Contents

<i>Frontispiece</i>	iv
<i>List of contributors</i>	xi
<i>Preface</i>	xiii
Part I Introduction	
1 Gut form and function: variations and terminology <i>D. J. Chivers and P. Langer</i>	3
2 Food and digestion of Cenozoic mammals in Europe <i>P. Langer</i>	9
3 Modelling gut function: an introduction <i>C. Martínez del Rio, S. J. Cork and W. H. Karasov</i>	25
4 Optimum gut structure for specified diets <i>R. McNeill Alexander</i>	54
Part II Food	
5 Foods and the digestive system <i>C. M. Hladik and D. J. Chivers</i>	65
6 Classification of foods for comparative analysis of the gastro-intestinal tract <i>P. Langer and D. J. Chivers</i>	74
7 The 'carnivorous' herbivores <i>R. J. Moir</i>	87
8 Nutritional ecology of fruit-eating and flower-visiting birds and bats <i>C. Martínez del Rio</i>	103
9 Herbivory and niche partitioning <i>M. R. Perrin</i>	128
10 Taste discrimination and diet differentiation among New World primates <i>B. Simmen</i>	150

Edited by D. J. Chivers and P. Langer

Table of Contents

[More information](#)

x	<i>Contents</i>
11 Potential hominid plant foods from woody species in semi-arid versus sub-humid sub-tropical Africa <i>C. R. Peters and E. M. O'Brien</i>	166
Part III Form	
12 The form of selected regions of the gastro-intestinal tract <i>G. Björnhag and P. Langer</i>	195
13 Categorisation of food items relevant to oral processing <i>P. W. Lucas</i>	197
14 A direct method for measurement of gross surface area of mammalian gastro-intestinal tracts <i>M. Young Owl</i>	219
15 Morphometric methods for determining surface enlargement at the microscopic level in the large intestine and their application <i>R. L. Snipes</i>	234
16 Weaning time and bypass structures in the forestomachs of Marsupialia and Eutheria <i>P. Langer</i>	264
17 Adaptations in the large intestine allowing small animals to eat fibrous foods <i>G. Björnhag</i>	287
Part IV Function	
18 Foraging and digestion in herbivores <i>G. O. Batzli and I. D. Hume</i>	313
19 Gut morphology, body size and digestive performance in rodents <i>I. D. Hume</i>	315
20 The integrated processing response in herbivorous small mammals <i>G. O. Batzli, A. D. Broussard and R. J. Oliver</i>	324
21 Digestive constraints on dietary scope in small and moderately-small mammals: how much do we really understand? <i>S. J. Cork</i>	337
22 The effects and costs of allelochemicals for mammalian herbivores: an ecological perspective <i>W. J. Foley and C. McArthur</i>	370
23 Short-chain fatty acids as a physiological signal from gut microbes <i>T. Sakata</i>	392
Part V Synthesis and perspectives	
24 Food, form and function: interrelationships and future needs <i>All contributors (operating in three groups)</i>	411
<i>Index</i>	431
