---

- Abu Hanifa, 33  
 Abyssinia, first mention of sugar cane in, 24  
 Africa, diffusion of sugar cane to, 24, 33–4  
 agent(s): functions of, 111; as source of capital, 146, 178; as owners, 179; in Hawaii, 226–7  
 agricultural manuals, 27, 56, 94, 204, 232  
 Al-Nuwairi, 38, 39  
 America, *see* United States of America  
 American Sugar Refining Company (Sugar Trust), 167  
 Americas  
   sixteenth and seventeenth centuries:  
     introduction of sugar cane to, 62–3;  
     adaption of industry to new conditions, 63–4; early industry in, 64–83; *see also* Barbados; Brazil; Hispaniola  
   eighteenth century: general conditions, 84–8; cost of plantations, 88–90; land use, 90–3; innovations, 93–105; mills, 105; manufacture of sugar, 105–10;  
   sugar trade, 110–12; plantation society, 112–19; population, 113–17; towns, 118; *see also* sugar (manufacture of); sugar mills and presses; and *under* individual colonies  
   nineteenth century: cane breeding, 123, 141–2; competition from beet, 120, 130, and from new cane sugar producers, 120; labor problem, 123–30; abolition of slavery, 121–2, 123–4; new technology, 122–3, 134–41; *see also under* individual countries and colonies  
 Annam, early industry in, 21  
 Annamese labor, 129  
 Antigua, 124, 129, 133, 225; cane-holes on, 102; windmills on, 102; abolition, and reaction to, 154; technical improvements and central factories, 154–5; decline, 236  
 Antonil, André João, 107, 108  
 Arab agricultural revolution, 27, 33, 119  
 Arabia, diffusion of sugar cane through, 24  
 Arabs, role in diffusion of sugar cane, 23, 25–7, 33–4  
 Arango y Pareño, Francisco, 163, 164  
 Argentina, 144; nationalist policies, 186, 187–8; Argentinian ownership, 187; French interest, 187; labor, 187; production, 186; railways, 186, 187; refinery built, 188  
*arrobas* (Spanish), xiii  
*arrôbas* (Portuguese), xiii  
 Ashtor, Eliyahu, 55, 111  
*aspartame*, 5  
 Australia: distinctiveness of, 228–9; labor policies, 129, 229–30, 231–2; cane-farmers, 231; unions, 232; central factories, 230–1; tariffs for, 232; Melanesian canes in, 141; research, 141, 232–3  
 Azores, unsuitable for sugar cultivation, 50  
 bagasse: around Mediterranean, 39; with the three-roller mill, 75, 97; as fuel, 90, 97–9, 206, 235; as raw material for industry, 235  
 Bahia, *see* Brazil  
 Barbados: introduction of monoculture, 80–1; social revolution in, 80–2; early prosperity of, 82, 86; emigration from, 81, 130, 151–2; slavery in, 81, 115; bagasse for fuel, 98; use of manure, 99; erosion in, 100; cane-holes on, 100–2; windmills on, 102; as center of innovation, 100; population of, 113; type of sugar made, 110, 153; abolition, and reaction to, 144, 150; Court of Chancery, 152; Encumbered Estates

260 *Index*Barbados (*cont.*)

Act, 152; cost of plantations on, 88, 163, and sale of, 152, and amalgamation of, 153; wages in, 150, 153; remittances (and "Panama money"), 152; smallholders, 152; new villages, 152; cane breeding, 142, 150; steam mills, 135; slow adoption of new technology, 150, 153–4; central factories, 154; ownership of industry, 158; future, 236

beet, *see* sugar beet; sugar beet industry

Bengal, *see* India

Booker Bros., McConnell and Co., 179

## Brazil

northeastern (including Bahia,

Pernambuco): plantations (*engenhos*),

71–3, 77; *senhor de engenho*, 71, 73, 75;

*lavrador*, 71–2; Indians, 72; slaves, 72,

115, 116; land use, 72–3; mills, 73;

three-roller mill, 39, 73–6; innovation in

manufacturing, 76–7; Dutch in, 54, 78;

diffusion of industry to Barbados,

77–80; bagasse for fuel, 99; manufacture

of sugar, 107; population, 113, 115, 116;

frontier, 112, 160; Palmares, 117;

expansion in nineteenth century,

158–60; abolition, and reaction to, 160;

*moradores*, 160, 161; steam mills, 135;

central factory system, 161; comparison

with Peru, 182; *rapadura*, 139, 182;

exports to Mediterranean, 45; internal

markets, 162; for alcohol fuel, 235

Rio de Janeiro, 84, 85, 112, 113, 193

São Paulo, 130, 144, 182, 193

breadfruit, 94, 104

British Guiana, 86, 130, 144, 163, 173;

drainage, 103; maroons, 117; policies

towards ex-slaves, 174–5; Madeirans in,

125, 175–6; migrant labor, 175;

indentured Indian labor, 126–7, 176–7;

steam power, 179; vacuum pan

installed, 137, 179; sources of capital,

178–9; change in ownership of

plantations, 179–80; Booker Bros.,

McConnell and Co., 179

Brussels Convention of 1902, 10, 134, 148,

180, 188, 194

Bry, Theodor de, 67, 68, 75

Canadian investment: in Cuba, 168; in Fiji,

226

Canarians: in Hispaniola, 65, 66; Dominican

Republic, 173

Canary Islands: discovery, 55; introduction

of industry, 32, 55–6; influence of

Madeira, 55, 57; cultivation, 56–7;

labor, 56–7; mills, 57–8; decline of

industry, 58; sources for, 80–1

cane-farmers, 72, 81, 177–8, 209, 224, 229,

230, 231, 235

cane-holes, 100–2

cane sugar, *see* sugar cane

Cape Verde Islands, unsuitable for sugar

industry, 48

Caribbean, *see* Americas; and *under*

## Index 265

- industry, 134–5, 136, 138, 157; effects of First World War on, 235
- sugar cane
  - genus *Saccharum*, 11–13
  - cultivation of: methods, 13–14, 16; climatic requirements for, 14–15; soils, 15, diseases and pests of, 15–16, 91, 141, 142; breeding new varieties of, 16, 141–2; fire damage to, 91
  - introduction to the Americas, 61–2
  - possible American origin of, 62–3
- sugar cane (cultivated varieties)
  - Bourbon or Otaheiti: botanical description of, 12; diffusion of, 96, 104, 141, 142, 147, 150, 164, 189; advantages over Creole, 96; “failure” of, 141
  - Cheribon, 12, 141, 142, 147
  - Creole: botanical description of, 11–12; taken to America, 61–3; no alternative to, 92; comparison with Otaheiti cane, 96; replaced by Otaheiti cane, 96, 141, 142
  - Green Natal, 225
  - “noble” canes, 12, 141
  - POJ (Proefstation Oost-Java) canes, 213
  - Ribbon (Batavian stripped, Black Java), 189
  - Uba, 225
- sugar cane industry, brief descriptions of, 16–18, 234–7
- sugar (manufacture of)
  - general characteristics, 16–17
  - Traditional methods: in India, 19–21, 198; around the Mediterranean, 39–40; on São Tomé, 59; in Hispaniola, 67–8; in early Brazil, 76–7; in eighteenth-century America, 105–10; in China, 21–2, 206–7
  - nineteenth-century innovations: vacuum pan, 136–7; centrifugal, 137–8; central factories (*usinas*) and central factory system, 139–40
- sugar mills and presses
  - alçaprema*, 53, 57, 59
  - beam press, 37–8
  - edge-runner, 37, 67
  - engenho*, 71
  - ingenio*, 65–6, 67
  - mortar and pestle, 198, 200; *kolhu*, 202
  - screw press, 38
  - three-roller mill, 39, 69, 207; origins and advantages of, 73–6, 97, 197; improvements to, 105; not adopted in India, 202
  - trappeto*, 74
  - trapiche*, 65, 66
  - two-roller mill: origins of, 206; in China, 75, 205, 207; in India, 198, 199
  - steam mills, 119, 135
  - windmills, 38, 39, 102
  - western technology replaces Chinese, 217
  - development of modern mill, 135–6
- sugar palm, see sagwire palm
- sugar (types of)
  - non-centrifugal; *azúcar de espumas*, 109; *batido*, 108; “brown sugar,” 22, 206; clayed sugar, origin of, 108, in Americas, 108, in China, 206, in Hispaniola, 68, in India, 198, in Morocco, 40, in Spain, 108, in Philippines, 216; *guda*, 20, 21; *gur*, 17, 19, 20, 198, 206, 234; *jaggery*, 198; *khandā*, 20; *khandsari*, 198; *macho*, 108; *muscovado*, 108, 109; *panela*, 109, 139, 182, 234; *pilon*, 216, 234; *šarkarā*, 20, 21; “stone honey,” 22; “sugar frost,” 22, 206; *rapadura*, 139, 182, 234; refined, 109; “rock” sugar, 206; world production of, 234–5
  - centrifugal: definition of 137, 139; replaces non-centrifugal, 183; world production of, 10, 234
- Sung Ying-Hsing, *T'ien-Kung K'ai-Wu*, 204
- Syracuse, Gate of the Sugar Workers, 31
- Syria, 33; decline of industry, 43
- syrup: date, 1; fig, 1; sorghum 4; sugar cane, 22
- Taiwan, 208; from mainland China, 208; Dutch in, 209; pre-Japanese annexation, 209–9; Japanese reorganization, 209
- three-roller mill, see sugar mills and presses
- Tigris, valley of, 24
- Tonkin: early industry in, 21–2; see also centers of innovation
- trapiche*, see sugar mills and presses
- Trinidad, 130, 144, 162, 173; exports, 162; policies towards ex-slaves, 173–5; migrant labor, 175; Madeiran and Chinese labor, 175–6; indentured Indian labor, 126–7, 176–7; cane-farmers, 177–8; sources of capital, 178–9; central factory system, 179; railways, 179; change in ownership of plantations, 179–80
- Tucumán, see Argentina
- United States of America
  - climatic limitations: Florida, 188, 189; frost risks, 189; Thomas Spalding experiments, 189; South Carolina, 189
  - protected industry, 188
  - capital in foreign sugar industries, 163, 167–8, 170, 173, 217
