Just a few of our indispensable titles for trainees...

Pharmacology for Anaesthesia and Intensive Care 2nd Edition

Peck, Hill, Williams

1841101664, 234 x 156 mm, 368pp, Paperback, June 2003, £29.50

QBase Anaesthesia 5: MCQs for the final FRCA

Hammond, McIndoe

1841100765, 234 x 156 mm, 208pp, Paperback (with free CD-ROM), February 2004, £23.50

QBase Anaesthesia 6: MCQ Companion to Fundamentals of Anaesthesia

Pinnock, Jones, Mills, Maguire, Barker

1841100986, 234 x 156 mm, est. 208pp, Paperback (with free CD-ROM), October 2003, £23.50

QBase Anaesthesia 7: MCQs for the Primary FRCA

Hammond, McIndoe

1841101168, 234 x 156 mm, 208pp, Paperback (with free CD-ROM) January 2004, £23.50

Fundamentals of Anaesthesia 2nd Edition

Edited by Pinnock, Lin, Smith

1841101141, 246 x 189 mm, 952pp, Paperback, January 2003, £57.50

1841101222, 246 x 189 mm, 952pp, Hardback, January 2003, £90.00

Concise Anatomy for Anaesthesia

Erdmann

1841100692, 234 x 156 mm, 208pp, 70 illustrations, Hardback, 2001, £26.00

The Anaesthesia Viva - Volume 1 2nd Edition

Urquhart, Blunt. (Edited by Pinnock)

1841101028, 234 x 156 mm, 200pp, Paperback, January 2003, £26.50

The Anaesthesia Viva - Volume 2 2nd Edition

Blunt, Urquhart (Edited by Pinnock)

1841101036, 234 x 156 mm, 208pp, Paperback, April 2003, £26.50

The Clinical Anaesthesia Viva Book

Mills, Barker, Maguire

1841100706, 234 x 156 mm, 272pp, Paperback, 2001, £26.00

Short Answer Questions in Anaesthesia 2nd Edition

Bricker

1841100889, 234 x 156 mm, 344pp, Paperback, 2002, £29.50

European Journal of Anaesthesiology

Editor-in-Chief: Brian Pollard

ISSN: 0265 0215

Free for subscribers: Full content online

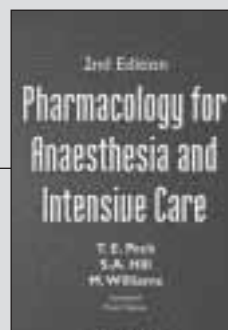

Published monthly by Greenwich Medical Media Ltd, on behalf of the European Federation of Anaesthesiologists, the European Journal of Anaesthesiology publishes original work of high scientific quality. Preference is given to experimental work or clinical observations in man, and to laboratory work of clinical relevance. The Journal also publishes commissioned reviews by an authority in a field of interest to those working in anaesthesiology or intensive care. Abstracts of European Academy of Anaesthesiology meetings, editorials, book reviews, news and notices are also included.

CAMBRIDGE
UNIVERSITY PRESS

Cambridge University Press is the printing and publishing house of the University of Cambridge, and is the oldest press in the world. It is a charitable enterprise required by University Statute to devote itself to printing and publishing in the furtherance of the acquisition, advancement, conservation, and dissemination of knowledge in all subjects; to the advancement of education, religion, learning, and research; and to the advancement of literature and good letters.

This catalogue contains a selection of our most recent publishing in this area. Please visit our website for a full and searchable listing of all our titles in print and also an extensive range of news, features and resources. Our online ordering service is secure and easy to use.

Many of our journal titles are now available online. Each journal entry in this catalogue indicates where the price includes, or will include, access to the electronic version of the journal during 2004. Full text is available FREE to all individuals within the registered domain address of full rate subscribers. In addition, the service provides all users with FREE access to tables of contents and abstracts, and a FREE email alerting service.

FORTHCOMING

Anaesthesia and Analgesia for the Morbidly Obese Patient

Edited by **Adrian Alvarez**

Arturo Oñativia General Hospital, Buenos Aires, Argentina

Morbid obesity can have a number of important implications for anaesthetic practice. This comprehensive book, written by international experts in the field, covers all aspects of obesity that may impact upon the practice of the anaesthetist, intensivist or other healthcare professional dealing with the obese patient. The information is presented in a logical manner – opening chapters cover the underlying pathophysiology of obesity and move on to discuss general risk factors, legal and ethical aspects of anaesthesia, changes in pharmacokinetics and pharmacodynamics, pre-operative assessment and management. The main section of the book then focuses on specific problems such as renal function, DVT, patient positioning, airway management and ventilation, pulse oximetry, TOE, brain monitoring and BIS, general, spinal and epidural anaesthesia, volatile anaesthetics and drug delivery. A final section includes chapters that detail the nursing, ICU and trauma management of the obese patient, and covers key topics such as anaesthesia for cesarean section, ECG, infection control, haemodynamic monitoring, post-anaesthetic care and postoperative analgesia.

1841101885, 246 x 189 mm, est. 400pp, Hardback, October 2004, £65.00

Anaesthesia for Minimally Invasive Surgery

Thomas Crozier

Centre for Anaesthesia, Recovery and Intensive Care Medicine, University of Göttingen, Germany

Minimally invasive or laparoscopic surgery is becoming increasingly commonplace, as technology has enabled a minimally invasive approach to be offered as a feasible alternative to conventional open surgery for a number of important surgical procedures. This up-to-date, comprehensive, but concise and practically oriented introduction to the subject will be of value to all anaesthetists with an interest in minimally invasive techniques. It begins by covering the key aspects of basic physiology, moves on to patient preparation and positioning, monitoring, the anaesthetic procedures themselves (including possible complications and contraindications and easy-to-follow 'how to' guides for a number of key procedures) and finally, post-operative pain. Written by a leading expert in the field, from a well-known European centre of excellence, it is essential reading for anaesthetists and intensivists at all levels of expertise.

1841101915, 246 x 189 mm, est. 200pp, Hardback, November 2004, £49.50

KEY TEXTS

The Anaesthetic Aide Memoire (2nd Edition)

John Urquhart, West Suffolk Hospital, Bury St Edmunds, UK

This new and fully updated edition of *The Anaesthetic Aide-Memoire* is not intended as a definitive pocket textbook of anaesthesia. Instead, it provides a compilation of key lists, numerical data, physiological and pharmacological formulae, procedural algorithms, important information on illnesses pertaining to anaesthesia, data on equipment, clinical measurement, and intensive care management that will serve as a valuable quick reference for senior anaesthetists in training and for consultants in anaesthesia. It is the ideal first reference source to consult when a fact, statistic, or formula eludes the memory, and as such will also prove to be a useful aid to teaching, for example when needing a reminder of a particular equation or formula prior to using it clinically, or asking a junior to produce it in a practice exam. It will also be useful for candidates for the FRCA examination who will already understand the basic physiology and pharmacology underpinning anaesthesia but who need reminding occasionally in a clear, concise, didactic way.

1841101923, 186 x 123 mm, est. 250pp, Paperback, 2005, £17.50

Anaesthetic Equipment: Principles and Practice

Angella Bryan and Nigel Harper

both at Manchester Royal Infirmary, Manchester, UK

Using an innovative layout of composite diagrams with detailed labelling, and facing pages of explanatory text, this book covers the essential features of all key equipment in use by the modern anaesthetist, explaining clearly how each device works and highlighting the common pitfalls that might be encountered in day-to-day use and how to avoid them.

1841101435, 246 x 189 mm, est. 180pp, Paperback, 2005, £27.50

The Anaesthesia Science

Simon Bricker

Countess of Chester Hospital, Chester, UK

The clinical science *viva voce* examination is an important component of the Final FRCA examination, covering applied pharmacology, anatomy, physiology and physics. Written by the author of the best-selling *Short Answer Questions in Anaesthesia, 2nd Edition*, this new book is the definitive guide to this part of the FRCA exam and is also the perfect companion volume to *The Clinical Anaesthesia Viva Book* by Mills et al, another best-selling GMM title (see BACKLIST).

1841101958, 234 x 156 mm, est. 208pp, Paperback, June 2004, £29.50

KEY TEXTS

Core Topics in Airway Management

Edited by **Ian Calder**, National Hospital for Neurology & Neurosurgery, London, UK and **Adrian Pearce**, St Thomas' Hospital, London, UK

Like other titles in the *Core Topics* series, this book provides an easy-to-read introduction to this important topic that will be of value to a wide spectrum of healthcare professionals including anaesthetists, intensivists, ODPs, theatre and recovery nurses. Concise but comprehensive chapters from experts in the field cover everything from basic anatomy, physiology and applied physics, through the various methods of maintaining the airway under anaesthesia (supraglottic devices, tracheal intubation, tubes/cuffs, endobronchial and double-lumen tubes) to the problem airway (obstruction by infection, tumour or a foreign body, ENT and maxillo-facial surgery, aspiration, obstetrics, trauma, cervical spine disease, intensive care, the 'lost' airway, extubation and recovery) the paediatric airway, disinfection and cleaning of equipment and finally morbidity, mortality and medico-legal issues. 'Real' clinical scenarios, with patient management questions and model answers, are included throughout the book to bring to life some of the key problems encountered in day-to-day practice and enhance the book's utility as a teaching and self-learning tool.

1841101583, 246 x 189 mm, est. 208pp, Paperback, September 2004, £35.00

Core Topics in Pain

Edited by **Anita Holdcroft**, Chelsea and Westminster Hospital, London and **Sian Jaggard**, The Royal Brompton Hospital, London, UK

Core Topics in Pain provides a comprehensive, easy-to-read introduction to this multi-faceted topic, from the underlying neurobiology, through pain assessment (in animals and humans), diagnostic strategies, clinical presentations, pain syndromes, to the many treatment options (e.g. physical therapies, drug therapies, psychosocial care) and the evidence base for each of these. Written and edited by experts of international renown, the many concise but comprehensive chapters provide the reader with an up-to-date, guide to all aspects of pain. It is an essential book for anaesthetic trainees and is also an invaluable first reference for surgical and nursing staff, ICU professionals, operating department practitioners, physiotherapists, psychologists, healthcare managers and researchers with a need for an overview of the key aspects of the topic.

1841101591, 246 x 189 mm, est. 256pp, Paperback, June 2004, £35.00

Handbook of ICU Therapy (2nd Edition)

Ian McConachie

Victoria Hospital, Blackpool, UK

This new, expanded and updated edition of *Handbook of ICU Therapy* builds on the success of the first edition and continues to provide concise updates on a broad spectrum of issues relating to care of the critically ill patient. As with the first edition, it is equally applicable to anaesthetists, intensivists, operating department practitioners and anaesthetic/theatre/recovery nurses, and the heart of the book focuses on providing practical information in a readable and easily accessible format. All of the authors are directly involved in ICU practice and/or research and are familiar with the most recent developments in this fast-moving area of medicine.

1841101907, 234 x 156 mm, est. 292pp, Paperback, September 2004, £24.50

Epidurals for Childbirth (2nd Edition)

Anne May

Leicester Royal Infirmary, Leicester, UK

The new edition of this unique handbook is still the only guide currently available on epidurals in obstetrics. It presents clear, practically based descriptions of procedures that will enable maternity staff to answer patients' questions accurately and with confidence. The book is fully comprehensive, covering all medical aspects of epidurals including the relevant anatomy and physiology. There is even a chapter on how to talk to patients without using medical jargon. This handbook will be an ideal easy reference for all junior anaesthetists, midwives, and operating department practitioners.

1841101893, 234 x 156 mm, est. 208pp, Paperback, December 2004, £19.50

Operating Department Practice A-Z

Edited by **Brian Smith**

and **Thomas Williams**

both at Edgehill College of Higher Education, Liverpool, UK

Like many parts of the world, the UK is witnessing significant changes to Operating Department Practice (ODP) education, a change that is bringing with it the need for new publications aimed specifically at the operating department practitioner. The *Operating Department Practice A-Z* follows a familiar 'dictionary-like' format to present alphabetically the key topics of interest to ODPs in training and in practice. Each entry has its own detailed explanation and the book has a user-friendly format to allow rapid access to information. It is an essential purchase for ODPs, as well as being a handy quick reference for medical students and a useful information source for recovery/theatre nurses.

1841101931, 246 x 189 mm, est. 256pp, Paperback, March 2004, £24.50

Essentials of Pain Management

Timothy Nash, Walton Centre for Neurology & Neurosurgery, Liverpool, UK

This concise pocketbook provides any healthcare professional involved in pain management with a practical, value-for money overview of the key issues in the subject, from a leading expert in the field, based at one the UK's leading centres of pain research. It will also be invaluable for medical undergraduates as an essential first reference and for those studying for higher qualifications in any of the professions allied to medicine.

1841101834, 186 x 123 mm, est. 180pp, Paperback, September 2004, £14.50

Orthopaedic Anaesthesia

Jacques Chelly, University of Pittsburgh Medical Center, Pittsburgh, USA
Guido Fanelli and **Andrea Casati**, both at Hospital San Raffaele, Milan, Italy

This comprehensive book, written and edited by international experts in the field, covers all aspects of orthopaedic anaesthesia in an up-to-date, concise and comprehensive way. The first section is devoted to a detailed overview of the major problems in orthopaedic anaesthesia, including general and regional anaesthetic techniques for orthopaedic procedures, perioperative evaluation, management of acute pain, management of outpatient procedures, blood transfusions, problems relating to concomitant conditions such as age, rheumatoid arthritis, neuromuscular diseases, diabetes and cardiovascular diseases and rehabilitation issues. Section two focuses on a practical, multidisciplinary approach to anaesthesia for a number of specific surgical procedures including arthroscopic and arthroplastic surgery, spinal surgery, trauma surgery, oncologic procedures, minor orthopaedic procedures and orthopaedic procedures in children. Fully illustrated throughout, the book is essential reading for anaesthetists at all levels of experience.

1841101559, 246 x 189 mm, est. 256pp, Hardback, December 2004, £65.00

KEY TEXT

Physics for Anaesthesia

Ted Lin
 Glenfield Hospital, Leicester, UK

With an innovative and attractive two-colour design and an experienced author (one of the editors of the best-selling *Fundamentals of Anaesthesia*), this book aims to present an often-dry topic in a fresh, clear and accessible way. Complex principles are illustrated with simple and easily reproducible line diagrams and the use of 'real world' examples throughout helps to relate the physics to clinical practice and make it relevant to the reader. It will become an essential reference for all healthcare personnel who need to know about the physical principles underlying anaesthetic practice.

1841100749, 234 x 156 mm, est. 272pp, Paperback, October 2004, £24.50

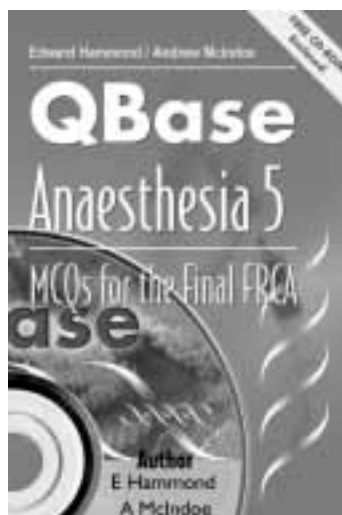

QBASE

QBase Anaesthesia 5: MCQs for the Final FRCA

Edward Hammond
 Royal Devon and Exeter Hospital, Exeter, UK and
Andrew McIndoe, Bristol Royal Infirmary, Bristol, UK

Another title in our successful QBase series, this time focusing on the FRCA Final with sets of examination papers the candidate can use to revise. It comes, as always, with a free CD-ROM giving the flexibility to practice, mark, re-sit and customise MCQ exams as only QBase can. An indispensable revision aid for the final exams.

1841100765, 234 x 156 mm, est. 208pp, Paperback (with free CD-ROM), July 2004, £23.50

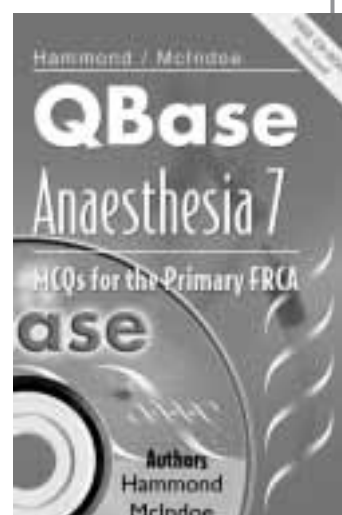

QBase Anaesthesia 7: MCQs for the Primary FRCA

Edward Hammond
 Royal Devon and Exeter Hospital, Exeter, UK and
Andrew McIndoe, Bristol Royal Infirmary, Bristol, UK

QBase Anaesthesia 7 focuses on the Primary FRCA with sets of examination papers and more than 360 questions, the candidate can use to revise. It comes, as always, with a free CD-ROM giving the flexibility to practice, mark, re-sit and customise MCQ exams as only QBase can.

1841101168, 234 x 156 mm, est. 208pp, Paperback (with free CD-ROM), September 2004, £23.50

Legal and Ethical Issues in Anaesthesia, Critical Care and Perioperative Medicine

Stuart White, Brighton and Sussex University Hospital Trust, Brighton, UK
and **Timothy Baldwin**, Barrister, Lincoln's Inn, London, UK

Clinical decisions in modern medical practice are increasingly influenced by ethical and legal issues, but few doctors have been formally trained in medical law and ethics, and are unsure of potential sources of accessible information, which leaves them exposed to public criticism and the threat of legal action. Perioperative medicine and critical care are, by their very nature, subjects in which issues of autonomy, dignity, consent, confidentiality, medical research, life and death decision making, and the rationing of health care resources are ever-present. This book provides a straightforward but comprehensive one-stop reference and should be essential reading for all medical and allied health care professionals who encounter legal problems during their management of patients.

1841102091, 234 x 156 mm, est. 208pp, Paperback, August 2004, £24.50

Recent Advances in Anaesthesia and Intensive Care 23

Jeremy Cashman and **Mike Grounds**, both at St George's Hospital, London, UK

Recent Advances in Anaesthesia and Intensive Care 23 is the latest volume in this very successful and long-established series (previously entitled *Recent Advances in Anaesthesia and Analgesia*) to present a series of cutting-edge topics for anaesthetists from some of the world's leading authorities in their subjects. As the title suggests, this volume (and the previous Volume 22) has increased input from the field of intensive care, but the emphasis will remain on producing articles of high quality and interest to the reader and providing exceptional value for money.

1841101451, 234 x 156 mm, est. 256pp, Paperback, August 2004, £29.50

Sedation and Analgesia for Beginners

Edited by **Gilbert Park**

Addenbrooke's Hospital, Cambridge, UK

A pocket-sized, practical handbook for all those involved in sedation and analgesia in the hospital setting. Its format is very similar to that of *Fluid Balance and Volume Resuscitation* and it adopts a similar approach, providing the novice reader with key information on the basic concepts and practical issues relating to the maintenance of safe and adequate sedation and analgesia.

1841100579, 190 x 115 mm, est. 150pp, Paperback, 2005, £12.50

MCQs for the Final FRCA

Khaled Elfituri and **Graham Arthurs**

Maelor Hospital, Wrexham, UK

Comprising of five year's worth of Final FRCA MCQ questions, this comprehensive MCQ book provides invaluable practice for this wide-ranging and vital part of the exam for Final FRCA candidates. Rather than grouping questions by subject, the book instead presents the MCQs in five realistically structured mixed papers of 90 questions each, to replicate the experience of the exam itself, and provide the best possible self-learning experience.

1841102121, 234 x 156 mm, est. 296pp,
Paperback, March 2004, £19.50

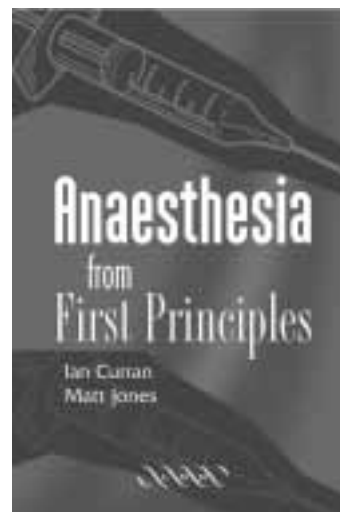

Top Tips in Anaesthesia

Edited by **Scott Brudney**

Duke University Medical Center, Durham, USA

This small book builds on the success of *Top Tips in Critical Care*, only this time it focuses on tips (and important caveats) in Anaesthesia. As with the previous volume, this one aims to enable tips that usually remain part of oral medical history as they are passed on by word of mouth, to be shared amongst a much wider audience.

1841101710, 186 x 123 mm, est. 180pp,
Paperback, November 2004, £13.00

NEW

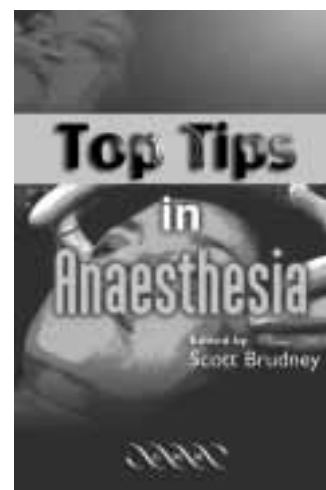

Anaesthesia from First Principles

Ian Curran, St Thomas' Hospital, London, UK and

Matt Jones, William Harvey Hospital, Ashford, UK

This concise but comprehensive book aims to provide an introductory account of anaesthesia for trainees not necessarily going on to pursue anaesthesia as a career, such as medical undergraduates, or ODAs and for related groups such as postgraduate nurses or theatre nurses and postgraduate trainees in accident and emergency medicine, all of whom require a basic knowledge of the essentials of anaesthesia.

1841101575, 234 x 156 mm, est. 180pp,
Paperback, July 2004, £14.50

KEY TEXTS

The Anaesthesia Viva: Volume 1 – Physiology and Pharmacology (2nd Edition)

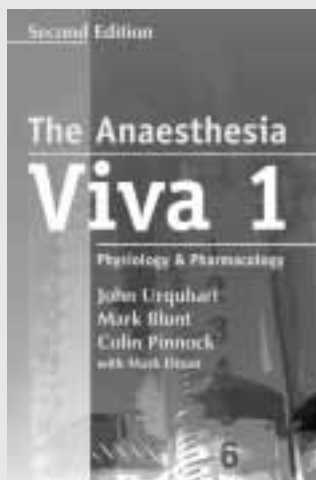

John Urquhart, West Suffolk Hospital,
Bury St Edmunds, UK and

Mark Blunt, Queen Elizabeth Hospital, King's Lynn,
UK (Edited by **Colin Pinnock**, Alexandra Hospital,
Redditch, UK)

*"A candidate who uses the questions as a stimulus
to their own thinking will get good value from it...
Would I recommend this book? Yes – particularly the
question and answer sections."*

British Journal of Anaesthesia

1841101028, 234 x 156 mm, 200pp, Paperback,
January 2003, **£26.50**

Core Cases in Critical Care

Edited by **Saxon Ridley**
Norfolk and Norwich Acute NHS Trust,
Norwich, UK

Gary Smith

Alexandra Hospital, Portsmouth, UK and

Anna Batchelor

Victoria Infirmary, Newcastle, UK

*"As an anaesthetic specialist registrar who
has taken the Final FRCA examination in
the past year, I can strongly recommend
this book to all trainees revising for this
examination."*

British Journal of Anaesthesia

1841101613, 234 x 156 mm, 264pp,
Paperback, January 2003, **£29.50**

The Anaesthesia Viva: Volume 2 – Physics, Clinical Measurement and Clinical Anaesthesia (2nd Edition)

Mark Blunt, Queen Elizabeth Hospital,
King's Lynn, UK and

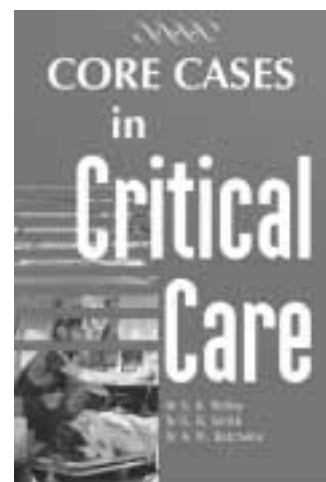

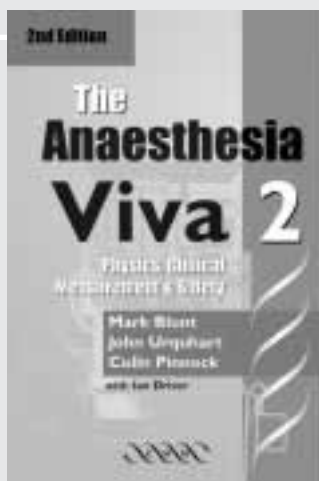

John Urquhart, West Suffolk Hospital,
Bury St Edmunds, UK
(Edited by **Colin Pinnock**, Alexandra Hospital,
Redditch, UK)

Of the first edition...

*"This book will be valuable to junior residents,
students and their teachers, for its succinct questions and answers and for its excellent
diagrams."*

Canadian Journal of Anaesthesia

1841101036, 234 x 156 mm, 164pp, Paperback, April 2003, **£26.50**

Core Topics in Cardiac Anaesthesia

Edited by **Jonathan MacKay** and
Joe Arrowsmith both at Papworth
Hospital, Cambridge, UK

This book provides a comprehensive,
easy-to-read introduction to the many
topics in cardiac anaesthesia for
postgraduate trainees undertaking a
cardiac-module as part of their training.
Edited by experts in cardiac anaesthesia
from Papworth Hospital – a centre of
excellence in the field – this book will be
an excellent aid to all anaesthesia trainees
as well as an invaluable reference for
surgical and nursing staff, ICU
professionals or Operating Department
Practitioners.

1841101338, 234 x 156 mm, est. 320pp,
Paperback, April 2004, **£35.00**

Clinical Operating Department Practice

Edited by **Andrew Skinner**, **Colin Ince**,
Barbara Strong and **Edmund Whelan**
all at Whiston Hospital, Merseyside, UK

Building on the success of *Fundamentals of
Operating Department Practice* this important new
title aims to provide practising theatre staff and
trainees alike with a comprehensive understanding
of anaesthesia, surgery and recovery that will enable
them to carry out their professional roles in
operating department practice to the highest
possible standards.

1841100897, 246 x 189 mm, est. 400pp, Hardback,
September 2004, **£49.50**

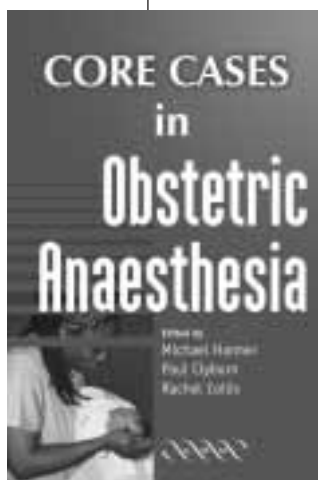

Core Cases in Obstetric Anaesthesia

Edited by **Mike Harmer**,
Paul Clyburn and
Rachel Collis
all at University Hospital of
Wales, Cardiff, UK

A useful title for trainee and practising anaesthetists as well as intensive care specialists, focusing on key topics that will be encountered in day-to-day practice. Written by clinicians with many years experience, *Core Cases in Obstetric Anaesthesia* presents key concepts in a new way that can serve as a platform for discussion of key aspects of patient care or a means of assessment and appraisal of current practice.

1841101605, 234 x 156 mm, est. 208pp,
Paperback, November 2003, **£29.50**

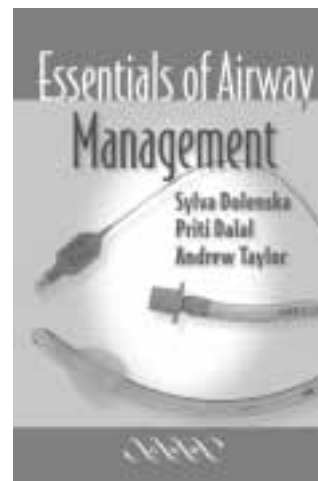

Essentials of Airway Management

Sylva Dolenska, **Andrew Taylor** and **Priti Dalal**
all at William Harvey Hospital, Ashford, Kent

Competent airway management is a crucial skill for any anaesthetist – an inability to handle the airway can lead at best to abandoning the case, and at worst, to death. This book is an essential guide to airway management for trainee anaesthetists and intensivists, operating department practitioners and recovery nurses. It is designed to be non-intimidating, and to cover the necessary essentials in such a way as to be easily accessible and readily understood by the new trainee or busy nurse without the time to trawl large textbooks for information. Emphasis is given to the basics of airway assessment

and how to handle vital emergency procedures and the difficult airway – all situations that will be familiar in any hospital. More advanced topics, such as fiberoptic intubation, are also briefly covered, to give an insight into how they can add to more routine techniques.

1841101532, 186 x 123 mm, est. 150pp, Paperback,
February 2004, **£17.50**

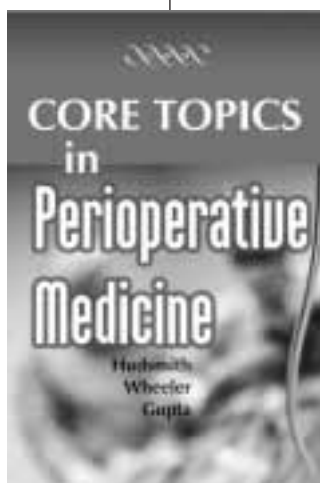

Core Topics in Perioperative Medicine

Edited by
Jonathan Hudsmith
Peterborough Hospitals
NHS Trust,
Peterborough, UK,
Dan Wheeler
University of
Cambridge, UK and
Arun Gupta
University of
Cambridge, UK

Core Topics in Perioperative Medicine provides concise, informative chapters on many aspects of perioperative medicine, allowing medical students to bridge the gap between final year clinical attachments in this specialty, and first year house officer jobs. It aims to guide the reader through the perioperative period via short, up-to-date chapters, each giving a comprehensive account of the subject and its relevance to perioperative medicine.

1841101397, 234 x 156 mm, est. 256pp,
Paperback, February 2004, **£19.50**

Essentials of Paediatric Intensive Care

Charles Stack, Sheffield Children's Hospital, UK and
Patrick Dobbs, Royal Hallamshire Hospital, Sheffield, UK

Essentials of Paediatric Intensive Care covers all of the key aspects of paediatric intensive care and features a comprehensive list of drugs commonly used for premedication, anaesthesia, local anaesthesia, analgesia, cardiac anaesthesia, antibiotics, emergency and resuscitation drugs, inotropes, 'new' drugs (e.g. calcium infusions and epoprostenol). It will be an essential handbook for trainee and practising anaesthetists, paediatric intensive care nurses, paediatric accident and emergency staff and theatre ODAs.

1841100536, 186 x 123 mm, est. 230pp, Paperback, February 2004,
£14.50

Fundamentals of Perioperative Management

David Green, **Stuart White** and **Max Ervine** all at King's College Hospital, London, UK

This new title provides a concise, one-stop reference for anaesthetic trainees, surgical trainees and medical undergraduates, on the key topics in modern perioperative patient management, including detailed coverage of the essential physiological and pharmacological principles underlying basic perioperative skills. Essential topics such as antibiotics, fluid balance, DVT prophylaxis, pain management, drug pharmacology and respiratory failure, to name but a few, are all covered in detail, and in each case their effect on perioperative management is emphasized.

1841101354, 246 x 189 mm, 320pp, Paperback, June 2003, **£32.50**

KEY TEXTS

Fundamentals of Anaesthesia (2nd Edition)

Edited by **Colin Pinnock**, **Tim Smith**, both at Alexandra Hospital, Redditch, UK and **Ted Lin**, Glenfield Hospital, Leicester, UK

This is a fully updated and expanded edition of a best selling title that reflects all recent changes to the FRCA primary examination. New chapters cover Foetal and Newborn Physiology and Clinical Trials, and more information is included in expanded Physics and Clinical Measurement chapters.

Now available in both paperback and hardback

Of the first edition...

"It is a strength of the author team that they have been confident enough to leave out rather than include material. As stated earlier, this has been due to the fact that it has been written with the FRCA in mind, and they have successfully achieved this outcome. It is also an extremely useful addition to nursing libraries as a reference source, for those embarking on further study at degree and diploma level in anaesthetic and recovery nursing." **British Journal of Anaesthetic and Recovery Nursing**

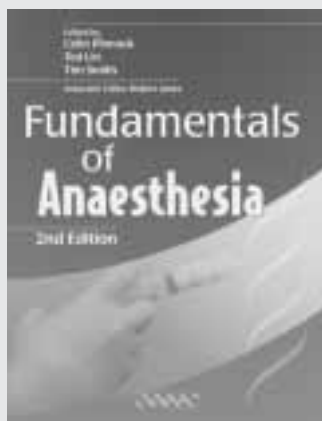

"The strength of this book is the readability of the text, coupled with important information being encapsulated in a single tome. If you don't own the first edition, this edition is a worthwhile investment and might save you some exam fees. For those of us whose basic science seems a distant memory, it provides easy access to all those complicated facts."

Hospital Doctor

1841101141, 246 x 189 mm, 952pp, Paperback, January 2003, **£57.50**

1841101222, 246 x 189 mm, 952pp, Hardback, January 2003, **£90.00**

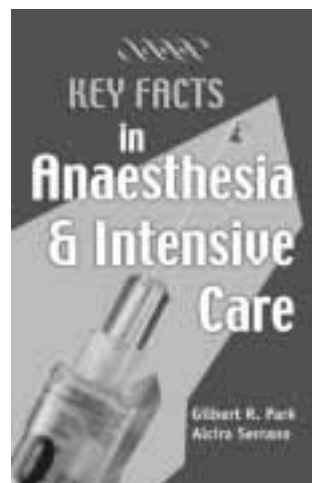

*** **Highly Commended – BMA Medical Book Awards, 2003** ***

**Key Facts in Anaesthesia and Intensive Care**

Gilbert Park and **Alicia Serrano Gomez**, both at Addenbrooke's Hospital, Cambridge, UK

This pocket-sized book is an essential companion for all anaesthetists, intensive care specialists, intensive care nurses or any other healthcare professional working in the perioperative or intensive care environment. It provides a readily available source of information and guidance, mostly in the form of easy-to-follow tables, line drawings and flow diagrams, on many aspects of anaesthesia and intensive care, including normal values for common biochemical and haematological tests (and their interpretation), resuscitation protocols, equipment checklists, paediatric information and dosage differences, ventilation, sedation and analgesia and classification systems such as the APACHE II and Glasgow Coma Scales.

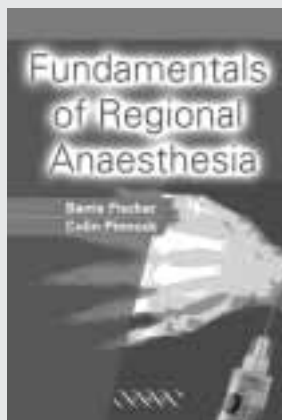

1841101753, 186 x 123 mm, 64pp, Paperback, January 2003, **£12.50**

**Fundamentals of Regional Anaesthesia**

Barrie Fischer and **Colin Pinnock**, both at Alexandra Hospital, Redditch, UK

This superbly illustrated book provides a comprehensive overview of all aspects of regional anaesthesia for the trainee and practising anaesthetist alike. Written by a team of experts who are well known in the field of regional anaesthesia, the book is structured logically, with essential anatomy being followed by indications and then the block techniques themselves, all sections being organised by region of the body, for ease-of-reference.

1841101265, 246 x 189 mm, est. 350pp, Hardback, July 2004, **£65.00**

**Percutaneous Tracheostomy: A Practical Handbook**

Henry Paw, York District Hospital, York, UK and **Andrew Bodenham**, Leeds General Infirmary, Leeds, UK

This well illustrated, practical text provides the newcomer to percutaneous tracheostomy with a perfect introduction to this increasingly widely used technique. It provides an overview of the history of the technique, the basic anatomy of relevance to the user, and the indications and contraindications for its use, and goes on to describe the key advantages of the technique over other methods, which kits are currently available for use (and their relative merits), equipment and aids for percutaneous tracheostomy and the anaesthetic techniques involved. It finishes with an important section on potential complications, patient follow-up and expert hints and tips.

1841101427, 246 x 189 mm, est. 224pp, Hardback, June 2004, **£35.00**

KEY TEXT

Pharmacology for Anaesthesia and Intensive Care (2nd Edition)

Tom Peck

Poole Hospital, Poole, UK

Sue Hill

Southampton University Hospital,
Southampton, UK and

Mark Williams

Royal Hampshire County Hospital,
Winchester, UK

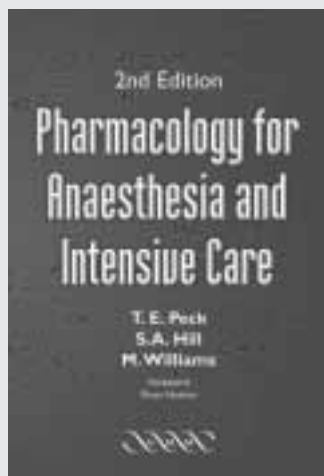

Pharmacology for Anaesthesia and Intensive Care continues to provide its readers with the clearest, most concise and comprehensive coverage of all aspects of pharmacology for junior and trainee anaesthetists (particularly those sitting the FRCA primary examination), critical care nurses and all healthcare professionals working in theatre, accident and emergency departments or intensive care units. The new edition of this bestselling book has been fully updated and expanded, with additional contributions from experts in the field, to include all new drugs available to the anaesthetist and intensive care specialist.

Review of the first edition...

"I am sure that the book will be well used by both examiners and examination candidates, as well as others in anaesthesia and intensive care. I would certainly recommend that a copy finds its way into every departmental library."

British Journal of Anaesthesia

1841101664, 234 x 156 mm, 392pp,
Paperback, June 2003, £29.50

Physiology for Anaesthesia and Intensive Care

Maheesan Nirmalan, Manchester Royal Infirmary, Manchester, UK

An understanding of physiology is key to the practice of anaesthesia, and this book adopts a problem-based approach to cover all aspects of physiology that are relevant to the anaesthetic trainee, from the essentials of neurotransmission to the physiology of pregnancy, and how this affects anaesthetic practice. The perfect companion to *Pharmacology for Anaesthesia and Intensive Care*.

1841101443, 234 x 156 mm, est. 256pp Paperback, July 2004, £24.50

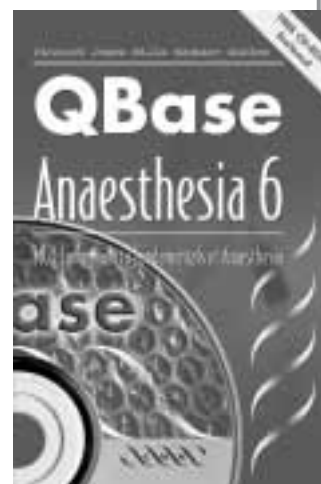

QBASE

QBase Anaesthesia 6: MCQ Companion to Fundamentals of Anaesthesia

Colin Pincock, Robert Jones, Simon Mills, Simon Maguire and Julian Barker

This volume has been part-written and edited by the editors of *Fundamentals of Anaesthesia – 2nd Edition*. As well as the usual QBase features that allow candidates to practice, mark, re-sit and infinitely customize MCQ examinations using the free QBase CD-ROM, this volume has the added value of being cross-referenced throughout to *Fundamentals of Anaesthesia – 2nd Edition*.

1841100986, 234 x 156 mm, est. 208pp, Paperback (with free CD-ROM),
March 2004, £23.50

Recent Advances in Anaesthesia and Intensive Care 22

Edited by **Anthony Adams**

Guy's Hospital, London, UK,

Mike Grounds and Jeremy Cashman

both at St George's Hospital, London, UK

"I am sure that the book will be well used by both examiners and examination candidates, as well as others in anaesthesia and intensive care. I would certainly recommend that a copy finds its way into every departmental library."

British Journal of Anaesthesia

"This book offers good value for money and I would recommend it to trainees with a year's experience in anaesthesia, and to consultants."

Hospital Doctor

1841101176, 234 x 156 mm, 322pp, Paperback, January 2003, £24.50

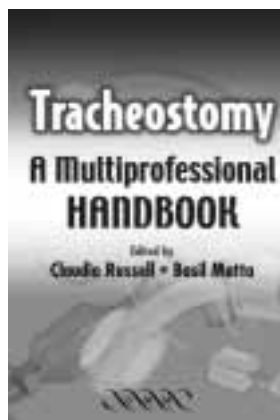

Tracheostomy: A Multi-Professional Handbook

Edited by **Claudia Russell** and **Basil Matta**
both at Addenbrooke's Hospital, Cambridge, UK

Tracheostomy: A Multi-Professional Handbook is written by a multidisciplinary team of authors to give a unique perspective of this widely used technique and will support research-based care and management and deliver patient-focused rehabilitation. It covers everything from the basics of tracheostomy, through the indications for percutaneous tracheostomy and all aspects of pre-, peri- and postoperative care of the patient. The latter forms a large part of the book, and focuses on issues of importance to a broad spectrum of healthcare professionals, such as how patient communication is affected by long-term tracheostomy and how optimum wound care during tracheostomy is best achieved, as well as the practical aspects and problems encountered with speech, swallowing and general rehabilitation, nutrition, weaning and decannulation and long-term tracheostomy, tracheostomy in children.

1841101524, 234 x 156 mm, est. 376pp, Paperback, February 2004, £19.50

The Clinical Anaesthesia Viva Book

Simon Mills, Julian Barker and
Simon Maguire, all on the Northwest Rotation, UK

"I thought this was a very useful book for those studying for the final Fellowship examination. I would find this a useful basis for practice vivas as well as a reference for in-theatre discussions about typical patients. As an examiner, I have learnt from this book and have found a few new questions to ask candidates. For those studying for the final FRCA, I would suggest that at this price this book represents an excellent investment."

QBASE

QBase Medical Sciences: 1

Edward Hammond, Royal Devon and Exeter Hospital, Exeter, UK
and **Andrew McIndoe**

Bristol Royal Infirmary, Bristol, UK

An understanding of basic sciences underpins all medical specialties and although basic sciences are studied early in training, by the time of postgraduate exams, they have often been forgotten. This QBase title gives the candidate the chance to test themselves with MCQs on Medical Sciences with all the advantages the QBase software offers.

1841100773, 234 x 156 mm, est. 208pp, Paperback (with free CD-ROM), June 2004, £23.50

QBASE

QBase Undergraduate MB

Edward Hammond

Royal Devon and Exeter Hospital, Exeter, UK

Andrew McIndoe

Bristol Royal Infirmary, Bristol, UK

and **Raymond McCrudden**

Royal Bournemouth Hospital, Bournemouth, UK

Using the powerful QBase examination practice and analysis software, this MCQ book and its accompanying CD-ROM forms the perfect MCQ self-assessment tool for all undergraduate medical trainees. The CD-ROM can be installed in seconds and gives the reader an incredible range of options, greatly increasing the utility and value of the book. Not only can the reader practice the set exams, but the program will mark these exams, allow the reader to customize exams to focus in on areas requiring further revision, shuffle the stems (A–E) to prevent the candidate from memorizing ‘patterns’ and advise on examination strategy. It also has the facility to print out and store test results and provide helpful notes on each question.

Forensic Medicine: Clinical and Pathological Aspects

Edited by **Jason Payne-James**, Central Middlesex Hospital, London, UK

Anthony Busuttill, University of Edinburgh, UK and

William Smock, University of Louisville Hospital, USA

This edited, multi-author, multi-national book provides state-of-the-art information about the forensic aspects of medicine and related fields for all those involved in the clinical and pathological forensic aspects of the care, assessment, investigation and diagnosis of victims, perpetrators and assailants and others involved in police or judicial systems. Each chapter is written by an acknowledged specialist and established authority within the particular field and this book will become the standard reference work on the forensic aspects of forensic medicine and healthcare.

"I recommend this up-to-date and comprehensive book to all of those who are engaged in forensic science fields with much confidence, as a special reference source and practical guidelines in daily works."

Legal Medicine

"The price should come as no surprise, but if you are in the business it is worth every penny. A production of excellent quality, it fills a gap in modern forensic medical literature."

Medicolegal Journal

"This is a worthwhile volume for all medical libraries serving physicians and surgeons, not only those in forensic areas, but also in primary and secondary care."

Hospital Doctor

The Medico-Legal Back: An Illustrated Guide**Robert Dickson and Paul Butt**

both at St James's University Hospital, Leeds, UK

Written by an orthopaedic surgeon of world renown and a radiologist colleague, *The Medico-Legal Back* is the first book to address all aspects of the subject for both a legal and medical readership, in a clear, concise and reader-friendly style. It does away with the need to search for and then extract complex information from many different sources, and as such will be an indispensable guide to this economically important problem for all orthopaedic surgeons, lawyers, judges and other medicolegal experts. It will also prove invaluable to members of the medical insurance industry as a straightforward one-stop reference text to clarify complex cases and save time and money by doing so.

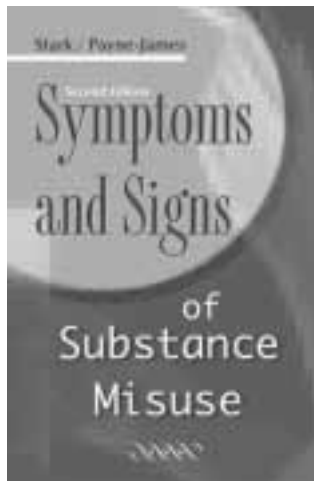

1841101672, 246 x 189 mm, est. 220pp, Hardback, March 2004, £49.50

Symptoms and Signs of Substance Misuse (2nd Edition)**Margaret Stark, St George's Hospital, London, UK,
Jason Payne-James, Central Middlesex Hospital,
London, UK**

This new edition follows the same logical structure as the first, but has been fully updated to reflect current diagnostic methods and treatment practice. All legal aspects in the book have also been brought completely up-to-date. It will serve as the perfect guide for medical personnel handling cases of suspected substance misuse or as a valuable quick reference for police officers and other legal personnel involved in dealing with suspects or members of the general public who may be under the influence of unknown substances.

"The second edition of Symptoms and Signs of Substance Misuse is a handy pocket-sized reference, which provides an up-to-date, accessible and authoritative guide to symptoms of treatment for many of the most commonly encountered substances such as heroin, cocaine, amphetamines, cannabis, alcohol and ecstasy."

Caring for Patients with Vascular Disease: A Practical Approach for Nursing and Medical Staff

Edited by **Sharon Goodall** and **Haytham Al-Khaffaf**, both at Burnley Healthcare NHS Trust, UK

This book offers a practical, step-by-step guide to caring for patients with vascular disease in a variety of clinical settings. It follows a patient's path of care from management in the outpatient clinic, through to the hospital ward, theatre, and recovery room and back to the follow-up outpatient clinic. A clear, concise format is used throughout the book, with reference to evidence-based interventions and the physiology underpinning them, and the use of simple line diagrams and treatment flow charts to illustrate the essential aspects of care. Edited by a nurse and a vascular surgeon, with contributions from a group of invited authors, the book reflects the multidisciplinary nature of patient care and will be a valuable resource for nurses, surgeons and other healthcare professionals involved in caring for this patient group.

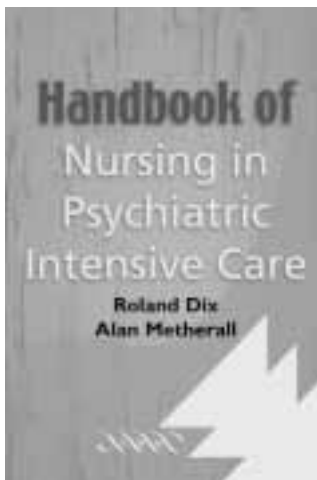

1841101982, 234 x 156 mm, est. 256pp, Paperback, August 2004, £22.50

Handbook of Nursing in Psychiatric Intensive Care

Roland Dix and **Alan Metherall**, both at Greyfriars PITU, Gloucester, UK

The Handbook of Nursing in Psychiatric Intensive Care provides an evidence-based guide to practical nursing in such environments, and covers all aspects of the subject from the history of inpatient nursing through the practicalities of developing an operation policy, the components of the clinical management framework, risk assessment, organisation of nursing procedures, completing reports and assessments, guidelines for dealing with complex clinical scenarios and the therapeutic options available in the inpatient setting.

1841101257, 234 x 156 mm, est. 208pp, Paperback, 2005, £19.50

Independent & Supplementary Prescribing: An Essential Guide

Edited by **Molly Courtenay**, Lecturer, University of Southampton, UK & Joint Prescribing Advisor, Royal College of Nursing and **Matthew Griffiths**, Senior Lecturer, School of Health Studies, Homerton College, Cambridge, UK & Joint Prescribing Advisor, Royal College of Nursing

Prescribing and medicines management is one of the most common interventions in health care delivery and in the future will become part of the role of many thousands of nurses, pharmacists and other professions allied to medicine. *Independent and Supplementary Prescribing: An Essential Guide*, is the first book of its kind and explores a number of key areas for prescribers, including the ethical and legal issues surrounding prescribing, the psychology and sociology of prescribing, prescribing within a public health context, evidence-based prescribing, prescribing within a team context, basic pharmacology, monitoring skills and drug calculations. Each of these topics is written by a recognised expert in the field and will provide readers with the theoretical underpinning upon which safe and effective prescribing is based.

Cancer Chemotherapy: A Practical Manual for Nurses

Janice Middleton, Southampton University, UK and
Louise Hooker, Southampton General Hospital, UK

The NHS Cancer Plan is the driving force for developments in cancer practice and service delivery in the United Kingdom. The Manual of Cancer Services Standards requires that practitioners caring for people receiving chemotherapy have knowledge and skills that meet a specific standard. This book provides, in an accessible format, the core knowledge required to meet these standards. Principles of good practice are highlighted throughout, as is the evidence base for current treatment practices, which allows differences in local policies and practice to be taken into account and provides a useful basis on which to re-think local practices if necessary.

Client Profiles in Nursing: Adult and the Elderly 2

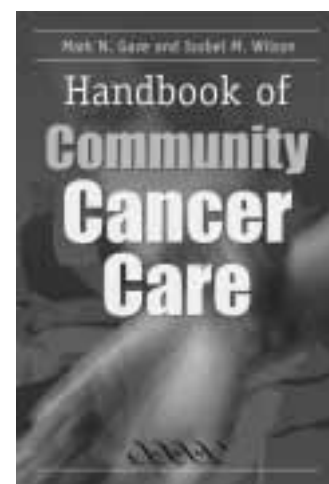

Edited by **Sam Parboteeah** and
Penny Tremayne, both at De Montfort University,
 Leicester, UK
 (Series Editor: **Penny Simpson**,
 University of Southampton, UK)

This book addresses the needs of the undergraduate nurse by presenting a series of classic case studies in nursing, in the adult and elderly population. Each case follows a standardized layout for ease of reference and includes photographs or clear line diagrams where appropriate, to illustrate key points.

1841101508, 234 x 156 mm, 256pp, Paperback, May 2003, £14.99

**Handbook of Community Cancer Care**

Mark Gaze, The Middlesex Hospital, London, UK and **Isobel Wilson**, General Practitioner, Edinburgh, UK

Handbook of Community Cancer Care provides comprehensive, concise and authoritative coverage of the management of all types of cancer, with an emphasis on those aspects of care of the cancer patient which are of particular interest in the community, such as the presentation of cancer and palliative care. The specialist management of different types of cancer is also covered, with particular regard paid to the requirements of shared care in the community and the supportive care needed for the treatment of side effects and complications. The dual authorship of a hospital-based physician and general practitioner gives a balanced perspective on every issue.

Manual of Diagnostic Antibodies for Immunohistology (2nd Edition)**Anthony S-Y Leong**

Newcastle University, Newcastle, NSW, Australia

Kumarasen Cooper

University of Vermont, Burlington, Vermont, USA and

F Joel W-M Leong

University of Oxford, UK

This fully revised, expanded and updated edition provides a comprehensive list of antisera and monoclonal antibodies that have useful diagnostic applications in tissue sections and cell preparations. Various clones, which are commercially available to detect the same antigen, are listed and the sensitivities and specificities of the antibodies are discussed. Importantly, the authors, all pathologists with a wealth of experience in immunostaining procedures, provide fully referenced details and expert advice on each reagent that the reader will find invaluable. The comprehensive appendices provide easily accessible and clear summaries of selected antibody panels for specific diagnostic situations, and a useful reference to the websites of the main antibody suppliers.

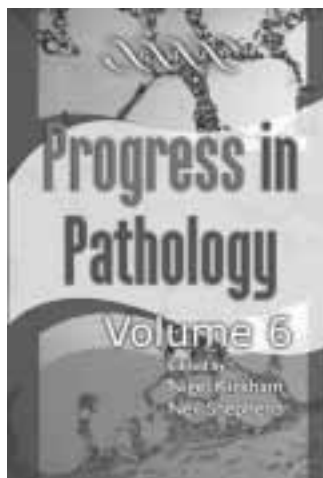

Of the first edition...

"It is a volume to be consulted by the pathologist and the biomedical scientist when confronted with a specific problem or when considering purchase of new and expensive antibody."

Practice Development in Mental Healthcare

Stephen Pereira

Goodmayes Hospital, Essex & Guy's & St. Thomas' School of Medicine, London, UK

Colum Clinton

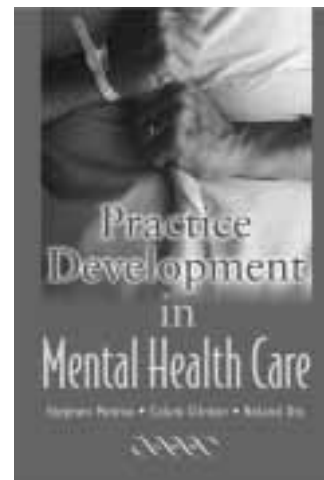

Goodmayes Hospital, Essex, UK and

Roland Dix

Greyfriars PITU, Gloucester, UK

Pragmatic and practical in approach, this book meets the need for 'real world' guidance in practice development for clinicians and managers to enable them to substantially improve standards from an economic, educational, practice, and clinical care perspective. It uses descriptions from the real world process of practice development at the sharp end of acute psychiatry within a psychiatric intensive care unit, which resulted in substantial improvements in patient, staff and referrer satisfaction, to illustrate the most important 'take home' points. It is an essential resource for practitioners and managers working the mental healthcare setting.

Psychiatric Intensive Care (2nd Edition)

Edited by **Dominic Beer**

Bracton Centre, Kent, UK

Stephen Pereira

Goodmayes Hospital, Essex & Guy's & St. Thomas' School of Medicine, London, UK and

Carol Paton

Bracton Centre, Kent, UK

Significantly expanded and updated from the first edition, this book is essential reading for all healthcare professionals and managers involved in the care of the mentally ill patient, particularly in the intensive care environment. New chapters include: Interface with General Psychiatry, Interface with Learning Difficulties, Interface with the Child and Adolescent, Interface with Substance Misuse, Interface with Social Work, User and Carer Issues, Legal Issues and National Standards and Good Practice in Psychiatric Intensive Care.

Of the first edition...

"I strongly recommend this book because it offers good value, in terms of cost and content. It should have wide appeal to a multi-disciplinary audience. It is soundly researched, ably constructed and well written."

Mental Health Practice

"The editors deserve much congratulation. The book is packed full of extremely sensible advice on how to manage difficult clinical problems in the most challenging of patients."

**Imaging in SARS**

Edited by **Anil Ahuja** and **Clara Ooi**
 both at the Department of Diagnostic Radiology & Organ
 Imaging,
 The Chinese University of Hong Kong

As recent news reports from around the world have highlighted, severe acute respiratory syndrome (SARS) is a devastating disease, with the potential to wreak havoc wherever it breaks out. Hong Kong has been significantly impacted in the recent SARS outbreak, and clinicians and researchers alike have gained a lot of experience in dealing with the disease at short notice. There is thus a huge reservoir of experience in Hong Kong and this new book aims to be a state-of-the art update on SARS, with particular reference to imaging, which plays a crucial role in the diagnosis, management and follow-up of patients with the disease (it is widely accepted that SARS patients cannot be managed without imaging and it is included in the WHO's own list of diagnostic criteria for the disease).

 University Hospital, Leeds, UK

The fully updated edition of this key text for ultrasonographers provides the trainee and practising sonographer, radiologist and gynaecologist alike with a detailed and accessible guide to the techniques and diagnostic applications of this rapidly developing specialty. Written by a multidisciplinary team, and edited by one of the country's best-known sonographers (and president of the British Medical Ultrasound Society), it focuses on the principles of best clinical practice, the key topics and the common problems encountered as the technologist and clinician acquire the fundamental skills of equipment selection and image optimisation. Throughout, theoretical aspects are placed in their practical context and, in addition to full discussion of technical and diagnostic aspects, the important holistic view of patient care, including current treatment options, is emphasised. Up-to-date and profusely illustrated, it will also serve the established practitioner as a clear and authoritative quick reference.

 Paperback, November 2004, £35.50

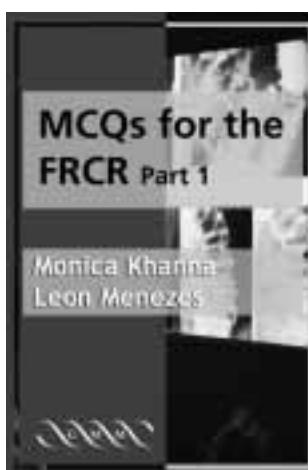

MCQs for the FRCR Part 1

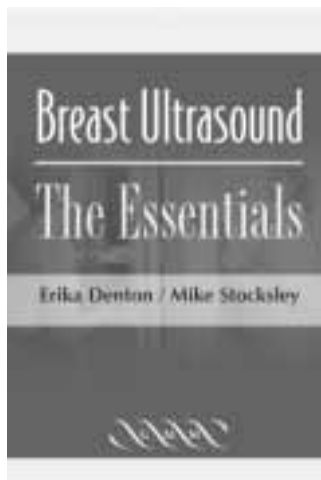

Monica Khanna, **Leon Menezes** and
David Gallagher

all at the Department of Clinical Radiology, Guy's and St
 Thomas' Hospitals, London

This book is the perfect revision tool for candidates sitting the FRCR Part 1 examination and will also prove useful for those who need to acquaint themselves with the new IRMER (Ionizing Radiation (Medical Exposure)) regulations such as radiologists, cardiologists and anyone using ionizing radiation in any form for medical purposes. The book provides 125 questions, in 7 individual examination papers of 25 questions, all with detailed explanatory model answers, checklists and some with diagrams to aid understanding.

1841102148, 234 x 156 mm, est. 172pp, Paperback, April 2004, £22.50

FORTHCOMING

Breast Ultrasound: The Essentials

Erika Denton

Norfolk & Norwich University Hospital NHS Trust, UK
and **Mike Stocksley**
South Bank University, London, UK

This superbly illustrated text begins with an introduction to the equipment used and techniques needed to successfully image breast tissue, and then goes on to present about 60 'classic', fully illustrated cases that might be encountered by the radiologist or sonographer, including a few rarer cases or cases that could easily be misinterpreted. In each case, clear images are provided, and the explanatory text takes a

problem-based approach to guide the reader through the important features of interest and diagnostic points, key aspects of imaging technique, anatomy and mammographic and pathological correlations where appropriate.

1841101761, 234 x 156 mm, est. 140pp, Paperback, November 2004, £22.50

Diagnostic Ultrasound: Physics and Equipment

Edited by **Peter Hoskins**, University of Edinburgh, UK

Abigail Thrush

St Bartholomew's and the London NHS Trust, UK

Kevin Martin

University Hospitals of Leicester NHS Trust, UK

Tony Whittingham

Newcastle upon Tyne Hospitals NHS Trust, UK

Diagnostic Ultrasound: Physics and Equipment is an essential purchase for anyone with an interest in diagnostic ultrasound imaging. Written and edited by a team of expert contributors, its level of coverage is appropriate for both trainee and practising sonographers and other users of clinical ultrasound in general, and it will also serve as a valuable first reference for medical physicists and engineers. The book aims to be comprehensive, but also as user-friendly as possible. It demystifies the complex techniques in current use by focusing on their function as opposed to their detailed signal processing and mathematical analysis is minimized throughout.

1841100420, 246 x 189 mm, 256pp, Paperback, January 2003, £35.00

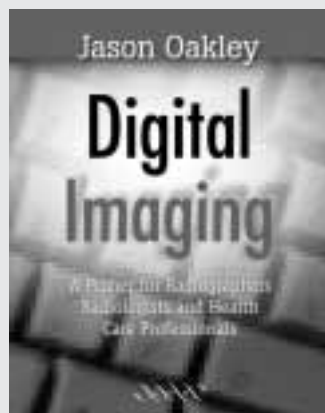

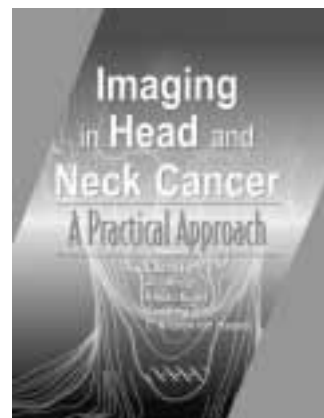

Imaging in Head and Neck Cancer: A Practical Approach

Edited by **Anil Ahuja**, **C Andrew van Hasselt**, **Ann King**

all at The Chinese University of Hong Kong
and **Rhodri Evans**
Morriston Hospital NHS Trust, Swansea, UK

This concise integrated handbook looks at all available imaging methods for head and neck cancer, highlighting the strengths and weaknesses of each method. The information is provided in a clinical context and will guide radiologists to the information the clinician actually needs when managing a patient with head and neck cancer. It will also provide the clinician with a sound understanding of the advantages and limitations of imaging. Initial chapters aim to give the reader a core knowledge, which can be used in imaging by the various methods described. Subsequent chapters are directed towards clinical problems and deal with the common cancers in a logical order.

Hardback, July 2003, £35.00

Digital Imaging: A Primer for Radiographers, Radiologists and Healthcare Professionals

Edited by **Jason Oakley**

University of Portsmouth, UK

This is the first book to fulfil the need of the modern radiographer and radiologist to understand how digital imaging, manipulation and storage systems actually work on a practical level. It explains the equipment and principles behind computers in radiology, and will also serve as an invaluable reference for radiologists and radiographers in understanding how digital imaging systems function and for the managers and the information technologists who are responsible for purchasing and installing the equipment. The book is illustrated in full colour throughout and features a series of MCQs to test the reader's knowledge and to enhance its use as a self-learning and staff training tool.

Applied Surgical Anatomy Vivas

Justin Flatt, Medical Division, UK Civil Aviation Authority Safety Regulation Group

This is the latest in series of books aimed at the MRCS viva examination, and follows the same successful format as the hugely popular *General Pathology Vivas*, *Surgical Critical Care Vivas* and *Applied Surgical Physiology Vivas*. It provides MRCS candidates with a means of practising some of the most common questions that they will be asked in their viva examinations, with detailed model answers illustrated with simple, easily reproducible diagrams to highlight key points where necessary. Pocket-sized, for portability, and packed with useful information in an easy-to-use A-Z format, this book will help the reader to broaden their knowledge base and, by practising the questions, gain confidence in their examination technique. Further volumes will cover the remaining viva topics of principles of surgery and operative surgery.

1841102024, 186 x 123 mm, est. 208pp, Paperback, July 2004, £22.50

Clinical Scenarios in Surgery

Aljafri Majid, University of Malaya, Kuala Lumpur, Malaysia

With recent changes to the MRCS examination structure, the importance of clinical scenarios as a teaching tool has increased. *Clinical Scenarios in Surgery* gathers together a number of classic surgical problems in a concise and standardised format and offers a framework on which to base teaching and inform practice. Whilst principally aimed at postgraduate surgeons in training, this book will also appeal to tutors and candidates involved in undergraduate examinations in surgery.

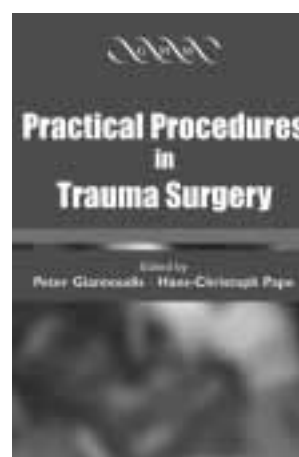

1841100951, 234 x 156 mm, est. 160pp, Paperback, October 2004, £22.50

Practical Procedures in Trauma Surgery

Edited by **Peter Giannoudis**, St James's University Hospital, Leeds, UK and **Hans-Christoph Pape**, Hannover Medical School, Germany

This book covers the trauma procedures that a trainee is expected to be able to perform during his basic surgical training in trauma and orthopaedics. It is designed as an operative atlas of the most common fracture fixation procedures and concisely but comprehensively summarises all aspects of each surgical procedure from indications, radiological investigations, pre-operative planning, positioning of the patient in theatre, the approach to be used, reduction techniques, common pitfalls and postoperative mobilization, right through to follow up in the outpatient clinic. The necessary surgical instrumentation and implant(s) required to perform each procedure are also covered, as are any possible complication. Superbly reproduced pre- and postoperative radiographs enhance the understanding of the operative procedure and clear photographs taken at key stages of each procedure illustrate the operations themselves.

1841102032, 246 x 189 mm, est. 300pp, Paperback, October 2004, £39.50

FORTHCOMING

Principles of Surgery Vivas

Rupen Dattani, Royal National Orthopaedic Hospital, Stanmore, Middlesex and
Ridzuan Farouk, Royal Berkshire Hospital, Reading

Principles of Surgery Vivas follows the same format as the hugely popular *General Pathology Vivas*, *Surgical Critical Care Vivas* and *Applied Surgical Physiology Vivas*. It gives candidates a means of practising some of the most common questions that they will be asked in their viva examinations, with detailed model answers and diagrams to highlight key points where necessary. Pocket-sized, for portability, and packed with useful information in an east-to-use A-Z format, this book will help the reader to broaden their knowledge base and gain confidence in their examination technique.

1841102113, 186 x 123mm, est. 192pp, Paperback, December 2004, £24.50

Viva Tutorials for Surgeons in Training

Reuben Johnson, Department of Human Anatomy & Genetics, University of Oxford
Anant Krishnan, Department of Radiology, University of Cambridge,
Leon Menezes, Department of Radiology, Guy's and St Thomas' Hospitals, London,
Bijan Moderai, Department of Surgery, Guy's and St Thomas' Hospitals, London,
Paul Patterson, Department of Orthopaedics, Durham Hospitals, Northumberland,
Alexis Scizas, Department of Surgery, Luton Hospitals NHS Trust, Luton and
Arun Sahai, Department of Urology, Guy's and St Thomas' Hospitals, London

This book is designed specifically for candidates preparing for the MRCS Viva examination. The format of the viva exam has been used in the book's structure, with over 1000 questions to illustrate the key points of over 200 topics. Each chapter begins with a check-list of the main topics and themes covered by the exam. Key 'pass-or-fail' concepts are covered in all areas, and in many cases, topics are covered in additional detail.

1841102156, 234 x 156 mm, est. 300pp Paperback, July 2004, £29.50

Surgical Anatomy of the Heart (3rd Edition)

Benson Wilcox, University of North Carolina, Chapel Hill, USA and **Robert Anderson**, University College London, UK

The third edition of what has become a classic textbook for cardiac surgeons, cardiologists, surgical pathologists, radiologists and anaesthetists, all of who should have some knowledge of cardiac anatomy and the intricacies of cardiac structures. Like the first two editions, the quality of the photography is unsurpassed, and most photographs are also accompanied by detailed explanatory line drawings (all produced specifically for the book) to highlight key structures and points of interest.

Of previous editions...

"Intra-operative colour photographs and preserved specimens are employed so effectively that the reader cannot fail to comprehend the useful messages being transmitted."

Critical Care Medicine

"Beautifully produced, it will surely be studied and re-studied by cardiac surgeons everywhere."

Annals of the Royal College of Surgeons of England

1841100285, 276 x 219 mm, est. 208pp, Hardback, December 2004, £135.00

KEY TEXT

Advanced Surgical Practice

Edited by **Aljafri Majid**, University of Malaya, Kuala Lumpur, Malaysia and
Andrew Kingsnorth, Plymouth Postgraduate Medical School, Derriford Hospital, Plymouth, UK

Edited by the same team that produce the acclaimed *Fundamentals of Surgical Practice* and *Principles of Surgical Practice*, this new, all-encompassing text for the general surgical trainee completes the trilogy of titles that cover all aspects of the surgical postgraduate examinations, from primary to the exit exam. All surgical trainees should have these titles on their shelves.

"Trainees seeking to sit the exit FRCS in general surgery will find this volume comprehensive enough for their requirements... the authors are to be congratulated on producing a book that is instructive and pleasant to read."

Journal of the Royal Society of Medicine

***** HIGHLY COMMENDED – SOCIETY OF AUTHORS & RSM MEDICAL BOOK AWARDS 2003 *****

Anatomy Tutor for Surgeons in Training

Reuben Johnson, Guy's, King's and St Thomas's UK

Based on the author's own tutorials and dissection sessions during basic surgical training, this invaluable guide to surgical anatomy should be an essential purchase for all postgraduate surgical trainees, and undergraduates as well. Fully illustrated with clear line diagrams drawn exclusively for this book, and with detailed MCQ questions and answers throughout, it is the perfect self-assessment tool and provides the surgical trainee with an essential guide to this important part of their training.

1841101362, 234 x 156 mm, 176pp, Paperback, January 2003, £22.50

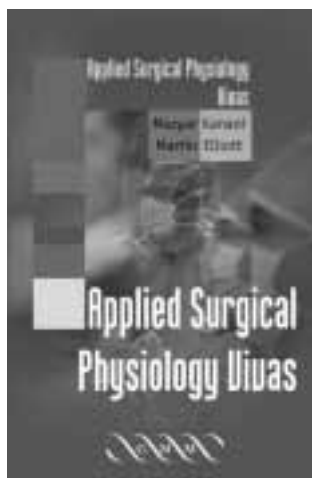

Applied Surgical Physiology Vivas

Mazyar Kanani and **Martin Elliott**

both at Great Ormond Street Children's Hospital,
London, UK

This book follows the same format as the hugely popular *General Pathology Vivas* and *Surgical Critical Care Vivas*. It provides MRCS candidates with a means of practising some of the most common questions that they will be asked in their viva examinations, with detailed model answers and diagrams to highlight key points where necessary. Pocket-sized, for portability, and packed with useful information in an easy-to-use A-Z format, this book will help the reader to broaden their knowledge base and, by practising the questions, gain confidence in their examination technique. Further volumes will cover the remaining viva topics of clinical anatomy (see above), principles of surgery and operative surgery.

Case Presentations in Plastic Surgery

Christopher Stone

Royal Devon and Exeter Hospital, Exeter, UK

Based on a series of over 100 high quality photographs of 'classic' cases, with concise accompanying text outlining aspects such as the aetiology of the condition, its prevalence, associated conditions, key diagnostic features, and treatment options, this book provides an invaluable introduction to plastic surgery for medical undergraduates, as well as being a useful revision aide memoire for plastic surgery postgraduate trainees.

1841101370, 234 x 156 mm, est. 200pp, Paperback,
March 2004, £24.50

Fundamentals of Orthopaedics and Trauma

Edited by **Aljafri Majid**, University of Malaya, Kuala Lumpur, Malaysia

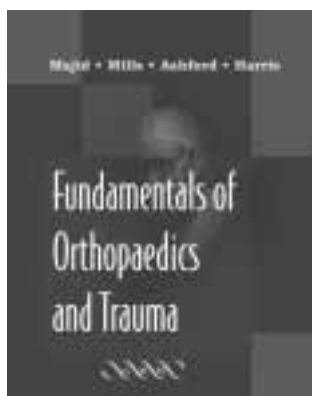

Ken Mills, former professor of Orthopaedic Surgery, Aberdeen, UK

Robert Ashford, York District Hospital, UK and

Nick Harris, Leeds General Infirmary, UK

Designed to complement *Fundamentals of Surgical Practice*, this title is also aimed at the basic surgical trainee, and covers all of the key areas of relevance to the junior orthopaedic surgeon and trainee alike. The book begins with coverage of key aspects of biomechanics, investigations, perioperative care and anaesthesia, and moves on to prostheses and orthotic braces, the pathology of bone and joint disease, injury and neuromuscular disorders and finally to the individual surgical management of trauma and disease to all of the main areas of the body.

1841100455, 276 x 219 mm, est. 300pp, Hardback, August 2004, £75.00

The Closed Treatment of Common Fractures

The Late Sir John Charnley

This textbook has been a basic reference for orthopaedic surgeons for half a century. It describes the elementary mechanics of reduction and immobilisation and shows how the commonest injuries can be managed by proven methods based on these general principles. It is a must for anyone embarking on a career in orthopaedics and is a classic text that all orthopaedic trainees and consultants should have on their shelves.

Paperback, January 2003, £22.50

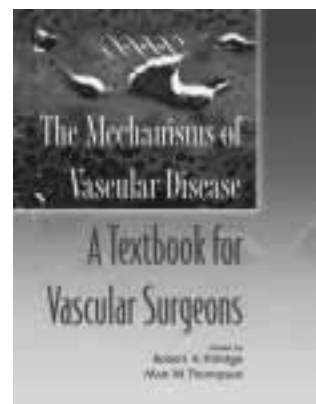

The Mechanisms of Vascular Disease: A Textbook for Vascular Surgeons

Edited by **Robert Fitridge**, University of
Adelaide, Australia and

Matthew Thompson, St George's
Hospital, London, UK

At present, there are no books dealing with basic science as applied to vascular surgery, and this text aims, therefore, to provide an up-to-date guide both to the mechanisms of vascular disease and to the current treatment options available to the vascular surgeon, be they in training or in practice. This is particularly important with the likely implementation of different treatment strategies over the next few years, including gene therapy, eluting stents and the pharmacological manipulation of the vascular system.

Free for subscribers: Full content online

Published bi-monthly by Greenwich Medical Media Ltd, *Cardiology In The Young* is devoted to cardiovascular issues affecting the young and the older patient with the sequels of heart disease acquired in childhood. The journal serves the interests of all professionals concerned with these topics. By design, the journal is international and multidisciplinary in its approach, and members of the Editorial Board take an active role in the journal's mission, helping to make it the essential journal in paediatric cardiology. All aspects of paediatric cardiology are covered within the journal. The content includes original articles, brief reports, editorials and continuing medical education papers. High quality colour figures are published on a regular basis and occasional supplements are published and supplied free to subscribers.

Readership

Cardiology In The Young is essential reading for anyone involved in paediatric cardiology.

European Journal of Anaesthesiology (www.eja-online.org)

Editor-in-Chief: B. J. Pollard

ISSN: 0265 0215

Indexed/Abstracted: Biological Abstracts, Chemical Abstracts, Current Contents, Clinical Medicine, EMBASE, Index Medicus, Research Alert, Science Citation Index and SciSearch

Free for subscribers: Full content online

Published monthly by Greenwich Medical Media Ltd, on behalf of the European Federation of Anaesthesiologists, the European Journal of Anaesthesiology publishes original work of high scientific quality. Preference is given to experimental work or clinical observations in man, and to laboratory work of clinical relevance. The Journal also publishes commissioned reviews by an authority in a field of interest to those working in anaesthesiology or intensive care. Abstracts of European Academy of Anaesthesiology meetings, editorials, book reviews, news and notices are also included.

The *European Journal of Anaesthesiology* is the official publication of the European Academy of Anaesthesiology. The EJA is also the official journal of the following organizations: the FEEA (Fondation Européenne d'Enseignement en Anesthésiologie); the CENSA (Confederation of the European National Societies of Anaesthesiology); the ESA (European Society of Anaesthesiologists); the Section Anaesthesiology of the UEMS (Union Européenne des Médecins Spécialistes); the ESCTAIC (European Society for Computing and Technology in Anaesthesia and Intensive Care); the EACTA (European Association of Cardiothoracic Anaesthesiologists), the EFAAD (European Federation for the

Advancement of Anaesthesia in Dentistry) and the SESAM (Society in Europe for Simulation Applied to Medicine).

Readership

The *European Journal of Anaesthesiology* is essential reading for those working in anaesthesiology or intensive care.

Journal of Diagnostic Radiography and Imaging

Editor-in-Chief: Suzanne Henwood

ISSN: 1460 4728

Indexed/Abstracted: CINAHL; Excerpta, Medica/EMBASE

The *Journal of Diagnostic Radiography and Imaging* is a peer-reviewed journal covering all of the current modalities used in diagnostic imaging. The Journal aims to publish quality research from a wide range of styles and encourage debate and the exchange of information and opinion from within the field of diagnostic medical radiography. The Journal also aims to encourage clinical papers and case studies as well as equipment reviews that will be of interest to clinical radiographers and managers.

The *Journal of Diagnostic Radiography and Imaging* aims to provide an easily available forum for the education and continuing development of radiographers by publishing regular CPD articles of a high standard, complete with self-assessments to include in personal CPD portfolios.

Journal of Radiotherapy in Practice**Editors-in-Chief:** Angela Duxbury, David Eddy**ISSN:** 1460 3969**Indexed/Abstracted:** CINAHL; Excerpta Medica/EMBASE

The *Journal of Radiotherapy in Practice* is a peer-reviewed journal covering all of the current modalities specific to clinical oncology and radiotherapy. The Journal aims to publish quality research from a wide range of styles and encourage debate and the exchange of information and opinion from within the field of radiotherapy practice and clinical oncology. The Journal also aims to encourage technical evaluations and case studies as well as equipment reviews that will be of interest to an international radiotherapy market.

Order this title through GMM or visit our website: www.greenwich-medical.co.uk**Journal of Psychiatric Intensive Care****Editor-in-Chief:** Roland Dix

Published bi-annually, the *Journal of Psychiatric Intensive Care* is devoted to issues affecting the care and treatment of people with mental disorder who manifest severely disturbed mental or behavioural functioning. By design, the Journal is international and multi-disciplinary in its approach. It serves the interest of all professionals concerned with these topics whether they work in Psychiatric Intensive Care Units (PICU's), Low Secure Unit, Challenging Behaviour, Emergency Psychiatry, Intensive Treatments or in other parts of the wider mental health system.

All aspects of psychiatric intensive care are covered within the Journal that seeks to encourage informed debate and exchange of opinion and thereby become the essential journal in this field. The content of the Journal includes editorials, original articles, brief reports, reviews, conference reports, news and notices. Preference is given to original research of a high scientific quality.

The *Journal of Psychiatric Intensive Care* is the official publication of NAPICU.

Readership

Journal of Psychiatric Intensive Care is essential reading for those working in psychiatric intensive care and professionals concerned with the care and treatment of people with mental disorder.
