

Index

- Abelian 37
 accidental degeneracy 136
 adjoint matrix 6
 adjoint operator 104
 algebraic expressions of Bravais lattices 299, 302
 ambivalent 68
 ambivalent class 48
 angular distribution of axis-vectors for a regular polyhedron 91
 angular momentum eigenfunctions 238, 245
 antiferromagnetic 429
 anti-Hermitian matrix 13
 antilinear 400
 anti-unitary point groups 403, 406
 anti-unitary space groups
 the first kind G^e 428–9, 436
 the second kind \hat{H}^e 428, 436, 438
 anti-unitary wave vector space group 444
 associated irreps 277
 associative law 37
 associativity condition for a factor system 269
 asymmetric stretching 177
 atomic structure of the diamond crystal 382
 automorphism 48
 axial vector 59
 axis of rotation 58
 axis-order notation 81
 axis-vector 15, 58, 73
 axis-vector notation \hat{N}_n of a double group element 229, 253
 axis-vector representation 68
- band structure of the energy 362
 base-centered BP 304, 307
 bases of unirreps of a simple cubic crystal
 along Δ points 369–71
 at X points 369
 at Γ points 369–70
 bases of unirreps of the diamond crystal
 along Δ points 374
 at X points 375
 at Γ points 372
 basis space 112
 basis-vector representation 69–70
 multiplication law 71
 black and white group 407
 black–white space groups 429
 Bloch function 157
 body-centered BP 303, 305
 Bogoliubov transformation 19
 bond-plane angle change 177
 bond stretching 177
 bond twisting (torsion) 177
 Born–von Karman cyclic boundary condition 342
- BP 300
 Bravais lattice 293
 Bravais lattice types 302, 310
 Bravais parallelepiped BP 300
 Brillouin zone 347
 of the hexagonal lattice 348
 of the simple cubic lattice 349
 of the face-centered cubic lattice 350
 of the body-centered cubic lattice 351
 BSW 350
 buckminsterfullerene (buckyball) C_{60} 97
- carrier space 112
 Cayley–Klein parameters for O' 256
 Cayley–Klein parametrization 54–5, 226
 center 47
 central extension 232, 250, 276
 centralizer 46
 characteristic equation of a matrix 9–10
 characteristic intertwining matrix, T_{AB} 25
 characteristic SALC 153
 characteristic symmetry points 75
 characteristic transformation matrices T and \hat{T} 26, 30
 characters 125
 class 45, 47
 classes
 of $O^{(+3)}$ 62
 of O' 253
 class function 127
 class order theorem 47, 83
 Clebsch–Gordan (CG) coefficients 241, 244–5
 Clifford algebra 4, 20
 Clifford's theorem 208
 closure 37
 compact continuous group 209
 compact group 53
 compatibility condition for a Bravais lattice T and its point group K 294
 complete orthonormalized set 103–4
 complete set of vectors 102
 completeness condition for irreps of a group 124, 127
 completeness relation for projection operators 11
 complex conjugate representations, cases 1–3 419
 composition quotient groups 197
 composition indices 197
 composition series 197
 conjugacy class 47
 conjugate 45
 conjugate basis 193, 196
 conjugate group 45, 191
 conjugate representation 193
 conjugate rotation 62

conjugation 45
 connectedness
 of a continuous group 219
 m -fold connectedness 219
 of $SU(2)$ 227
 of $SO(3, r)$ 221
 of $U(1)$ 221
 continuous group 209
 contravariance 242
 contravariant matrix $A^\# = A^{-1}$ 242
 conventional coordinates 300
 conventional lattice basis 300
 conventional sublattice 300
 coordinates 102
 co-representation 409–10
 correspondence rule 178
 correspondence theorem 138
 correspondence theorem on basis functions 149, 152, 370
 coset 44
 coset decomposition 44
 coset enumeration 82, 98
 for tetrahedral group T 99
 for octahedral group O 100
 for icosahedral group Y 100
 Coulomb Dirac wave 24
 co-unirreps 410, 414
 irreducibility criteria 424
 of anti-unitary point groups 416
 of anti-unitary wave vector space groups 460
 type criteria 444
 of C_n^e, C_n^q, C_n^u 415
 of D_n^e, D_n^q 417
 of G_s^e 414
 of the cubic groups 418
 orthogonality theorem 422–3
 type a 412
 type b 412
 type c 411
 type criteria 425, 427
 covariance 242
 covering group 276
 criterion for a finite group 38
 criterion for a subgroup 44
 crystal class 295
 crystal system 294
 crystallographic anti-unitary point groups 461
 crystallographic point group 295
 cube 76
 cubic crystal system 308
 cyclic group 27

 defining relations
 of a group 41
 of a crystal class 322
 of a proper point group 65, 73
 density on a lattice plane 346
 diadic notation 56
 diagonal matrix 3
 diagonalizability 10
 dihedral group
 of infinite order D_∞ 39
 of order $2n, D_n$ 40, 73
 dimensionality 102
 Dirac plane wave 21
 Dirac's γ -matrices 20

direct product 6
 direct product group 51
 direct sum 7
 $D^{(j)}(\theta) = D^{(j)}(S)$ 233
 dodecahedron 76
 double-centered hexagonal BP 305, 306
 double dihedral groups D_n' 251
 double group 232, 247
 defining relations 251
 double octahedral group O' 253
 double rotation group $SU(2)$ 232
 double-valued unirreps of a point group 247

 eigenvalue 19
 eigenvector 19
 elementary basis set 149
 energy band eigenfunctions 364
 energy bands
 for a simple cubic crystal 368
 for the diamond crystal 371
 of an electron in a crystal 362
 of a free electron 365
 equivalence criteria for space groups 318
 equivalent basis functions 152
 equivalent Bloch functions 379
 equivalent orbitals 152, 161
 equivalent points of a BP 300
 equivalent point space $S^{(n)}$ 150
 equivalent rotation 62
 equivalent scalar functions 149, 153
 equivalent scalar orbitals 153
 equivalent set of axis-vectors 67, 75
 equivalent transformation 8
 Euclidean group in three dimensions, $E^{(3)}$ 289
 Euler angles (α, β, γ) 63
 Euler–Rodrigues parametrization 55, 226
 even (odd) with respect to time reversal 392
 exponential form of a proper rotation $R(\theta)$ 59
 exponential form of $U(n)$ 54
 external vibrational coordinates 175

 face-centered BP 304, 307
 factor group 50
 factor system 247, 268
 faithful representation 107
 ferrimagnetic 429
 ferroelectric crystal classes 408
 ferroelectrics 408
 ferromagnetic 429
 ferromagnetics 407
 fiber 49
 finite group 37
 first Brillouin zone 347
 fixed point of plane rotation 292
 four group D_2 40
 fourteen Bravais lattice types 313
 frequency of a unirrep in a representation $D(G)$ 126
 Frobenius reciprocity theorem 203, 354
 full (real) rotation group $O(n, r)$ 57
 function of a matrix 5, 8

 gauge factor 269
 gauge equivalence 269
 gauge equivalence class 269
 gauge transformation 269
 Gaussian elimination procedure 33

- general classification of SALCs 166
 generalized spinors 238
 generating operator method 139
 generating operators 138
 generator set for partners 139
 generators 66
 glide reflection 291
 golden section τ 96
 gray group 406, 407
 gray rotation group G_s^e 414
 gray space group 429
 group axioms 37
 group functions 127
 group generators 41, 215
 group of factor systems 271
 group of general linear transformations $GL(n)$ 5, 38
 group property 4, 37

 half-integral representations
 of a point group 249
 of $SU(2)$ 234
 halving subgroup 46
 helicity operator 22
 Hermitian 6, 13
 Hermitian conjugate matrix 6
 Hermitian operators 104
 Hermitian scalar product 2
 hexagonal BP 305
 hexagonal crystal system 302
 hierarchy of crystal systems 313
 hierarchy of space groups 336
 Hilbert space 102
 homomorph 49
 homomorphic 49
 homomorphism 48
 homomorphism between $SU(2)$ and $SO(3, r)$ 229
 homomorphism condition 107
 homomorphism, $\hat{G}/T \simeq G$ 295
 homotopic 222
 homotopy class 222
 Hurwitz density function
 for $SO(3, r)$ 214
 for $SU(2)$ 236
 Hurwitz integral 211
 hybrid atomic orbitals 170, 143

 icosahedral group, Y 66, 85, 93
 icosahedron 76
 idempotent matrix 26
 identity element 37
 identity representation 107
 image 49
 improper point groups 87–8
 improper rotation 56
 index 44
 induced basis 190
 induced representation 189
 principal 190
 character of 191
 irreducibility condition for 191, 193–5
 induced representation
 by the identity representation 200
 for a solvable group 198
 case I 199
 case II 199, 201
 from small representations 206

 infinite group 37, 209
 infinitesimal generators
 of $SO(3, r)$ 218
 of $SU(2)$ 225
 of $SU(3)$ 219
 infinitesimal rotation ω 15, 59
 characteristic equation of ω 60
 ω -plane 59
 inhomogeneous coordinate transformation 290
 inner automorphism 49
 integral representations
 of a point group 249
 of $SU(2)$ 234
 internal symmetry coordinates (ISC) 177
 of H_2O 179
 of $COCl_2$ 181
 of CO_3 181
 of NH_3 182
 of $CH_2=CH_2$ 183
 of CH_4 186
 internal vibrational coordinates 176, 177
 intertwining matrix 18, 24
 invariant function 143
 invariant subgroup 45, 46
 involutorial transformation 17
 involutorial, unitary and Hermitian (IUH)
 matrix 18
 irreducibility criterion 127
 irreducible representations (irreps) 110
 irreducible star 359
 irreps of G associated with an irrep of $H(\triangleleft G)$
 200
 ISC 179
 isomorphic 39, 42
 isomorphism 48
 isomorphism for point groups 88
 isomorphism theorem 50
 isotropic 2
 IUH 18–19

 Jacobi identity 217
 Jacobian 212
 Jones faithful representation 72, 321

 kernel 50
 kernel of homomorphism 107
 Kronecker's delta 20

 Lagrange's theorem 44
 Laplace theorem 29
 lattice point 293
 lattice vector 293
 left coset 44
 left coset representative 44
 Lie algebra 215–6
 $so(3, r)$ 218
 $su(3)$ 218
 Lie group 210
 lifting of a vertex atom 177
 linear independence 1
 linear operators 103
 linear transformation 2
 Liouville operator 392
 little group 188, 194, 197, 203, 205
 local isomorphism 225

magnetic Bravais lattices, M_L 428, 431–2
 cubic system 432
 hexagonal system 433
 rhombohedral system 433
 tetragonal system 433
 orthorhombic system 433
 monoclinic system 435
 triclinic system 435
 magnetic crystal 429
 magnetic crystal classes 408
 magnetic point group 407
 magnetic space group 429
 matrix 2
 matrix diagonalization 27
 matrix expression
 of $R(\theta)$ 60, 61
 of $R(\alpha, \beta, \gamma)$ 65
 matrix representative 105
 matrix representation 106
 maximal invariant subgroup 46
 m -fold face 76
 MGGs 316, 318
 Miller indices 345
 Miller's vector 345
 mixed continuous group 210
 modulo (mod) 38, 317
 molecular vibration 174
 monoclinic crystal system 309
 monomial matrix 190
 super 190
 multiaxial groups 67
 multiplication table
 of D_n 74
 of D'_n 251
 of O 78
 of O' 254
 multiplier 271–2

 natural basis 1, 114
 n -fold axis of rotation 67
 n -fold vertex 76
 normal matrix 12
 normal subgroup 46
 normalized factor system 270
 normalizer 45
 notations for a small representation of a wave vector
 space group \hat{G}_k 368

 $O(n, c)$ 56
 $O(n, r)$ 57
 $O^{(3)}$ ($=O(3, r)$) 58
 $O^{(+3)}$ ($=SO(3, r)$) 58
 octahedral group O 66, 79, 85
 octahedron 76
 ω -plane 59
 one- or two-sided axis 68, 82
 Onsager's reciprocity relation 394, 396
 orbit 194
 orbit of an irrep 277
 orbits of the group D_2 relative to the group T 196
 order of a group 37, 66
 orthogonal 102
 orthogonal group $O(n, c)$ 55
 orthogonality of basis functions 135
 orthogonality relations for irreducible
 representations 123–4

orthogonality relations
 for the unirreps of Lie groups 215
 for projective irreps of a point group 249
 orthogonalization 103
 orthogonality theorem on projective irreps 274
 orthorhombic crystal system 307
 outer automorphism 49

 paramagnetic 429
 parameter domain Ω for $O^{(+3)}$ 61
 parameter space (or domain) 209
 parameter space Ω' of $SU(2)$ 226
 partner functions of a unirrep 135
 Pauli spin 4
 Pauling's criterion on maximum bonding
 strength 171
 p-equivalence class 269
 period of an element 37
 permutation group 42
 permutation representation 151
 point group 66
 point lattice 293
 polar vector 408
 preimage 49
 presentation 66
 presentation of a group 42
 of improper point groups 89
 of polyhedral groups P_o 79
 primitive basis 295
 primitive BP 301, 304
 principal minors 31
 principle of dynamical reversibility 393
 projection operator 10, 11, 141
 projection operator method 141
 based on characters 143
 projection operators for a Bravais lattice 298
 projective co-unirreps
 of anti-unitary point groups 450, 452
 three types 450–1
 of wave vector point groups 460, 462–3
 projective equivalence (p-equivalence) 269
 projective factor 268
 projective regular representation 267, 270
 projective representation 220, 268
 of a point group 247
 projective set 276
 of a point group 247
 \hat{O} of O' 253
 projective unirreps
 of a wave vector point group 356
 of double rotation–inversion groups 283
 of $C'_{2r,i}$ 285
 of $D'_{n,i}$ 286
 of O'_i 287
 of point groups (or the unirreps of the double
 point groups) 257
 of C_n 258
 of D_∞ 258
 of D_n 261
 of O 252
 of T 263
 proper (or improper) basis on $S^{(n)}$ 154
 proper polyhedral groups P_o 75
 proper (real) rotation group $SO(n, r)$ 57
 proper rotation 56
 proper rotation group

- in three dimensions $SO(3, r) (= O^{(+3)})$ 58
- $SO(n, c)$ 56
- proper subgroup 43
- pseudo-vector 408
- quaternion group Q 43, 108, 229
- quaternions 229
- rank of a group 42
 - of a Lie group 219

symmetry coordinates of vibration
 of a crystal 377–8
 of the diamond crystal 382
 along K points 389
 along Δ points 386
 along Σ points 389
 at L point 388
 at X point 386
 at Γ point 385
 at A point 387
 symmetry group of transformation operators 117
 symmorphic space group 295, 383

 tetragonal crystal system 303
 tetrahedral group T 66, 77, 85
 tetrahedron 76
 thirty-two crystal classes 313
 thirty-two minimal general generator sets (MGGs)
 of 230 space groups 315, 324
 time correlation function 393
 time-reversal operator, quantum mechanical 397–8,
 400
 time-reversal symmetry
 classical 391, 394
 quantum mechanical 396
 of a scalar product 400
 trace 3
 transitions between states
 of different co-unirreps 462
 of the same co-unirreps 467
 transitivity of induction 191
 translation group T 289
 transpose matrix 6
 triangular rule 240
 triclinic crystal system 311
 twisted direct product $A \times B$ 466
 two-fold edge 76
 230 space groups based on 32 minimal general
 generator sets (MGGs) 324
 two-point basis 152–3, 159–60

type criteria on the co-unirreps of anti-unitary space
 groups 442–3

 uniaxial group C_n 66
 uniaxial group of infinite order C_∞ 39
 unimodular integral matrix 297
 unirrep $D^{(\lambda)}(S)$ of $SU(2)$ 232
 homogeneity 233
 unitarity 234
 irreducibility 234
 completeness of $\{D^{(\lambda)}(S)\}$ 235
 orthogonality 235
 unirreps
 of C_n 129
 of D_n 129
 of D_3 and D_4 132
 of O 134
 of T 133
 of the translation groups 340
 of space groups 358
 unit factor system 268
 unitary group in n dimensions $U(n)$ 38, 53
 unitary irreducible representation (unirrep) 124
 unitary matrix 12
 unitary point group 403
 unitary symmetric matrix 14
 unitary transformations 12
 universal covering group 220, 278
 of $SO(3, r)$ 232

 Valence-angle bending 177
 vector addition model 240
 vector operator 120
 vectors 1, 102

 Wannier function 157
 wave vector 341
 wave vector point group 348
 weighted permutation representation of \hat{G}_k 380
 Wyle relation 81
 Wyle theorem on proper point group 85
