The three volumes of *The Cambridge History of Scandinavia* provide a unique work of reference for all students of Scandinavian political, economic, social and cultural history. The series covers the period 800 AD to our own times, and looks at the geographical area occupied by modern Denmark, Norway, Sweden and Finland, and the Scandinavian ‘crown lands’ (Iceland, the Faroe Islands and Greenland) as well as Sweden’s Baltic provinces and the Danish duchies of Slesvig and Holstein as they featured in Scandinavian history.

- A major new three-volume survey of Scandinavian history
- Contains both general comparative chapters, and chapters on the separate political histories of the constituent countries
- Looks at the various countries and communities that constitute present-day Scandinavia, and their distinctiveness from the rest of Europe

Volume 1: Prehistory to 1520

Knut Helle, University of Bergen, Norway

This, the first volume in the series, surveys the prehistoric and historic Scandinavian landscape, and tells how man adapted culturally to changing natural conditions. The most substantial part of the volume then deals with the history of Scandinavia from the Viking Age to the end of the Scandinavian Middle Ages (c. 1520). The external Viking expansion opened Scandinavia to European influence to a hitherto unknown degree. A Christian church organisation was established, the first towns came into being, and the unification of the three medieval kingdoms of Scandinavia began, coinciding with the formation of the unique Icelandic ‘Free State’.
