 $GL_q(2)$, 22
 $k_q\mathbb{Z}$, 49, 66, 89
 $k_q\mathbb{Z}/n$, 35, 59, 75, 102
 \mathcal{M}^H , 66
 ${}_H\mathcal{M}$, 58
 $M_q(2)$, 22, 127
 sl_2 , 141
 sl_2^* , 142
 $SL_q(2)$, 10
 $u_q(b_+)$, 102
 $U_q(b_+)$, 5, 102
 $U_q(\mathfrak{g})$, 113, 119, 124
 $U_q(n_+)$, 117, 120, 124
 $u_q(sl_2)$, 36, 111, 114
 $U_q(sl_2)$, 41, 64
- action, 18
 adjoint action, 14
 adjoint coaction, 20
 algebra, 2
 algebra factorisation, 133
 algebraic group, 10
 antialgebra map, 4
 anticoalgebra map, 4
 antipode, 4, 34
 anyonic line, 102
 automorphism, 14, 23
- bialgebra, 3
 bialgebra factorisation, 134
 bicharacter, 31, 48
 bicovariant differentials, 156
 bicrossproduct, 136, 144
 bimodule, 149
 bosonisation, 100
 braid group, 58
 braided additive coproduct, 128
 braided adjoint action, 87
 braided antipode, 86
 braided category, 54, 66
 braided coregular action, 92
 braided derivative, 94, 115, 122, 130
 braided determinant, 96
 braided dimension, 72
 braided enveloping algebra, 88
 braided group, 86
 braided integer, 130
 braided-Lie algebra, 88, 131, 158
 braided line, 89
 braided matrices, 97, 107
 braided module, 100
 braided plane, 89, 95, 103, 113, 128
 braided tensor product, 97, 133
 braided tensor product algebra, 85
 braided trace, 72
 braiding, 55
- canonical braiding, 62, 68
 canonical connection, 154
 Cartan datum, 115
 classical double, 142
 classical Yang-Baxter equation, 140
 coaction, 18
 coadjoint action, 17
 coalgebra, 2
 cocommutative, 8
 cocycle, 56, 136
 coevaluation, 69, 70
 comeasuring bialgebra, 23
 commutative, 8
 comodule, 19
 comodule algebra, 19
 comodule category, 66, 103
 comodule coalgebra, 19
 conjugacy class, 158
 conjugate quasitriangular, 30
 connection, 153
 contravariant functor, 52

- convolution algebra, 47
- coproduct, 2
- coquasitriangular, 47
- coregular action, 15
- counit, 3
- cross coproduct, 100
- cross product, 99
- crossed bimodules, 107
- crossed G -module, 61
- crossed module, 61, 156
- cyclic group, 35

- derivation, 14
- diagrammatic notation, 55, 84
- diffeomorphism, 23
- differential calculus, 149
- double bosonisation, 109
- double cross product, 132, 134
- double cross sum, 143
- Drinfeld theory, 29
- Drinfeld–Sklyanin solution, 141
- dual braided group, 92, 108
- dual Lie bialgebra, 139
- dual object, 69
- dual quantum group, 12
- dual quasitriangular, 47, 66, 127
- dual representation, 68
- dually paired, 12, 118, 122
- Dynkin classification, 112

- enveloping algebra, 124
- evaluation, 69, 70
- extension of bialgebras, 136
- exterior derivative, 149

- factorisable, 31, 35, 41, 45, 49, 59, 107
- fermionic quantum plane, 129
- field extension, 28, 157
- finite group, 6, 9, 31, 56, 60, 63, 132, 137, 158
- formal powerseries, 42, 140
- framed link, 80
- free algebra, 117
- functor, 52
- fundamental group of link, 81

- generalised braiding, 133
- group factorisation, 132
- group function algebra, 9, 30
- group-graded, 57, 60
- group Hopf algebra, 6
- grouplike, 8

- half-real form, 143
- Hecke algebra, 67, 68
- hexagon condition, 54
- highest weight, 64, 75
