

CONTENTS

<i>Contributors</i>	xi
<i>Symposium Program</i>	xv
<i>Papers from both Volumes Classified by Subjects</i>	xvi
<i>Preface</i>	xxi
<i>Dieter Brill: A Spacetime Perspective</i>	1
 A. Anderson <i>Thawing the Frozen Formalism: The Difference Between Observables and What We Observe</i>	 13
 J. D. Brown and J. W. York <i>Jacobi's Action and the Density of States</i>	 28
 E. Calzetta and B. L. Hu <i>Decoherence of Correlation Histories</i>	 38
 R. Capovilla, J. Dell and T. Jacobson <i>The Initial Value Problem in Light of Ashtekar's Variables</i>	 66
 P. Cartier and C. DeWitt-Morette <i>Status Report on an Axiomatic Basis for Functional Integration</i>	 78
 Y. Choquet-Bruhat <i>Solution of the Coupled Einstein Constraints On Asymptotically Euc- lidean Manifolds</i>	 83
 P. Chrusciel and J. Isenberg <i>Compact Cauchy Horizons and Cauchy Surfaces</i>	 97

CONTENTS

J. M. Cohen and E. Mustafa <i>The Classical Electron</i>	108
S. Deser <i>Gauge (In)variance, Mass and Parity in D=3 Revisited</i>	114
F. Flaherty <i>Triality, Exceptional Lie Groups and Dirac Operators</i>	125
J. B. Hartle <i>The Reduction of the State Vector and Limitations on Measurement in the Quantum Mechanics of Closed Systems</i>	129
A. Higuchi <i>Quantum Linearization Instabilities of de Sitter Spacetime</i>	146
G. T. Horowitz <i>What is the True Description of Charged Black Holes?</i>	157
L. Lindblom and A. K. M. Masood-ul-Alam <i>Limits on the Adiabatic Index in Static Stellar Models</i>	172
B. Mashhoon <i>On the Relativity of Rotation</i>	182
V. E. Moncrief <i>Recent Progress and Open Problems in Linearization Stability</i>	195
N. Ó Murchadha <i>Brill Waves</i>	210
K. Schleich and D. M. Witt <i>You Can't Get There from Here: Constraints on Topology Change</i>	224
L. Smolin <i>Time, Measurement and Information Loss in Quantum Cosmology</i>	237

CONTENTS

R. Sorkin	
<i>Impossible Measurements on Quantum Fields</i>	293
F. J. Tipler	
<i>A New Condition Implying the Existence of a Constant Mean Curvature Foliation</i>	306
R. M. Wald	
<i>Maximal Slices in Stationary Spacetimes with Ergoregions</i>	316
J. H. Yoon	
<i>(1 + 1)-Dimensional Methods for General Relativity</i>	323
D. E. Holz, W. A. Miller, M. Wakano, J. A. Wheeler	
<i>Coalescence of Primal Gravity Waves to Make Cosmological Mass Without Matter</i>	339
<i>Curriculum Vitae of Dieter Brill</i>	359
<i>Ph. D. Theses supervised by Dieter Brill</i>	362
<i>List of Publications of Dieter Brill</i>	364
