Preventive Health Care for Children with Genetic Conditions
Providing a Primary Care Medical Home
2nd Edition
Golder N. Wilson
University of Texas Southwestern Medical Center, Dallas, USA
and W. Carl Cooley
Dartmouth-Hitchcock Medical Center, Hanover, New Hampshire, USA

This updated new edition provides health professionals with an invaluable, structured approach to the preventive care of children with congenital disorders. Over 150 conditions ranging from cerebral palsy to Down syndrome are discussed. For each disorder there is an introductory summary of key information, followed by more detailed listing of general pediatric and specialty concerns, all structured to provide an integrated approach to patient care. The text provides details of medical complications and preventive recommendations supported by key literature and web resources for parents and professionals.

Features
• A compendium of clinical guidance and checklists to provide a structured approach to care for these children
• Emphasis on preventive management of medical complications
• Supported by key literature and web resources, suitable for professionals and parents

Contents
Part I. Approach to the Child with Special Needs;
Part II. The Management of Selected Single Congenital Anomalies and Associations;
Part III. Chromosomal Syndromes;
Part IV. Syndromes Remarkable for Altered Growth;
Part V. Management of Craniofacial Syndromes;
Part VI. Management of Connective Tissue and Integumentary Syndromes;
Part VII. Management of Neurologic and Neurodegenerative Syndromes.

Textbook of Pediatric HIV Care
Edited by Steven L. Zeichner
National Cancer Institute, Bethesda, Maryland, USA
and Jennifer S. Read
National Institutes of Health, Baltimore, USA
This comprehensive textbook provides the definitive account of effective care for pediatric HIV patients. Drawing on the massive and burgeoning published literature from a wide range of sources, this volume summarizes a wealth of information concerning the aetiology of the disease and the best clinical care for this vulnerable group. It distills the very latest knowledge of virology, immunology and pathogenesis and uses this to illuminate and explain management recommendations, using the very latest and emerging therapies, and including new ways of monitoring HIV infection.

Features
• Covers management of HIV and treatment of opportunistic infections
• Addresses the basic science and immunology of the diseases as a key to understanding aetiology and treatment
• Comprehensive, up-to-date and authoritative, and written by a prominent team of the world’s leading experts

Contents
Part I. Scientific Basis of Pediatric HIV Care;
Part II. General Issues in the Care of Pediatric HIV Patients;
Part III. Antiretroviral Therapy;
Part IV. Clinical Manifestations of HIV Infection in Children;
Part V. Infectious Problems in Pediatric HIV Disease;
Part VI. Medical Social and Legal Issues.

Shaking and Other Non-Accidental Head Injuries in Children
Edited by Robert Minns
University of Edinburgh, Scotland
and Keith Brown
Royal Hospital for Sick Children, Edinburgh, Scotland
The Research Programme on Shaken Baby Syndrome in Edinburgh is internationally recognised for its prominent ongoing research into the impact and effects of shaking a baby. In this book, a highly distinguished team of experts from the programme present the clinician with the latest findings on the syndrome, covering diagnosis and the long-term disability that results.

Management of the Motor Disorders of Children with Cerebral Palsy
2nd edition
Edited by David Scrutton
Institute of Child Health, University College London, UK
Diane Damiano
University of Washington, USA
and Margaret Mayston
University College London, UK
This entirely rewritten new edition, with two new editors from America and Australia, describes the most up-to-date thinking on the treatment of cerebral palsy. Coverage includes the types of cerebral palsy; assessment; goal-setting; learning and neural plasticity; mechanisms of deformity, its prevention and treatment, and the transition to adult life.

The Treatment of Gait Problems in Cerebral Palsy
Edited by James R. Gage
University of Minnesota, USA
A team of experts who manage gait problems in cerebral palsy have combined to create this state-of-the art resource. They examine brain pathology, current treatment modalities, child assessment, and treatment outcomes. An attached CD-ROM illustrates the process of gait analysis. Clinicians, therapists and bioengineers will find this book uniquely useful.

Cognitive and Behavioural Disorders of Epileptic Origin in Children
Edited by Thierry Deonna
and Eliane Roulet-Perez
Both at the Université de Lausanne, Switzerland
Foreword by Jean Aicardi
Institute of Child Health, University College London, UK
This book describes the effects that different kinds of childhood epilepsy can have on behavior and cognitive development. It is written for the various professionals dealing with such children (pediatricians, neurologists, psychologists) and gives a general view of the complex interrelation between medical psychological and educational problems in these children.
