic vaginal vault suspension;
   14.4. Laparoscopic urethral suspension, repair of cystourethrocele and vesicovaginal fistula;
   14.5. Laparoscopic rectovaginal fistula repair;
14.6. Laparoscopic assisted neovaginoplasty;
15. Uterosacral transection and ablation;
16. Gynecologic Malignancy:
   16.1. Introduction;
   16.2. Laparoscopic lymphadenectomy;
   16.3. Laparoscopic sentinel lymph node identification in cervical cancer;
   16.4. Schauta radical vaginal hysterectomy and total laparoscopic radical hysterectomy;
   16.5. Laparoscopy for endometrial cancer;
   16.6. Laparoscopic management of early ovarian cancer;
   16.7. Second-look surgery for gynecologic malignancy;
16.8. Port site metastasis and pneumoperitoneum;
17. Laparoscopy in the pregnant patient;
18. Minimal access pediatric surgery;
19. Laparoscopic vascular surgery in 2006;
20. Complications in laparoscopy:
   20.1. Laparoscopic major vascular injury;
   20.2. Complications: ureter;
   20.3. Laparoscopic treatment of gastrointestinal endometriosis;
21. Additional procedures for pelvic surgeons:
   21.1. Cystoscopy;
   21.2. Intraoperative sigmoidoscopy in gynecologic surgery;
   21.3. Appendectomy;
22. Laparoscopy simulators for training basic surgical skills, tasks, and procedures;
23. Robot-assisted laparoscopy:
   23.1. Computer assisted surgery and surgical robotics: past, present and future;
   23.2. Minimally invasive gynecologic surgery: the evolving role of robotics.
