

INDEX

Note: page numbers in *italics* refer to figures and tables

- abundance of parasites 144, 145, 153,
 156, 168, 170–2
 variance ratio 168
- acanthocephalans
 cystacanth 190
 cystacanth infection of *G. pulex*
 423–30
 hosts 424–5
 intraspecific competition 161
 larval infection of *G. pulex* 172
- Acanthocephalus* 425
- accident reporting 2
- Acer pseudoplatanus* 426
- acetylcholine (ACh) 210, 215, 216, 220,
 226
A. suum motility 215
F. hepatica motility 215–16
- acid pepsin 188, 189
- acrylamide 293–5, 299
 handling safety 295
- actin, filamentous 238
- activation 175, 182, 183–90
- adrenaline 217
- Aedes aegypti* 344
- agarose gel electrophoresis 340, 344,
 357, 363
- age
 parasite behaviour 407–13
 swimming rate 410, 412
- agglutination 375
 carbohydrate inhibition 380–1
 lectin-mediated techniques
 378–80
- agglutinins, earthworm coelomic
 fluid 244
- aggregation 153, 168, 171–2
- aggregation pheromone 419
- alanine, cycloleucine uptake
 inhibition 198–200
- Alcian blue 269, 272, 274
 allergic reactions 46, 74, 99, 110,
 126, 162, 186, 211, 222
- Allolobophora* 245, 248
- 452** γ -aminobutyric acid *see* GABA
- amoebae, mouse intestinal tract
 parasites 77
- amoebic dysentery 365
- amoebocytes 12, 243, 244
- amylase 177–9, 180, 181, 206
- Anas platyrhynchos* 425
- Anguilla anguilla* 145–6
- Anopheles* 385–7, 392
 salivary glands 385–93
- ANOVA 144
- anthelmintics 219, 321
 nematode effects 219–29, 321–7,
 329–31
see also benzimidazole; levamisole;
 thiabendazole
- antibiotics, ionophore 305–10
- antibody, use of to detect neuroactive
 agents 231–9
- antibody detection
 basic indirect ELISA 283–91
 experimental immunisation
 293–302
- anti-leishmanial antibody screening
 263–4
- Apodemus sylvaticus* 123
- arecoline 217
- ascariasis 209–10
- Ascaridia* 50, 228
- Ascaris*
 denervated muscle strips 217
 GABA 217–18
 neuromuscular junction 228
- Ascaris* Ringers solution 210–13,
 218
- Ascaris lumbricoides* 45, 51, 209, 219
 classical transmitter effects on
 motility 209–10
 dissection 48
- Ascaris suum* 45–7, 48, 49–51, 210,
 212–13
- ACh 215
 biology 45, 219
 body fluid allergenicity 46, 47, 212,
 222

- classical transmitter effects on motility 209–18
 electrophysiology of body muscle 219–28
 external features 47, 48, 49
 female worms 48, 213
 GABA 215
 handling safety 46, 47, 222
 human infection 45, 222
 immunocytochemistry 238
 internal features 47, 48, 49–50
 micropipette preparation 224–5
 muscle potential recording 225–7
 muscle preparation 223–4
 neuropeptides 217
 safety precautions for handling 46, 47, 211–12
Asellus aquaticus 424–5
Aspicularis tetraptera 139
 ATP-dependent pumps 305–6
 atropine 217
 Aval site 352, 353, 355
 avermectins 321
- B cells 255, 277–81
 bacterial cell lysate extraction 335, 339–40
 bacterial cell lysis 335, 339–40
 barbel 425
Barbus barbus 425
 benzimidazole resistance 321
 nematodes 313–18
 bile duct 120, 273
 bilharzia 107
 biogenic amines 231
Biomphalaria 98
 birds, piscivorous 433, 441
 blackflies 392
Blatta 76
 blowfly salivary glands 393
 borax carmine 33
 Bouin's fixative 17
 Bouin's fluid, alcoholic 205
 brown bodies 12, 15, 17, 243, 247
Bucephaloides gracilescens 35
- Caligida 37
Calliphora erythrocephala 393
 carbachol 217
 carbohydrates
 agglutination inhibition 380–1
 identification of tissue surface 385–93
 resources 161
 salivary gland surface membranes 392
 surface 375–84
 catechol staining technique 56, 61
Catostomus 442
 cell fusion, step-by-step 261–3
Cercaria emasculans 21, 26
Cercaria littorina saxatilis 21, 25
 cercariae 21–9, 54, 97, 100–1, 104, 108–10, 114
Cerithridea californica 29
 cercomer 118, 185
 cestodes
 dispersion pattern 167–72
 intraspecific competition 161–5
 membrane transport 191–200
 transmission dynamics 167–72

 handling safety 268–9
 infected mice 269–71, 272–3
 pathological effects 267–74
- metacercaria 54, 97, 100–1, 104, 105
- methylene blue 17
- methyl green 205–6
- microhabitat preferences 141, 142
- Microphallus pygmaeus* 24
- Microphallus similis* 23
- minnow 425, 442
- miracidium 19, 54, 55, 97, 102, 103, 108, 113–14
- molluscs
 digestive glands 19
 marine 19–29
- monensin
Eimeria sensitivity 305–10
Eimeria sporozoite sensitivity 309
 handling safety 307
- Moniezia expansa* 218
 immunocytochemistry 234–5
- Monocercomonoides orthopterorum* 75
- monoclonal antibody
 production/screening against
Leishmania promastigotes 255–65
 media 257–8
- Monocystis* 11–13, 14, 15, 16, 17, 246
 life cycle stages 15
- monocytes 280
- Monogenea 31–5
 mackerel gills 141–6
- mosquitoes
 head/mouthparts 94
 malaria 93, 95
 salivary glands 93, 386
- motor neurones of nematodes 226
- mouse
H. polygyrus infection 123, 329, 330–1
 house 139
Hymenolepis infections 165
 intestinal parasites 77–9, 80
M. corti infection 269–71, 272–3
 myeloma cell line 258–9, 260–1
 peritoneal exudate cells (PECs) 253
S. mansoni infected 109, 271–2, 273
T. spiralis infection 430
 wild field/wood 123
- mud snail 53, 397
- Mus musculus* 123
- muscle cell electric coupling 227
- muscle potential recording in *Ascaris suum* 225–7
- muscles, glycogen 202
- mussels, parasite Index of Dispersion 171
- myeloma cell line 258–9, 260–1
- Mytilicola intestinalis* 171
- Mytilus endulis* 171
- Nagana 249
- nematodes
 anthelmintic effects 329–31
 benzimidazole resistance 313–18
 culture of third stage larvae 324–5
 egg extraction 315–17
 intraspecific competition 161
 larvae exsheathment 325
 levamisole susceptibility 321–7
 motor neurones 209, 226
 parasite of cockroach 133–40
 parasite of crops 63–71
 parasite of earthworm 11–13, 14, 15, 16, 17
 peptides 217
