Forthcoming for 2008

Neonatal Cerebral Investigation

Janet M. Rennie

Cornelia F. Hagmann

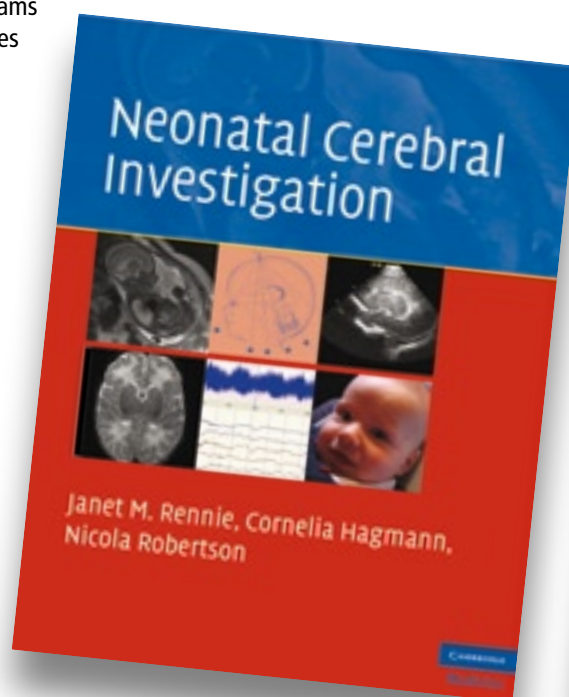

and Nicola J. Robertson

All from University College London

Highly illustrated with over 400 ultrasound and MRI scans and EEG and CFM traces, this practical text provides detailed diagnostic and prognostic information on a wide range of clinical problems.

- *Provides a full range of scans and pathology of normal brain, enabling the reader to recognise and diagnose all common neonatal brain disorders*
- *Shows scans of immature brain at 2 week intervals, 24 weeks – 36 weeks gestations*
- *Enables comparison between normal appearance and immature brain or any other clinical disorders*

2008 276 x 219 mm 300pp 75 line diagrams

978-0-521-83848-1 HB c. £95.00

Management of Childhood Obesity

Elizabeth Poskitt

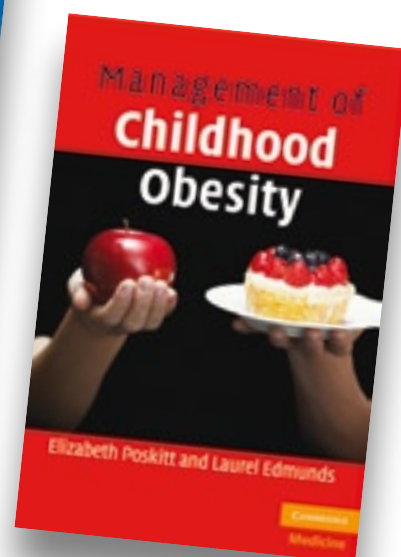

London School of Hygiene and Tropical Medicine

and Laurel Edmunds

University of Bristol

Provides practical, realistic and easily implemented advice on sensitive approaches to children and their families in a very accessible form for all practitioners involved in the care of overweight children. Changes to diet and activity are reviewed in detail but also with the whole spectrum of eating within the family and community, including sedentariness and the significance of sleep in preventing overweight. Features include key management points in short bullet lists as well as practical recommendations listed at the end of each chapter.

Cambridge Pocket Clinicians Series New titles

Pediatrics

Edited by Howard Bauchner
Robert Vinci
and Melanie Kim
All from Boston Medical Center

A practical, clinically oriented pocket guide of clinical pediatrics, with advice for appropriate diagnostic and therapeutic interventions for the most common pediatric problems encountered in the clinical setting. Over 200 diseases and conditions are discussed in detail. The topics are organized under headings on differential diagnosis, evaluation, treatment, complications and prognosis so that the user will find the desired information quickly and easily.

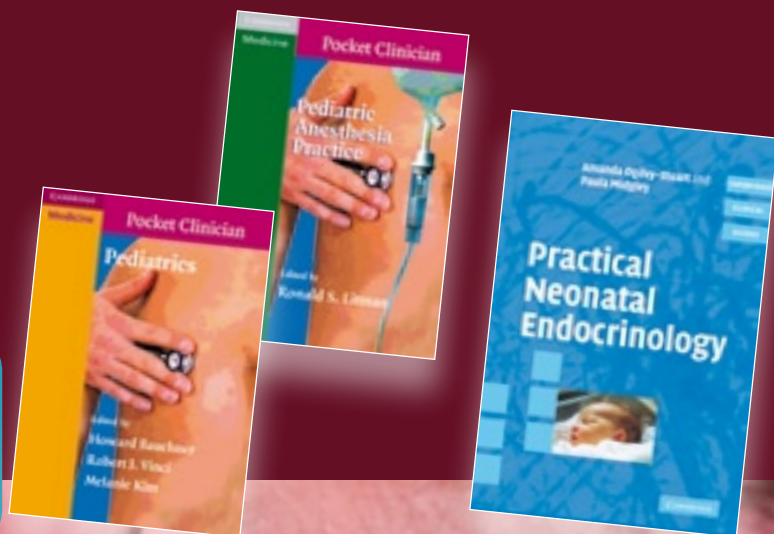

2007 228 x 152 mm 526pp
978-0-521-70936-1 PB £30.00

Pediatric Anesthesia Practice

Edited by Ronald Litman
Children's Hospital of Philadelphia

A vital point-of-care guide to aid the clinician in the care of children in the peri-anesthetic period, divided into three main sections: surgical procedures, co-existing diseases, and regional anesthesia. With a condensed and practical approach to patient management, Litman showcases consistent standards that have been tested at the leading children's hospitals world wide.

2007 228 x 152 mm 228pp
978-0-521-70937-8 PB £27.99

Cambridge Clinical Guides Series New titles

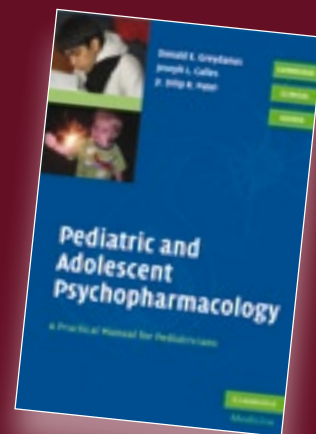

Pediatric and Adolescent Psychopharmacology

A Practical Manual for Pediatricians

Donald E. Greydanus
Joseph L. Calles, Jr
and Dilip R. Patel
All from Michigan State University

Written for all non-psychiatrists who find themselves caring for children and teenagers with mental health disorders, this book gives clear, expert guidance on the complexities of diagnosis of mental health disorders and provides practical, accessible advice on the complex treatment options available for many disorders. An invaluable resource for all clinicians who encounter these vulnerable patients.

2008 228 x 152 mm 286pp 12 line diagrams 94 tables
978-0-521-70567-7 PB c. £35.00

Practical Neonatal Endocrinology

Amanda Ogilvy-Stuart
University of Cambridge
and Paula Midgley
University of Edinburgh

Provides a wealth of practical information on the diagnosis and management of suspected endocrine pathology. Guidance is given on how and when samples should be taken, order of priority, sample volumes required, length of time to expect before results are available and normal values.

- Chapters are based on clinical presentation making it a practical guide rather than another textbook
- Samples required are given in order of priority, which is important when samples are difficult to obtain
- The flow charts aid understanding of the diagnostic process

2006 228 x 152 mm 228pp 23 figures
978-0-521-83849-8 PB £39.00

Case Studies in Pediatric Infectious Diseases

Frank E. Berkowitz
Emory University, Atlanta

Features 121 case studies intended to provide an approach to the diagnosis and treatment of pediatric infectious diseases. Each case scenario is followed by a discussion of the case, supplemented with tables and photographs. Discussions focus on principles of management and place emphasis on determining risk factors and on clinical evaluation. Illustrated with high-quality color photographs and radiographs, its readability provides an engaging way to study pediatric infectious diseases.

2007 253 x 177 mm 400pp 3 line diagrams 52 half-tones
159 colour plates
978-0-521-69761-3 PB £29.99

Pediatric Neuropsychological Intervention

Edited by Scott J. Hunter
University of Chicago
and Jacobus Donders
Mary Free Bed Rehabilitation Hospital, Grand Rapids

Examines current trends in the assessment and treatment of common disorders including traumatic brain injuries, brain tumors, epilepsy and autistic spectrum disorders. This essential text helps practitioners and researchers identify and understand the evidence to support interventions with a range of acquired or congenital neuropsychological disorders.

- *Covers the assessment and treatment of neurodevelopmental disorders*
- *Emphasises evidence-based interventions*
- *Bridges the knowledge gaps between the professionals responsible for providing care*

2007 247 x 174 mm 508pp 3 line diagrams 3 half-tones
14 tables 14 colour figures
978-0-521-87550-9 HB £60.00

A Clinical Guide to Inherited Metabolic Diseases

Third edition

Joe T. R. Clarke
University of Toronto

User-friendly clinical handbook providing a clear overview of how to go about recognizing and diagnosing inherited metabolic diseases.

'In short, this is an excellent guide to metabolic disease; it represents good value for money and, I suspect, will be more likely found in the owner's pocket rather than on the shelf. It is recommended not only to the 'busy physician' and trainee, but to all those with an interest in metabolic disease.'

JOURNAL OF INHERITED METABOLIC DISEASE

2005 247 x 174 mm 358pp 26 line diagrams 34 half-tones
978-0-521-61499-3 PB £47.00

Psychiatric and Behavioural Disorders in Intellectual and Developmental Disabilities

Second edition

Edited by Nick Bouras
and Geraldine Holt
Both from King's College London

Entirely revised and updated, in this new edition an international, multidisciplinary team of experts brings together the most recent, relevant and useful information on mental health and behavioural problems of people with intellectual, developmental and learning disabilities and mental retardation.

2007 247 x 174 mm 438pp 9 line diagrams 12 tables
978-0-521-60825-1 PB £48.00

Preventive Health Care for Children with Genetic Conditions

Providing a Primary Care Medical Home

Second edition

Golder N. Wilson
University of Texas Southwestern Medical Center, Dallas
and W. Carl Cooley
Dartmouth-Hitchcock Medical Center, Hanover, New Hampshire

Gives health professionals an invaluable, structured approach to the preventive care of children with congenital disorder discussing over 150 conditions

- *A compendium of clinical guidance and checklists to provide a structured approach to care for these children*
- *Emphasis on preventive management of medical complications*
- *Supported by key literature and web resources, suitable for professionals and parents*

2006 247 x 174 mm 582pp 3 line diagrams 30 tables
978-0-521-61734-5 PB £55.00

Pediatric Surgery and Urology

Long-Term Outcomes

Second edition

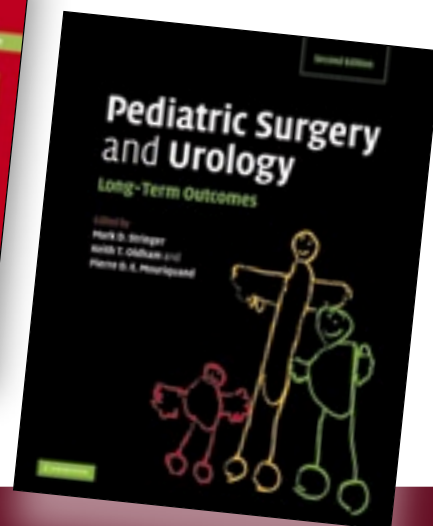

Edited by Mark D. Stringer
University of Otago, New Zealand
Keith T. Oldham
Children's Hospital of Wisconsin
and Pierre D. E. Mouriquand
Debrousse Hospital, Lyon

The second edition of this successful and popular textbook has been completely revised and updated with new chapters on urolithiasis, small bowel transplantation, pancreatitis, and breast disorders and a completely new section on trauma.

'It is an excellent book, well written by a host of experienced surgeons reviewing the results of the surgery of their particular sub specialties and interests ... This book should not only be bought by departments of pediatric surgery and pediatric urology but should also be read by all surgeons and trainees who operate on infants and children.'

BRITISH JOURNAL OF UROLOGY

Handbook of Pediatric HIV Care

Edited by Steven L. Zeichner

National Cancer Institute, Bethesda, Maryland

and Jennifer S. Read

National Institutes of Health, Bethesda, Maryland

A portable, practical guide to the essentials of pediatric HIV care in a form suitable for doctors in the busy hospital setting.

'... 40% of the chapters are authored or coauthored by clinicians and researchers at the US National Institutes of Health. This gives the book a different perspective than most pediatric clinical references ... The authors of [this book] have written a well-constructed clinical reference that provides detailed scientific and epidemiologic data as well as practical guidelines for managing children with HIV.'

JOURNAL OF THE AMERICAN MEDICAL ASSOCIATION

2006 216 x 138 mm 902pp 20 line diagrams 23 half-tones
978-0-521-52906-8 PB £44.00

Neonatal Nutrition and Metabolism

Second edition

Patti J. Thureen

Edited by William W. Hay

Both from University of Colorado

This second edition includes a greatly expanded number of chapters dealing in depth with clinical issues ranging from IUGR, intravenous feeding, nutritional therapies for inborn errors of metabolism, and care of the neonatal surgical patient.

'This book asks fundamentally important questions about how we construct our understandings of the recent British past and contributes to a significant rethinking of British history.'

Developmental Origins of Health and Disease

Edited by Peter Gluckman

University of Auckland

and Mark Hanson

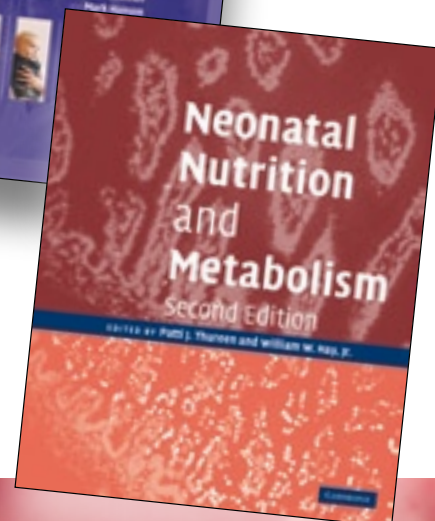

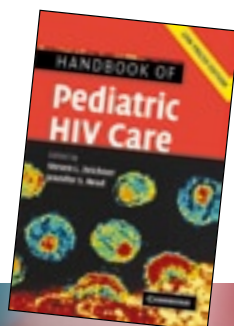

University of Southampton

This landmark publication provides the first definitive account of how and why subtle influences on the fetus and during early life can have such profound consequences for adult health and diseases.

'Researchers will find Developmental Origins of Health and Disease to be a well-referenced resource that documents the state of the art in the field and serves as a source of new ideas. Students of human and developmental biology and health practitioners should also keep the volume in close reach ... The volume inspired me to think differently and to develop a new set of research questions to answer with my cohort data from a developing country ...'

A Clinician's Handbook of Child and Adolescent Psychiatry

Edited by Christopher Gillberg
Göteborg Universitet, Sweden

Richard Harrington
University of Manchester

and Hans-Christoph Steinhausen
Universität Zürich

Authoritative clinical handbook providing a comprehensive overview of the main disorders encountered by child and adolescent psychiatrists in clinical practice, ranging from eating, sleep and affective disorders to substance abuse, gender identity and sexual abuse.

'This substantial textbook, edited by well-known academics and clinicians, certainly provides a comprehensive guide to all the common disorders that clinicians working within child and adolescent mental health services are likely to encounter.'

BRITISH JOURNAL OF PSYCHIATRY

2006 247 x 174 mm 764pp 29 line diagrams 104 tables
978-0-521-81936-7 HB £70.00

Essentials of Paediatric Intensive Care

C. Stack
Sheffield Children's Hospital NHS Trust
and P. Dobbs
Royal Hallamshire Hospital, Sheffield

An essential handbook for all those involved in the care of critically ill children, covering all of the key aspects of paediatric intensive care. Features a comprehensive 'list' of drugs commonly used in paediatric anaesthesia and intensive care.

2004 250pp
978-0-521-68797-3 PB £18.99

Pediatric Orthopedics for Primary Care Physicians

Second edition

Edited by Dennis S. Weiner
Children's Hospital Medical Center of Akron, Ohio

Edited in association with Kerwyn Jones
Southern Illinois University School of Medicine, Springfield

'This well-illustrated and practical textbook, designed for primary care physicians, is written by a true expert in the field ... Weiner's authoritative second edition fulfills its intended purpose and provides an excellent reference for primary care doctors, who can be grateful that a surgeon of Weiner's renown has taken the effort to produce a quality second edition.'
