This second edition of Philippe Sands’ leading textbook on international environmental law provides a clear and authoritative introduction to the subject, revised to January 2003. It updates existing topics and addresses important new topics, such as the Kyoto Protocol, genetically modified organisms, and foreign investment and environmental protection. It will remain the most comprehensive account of the international principles and rules relating to environmental protection and the conservation of natural resources. In addition to the key material from the 1992 Rio Conference and the 2002 Johannesburg Conference and subsequent developments, Sands covers topics including the legal and institutional framework, the field’s historical development and standards of general application.

Review of the first edition …

‘Idealists will appreciate the strong sense of commitment to the underlying purposes of international environmental protection measures which permeates the treatment of the issues. Realists will welcome the clear appreciation of the difficulties in achievement of those purposes. Lawyers will come to rely on the wealth of material made readily available from the author’s depth of learning.’

Robert McCracken QC, 
Journal of Planning and Environment Law

‘This book is more than just a comprehensive reference work. It is a wide-ranging, comprehensive publication that challenges the individual to demand international cooperation and requires the legal practitioner to look beyond his own national boundaries.’

Michael Elston, TOXCAT

‘A pioneering work which will serve as a milestone in the development of international environmental law. It will be useful to the legal academic, practitioner or even natural scientist or environmentalist requiring a first reference to a particular aspect of this vast field.’

Prof. Jan Glazewski, South African Law Journal

About the Author …
PHILIPPE SANDS Q.C. is Professor of Laws and Director of the Centre for International Courts and Tribunals at University College London. He was a co-founder of FIELD (Foundation for International Environmental Law and Development), and as Legal Director established programmes on Climate Change and Sustainable Development. As a practising barrister Professor Sands has extensive experience litigating cases before the International Court of Justice, the International Tribunal for the Law of the Sea, the WTO Dispute Settlement Body, and the World Bank’s International Centre for Settlement of Investment Disputes. He also frequently acts as advisor to governments, international organisations and non-state actors on aspects of international law.
