

INDEX

Page numbers in *italics* refer to illustrations

- aborigines, Australian, 54, 224, 387; 'eloura adzes', 26–8; stone tools, 20, 340–44, 349–50, 351, 363, 375
- Acheulian, 3, 16, 121, 183–4, 280, 350, 392–3; artefacts in association with bone refuse, 13–14, 278, 283–4; chronology, 39, 40–1, 48, 53, 63–70 *passim*, 73–4, 80; Early, 9, 128, 160, 163, 164, 181, 182, 184; Late, 162, 389; Lower, 30, 69, 162; Middle, 67, 70, 152, 162; sites, 54, 152, 171, 172, 191, 196, 286–7; tool morphology and function, 23–31 *passim*, 47, 129, 162, 363, 368, 370–72; Upper, 30, 65, 66, 69, 70
- 'action archaeology', 403
- adaptive systems, 57, 58, 81, 93–4, 118, 288, 295, 392
- Afar depression, 68–9, 121
- Agadir, 68
- Ain Hanech, 60, 128
- Ambrona, 17, 25, 192, 283, 284, 285
- anatomical shifts, 105–7, 312, 313, 354–6; *see also* bipedalism; body size; brain enlargement; robusticity, skeletal; teeth
- 'Ancestors' symposium, New York, 405, 406, 409, 411
- Anfatian marine deposits, Morocco, 68
- animal bones, *see* bones
- antelopes, 133, 244, 282
- anthropology, 404; palaeoanthropological research, 405–11
- archaeological method, 82–4, 377–8, 397–404
- art, 54, 92, 381, 389, 393
- artefact function, 21, 22, 25–8, 35, 129–32, 348–50, 363–70; feasibility studies, 129–31, 321, 365–8; *see also* cut marks on bones; use-wear analysis
- artefacts, *see* stone artefacts
- Aterian industries, 54, 68
- Australia, 213–14; *see also* aborigines
- australopithecines, 18, 58, 63, 64, 111, 280–1, 376; gracile, 175, 182, 354; robust, 121, 128, 175, 183, 184, 355; tool making, 200, 298
- Australopithecus afarensis*, 105, 109, 180, 182, 354, 355
- Australopithecus africanus*, 42, 109, 182, 281, 354, 355
- Australopithecus boisei*, 106, 109, 110, 111, 121, 173, 182, 183, 233, 354, 355; *see also* *Zinjanthropus*
- Australopithecus robustus*, 106, 109, 111, 354, 355
- Auvergne, 74–5
- baboons: bones, 170, 204, 243, 244, 282, 284, 285; feeding behaviour, 134, 272, 364
- Baldwin Fellowship, 411
- behavioural systems, 13–35, 191, 307, 397, 398–9; comparative studies, 17–20, 289, 290–4; early hominid, 57, 271, 312–24, 353, 390–3
- Berkeley, University of California at, research topics of graduate students, 6
- bifaces, 25, 26, 27, 30, 90, 158, 162, 163, 371
- Bindibu tribe, Australia, 28, 54
- Binford, L. R., 7, 8, 400; *Bones, Ancient Men and Modern Myths*, 140, 148–9
- biochemical evidence of relatedness among primates, 99–100
- bipedalism, 91, 93, 94, 105, 108, 314, 324, 355, 390; theories accounting for adoption of, 57, 97–8, 101, 111, 112, 311, 392
- bird bones, 168, 242, 243
- body size, 105–6, 111, 355
- bone tools, 54, 200, 203
- bones, faunal debris; artefact-to-bone ratios, 125, 211, 277–80, 281–2; bone weathering experiment, 199, 201; composition of assemblages, 165–8, 200–4, 241–7, 263, 274, 331; conjoining sets, 145, 154, 248–9, 256, 263, 316, 318, 319; co-occurrence of artefacts and, 107, 120, 123–5, 132–50, 178, 249–50, 298–303, 325–35; distinction between scavenged and hunted, 136, 166; fracture patterns, 135, 154, 167, 187, 204, 246–7,

442 *Index*

- 318; gnaw marks, 146, 147, 201, 204, 245, 332–3; on mini-sites, 263–5; processes governing distribution, 142–50, 178, 192, 199–204, 250, 256, 273–6, 315–20, 325–35; as record of diet and hunting practice, 46, 85–7, 132–7, 273–87, 303–4, 314; *see also* bone tools; cut marks on bones
- Bordes, François, 343, 348
- Boucher de Perthes, Jacques, 14
- bovids, 86, 165, 166, 170, 242, 243, 244, 284, 303; *see also* antelopes
- brain enlargement, 37, 57–8, 91, 93, 101, 389; brain-culture system, 55, 112–17; cranial capacities, 80, 105–6, 109, 121, 355; nutritional cost, 112–13, 115, 376; selection pressures leading to, 97, 98, 271, 314, 322–3, 335; and toolmaking, 113, 127, 322, 355
- Britain, Acheulian industries in, 31
- Brunhes-Matuyama geomagnetic polarity boundary, 64, 65, 122, 184
- Buda industry, 41, 67
- burial practices, 381, 389
- Bushmen, 207, 286, 293
- butchery, 256, 314; of large animals, 132, 135–6, 306–7, 334, 368, 392; sites, 85–6, 125, 277, 282, 283–4; tools, 25–6, 129, 130, 254, 331–2, 369; *see also* cut marks on bones
- campsites, 82, 107, 328; aborigine, 348–9; *see also* home-bases
- carbon-isotope ratios, 176
- carrying behaviour, *see* transport of food and implements
- Casablanca area, 68, 128, 284, 286
- casts and replicas, fossil, 407, 409–10, 411
- cave sites, 286, 325
- central-place foraging model, 114, 115, 116, 141, 179, 333–5, 376
- Chellean, 64
- Chemeron Formation, 60
- Chencherere, 167
- Chesowanja, 79, 121, 135, 165, 314, 390; Chemogoit Formation, 183; chronology, 80, 295, 315; co-occurrence of artefacts and burned-clay fragments, 151, 186; palaeoenvironment, 169; stone artefacts, 128, 157, 358
- Childe, V. Gordon, 397, 400
- chimpanzees, 18, 105, 107, 207, 307, 376; compared with humans, 92–3, 99, 100, 104, 290–2, 293–4; feeding behaviour, 114, 134, 166, 272, 290–2, 293–4, 364, 365; tool use, 52, 293, 353, 362
- choppers, 89, 90, 160, 161, 162, 240; efficiency of, 130, 131
- chopping tool industries, 39, 41
- Choukoutien, 41, 45, 46, 74, 150, 283; plant-food refuse, 187, 275, 276
- chronology, 4, 37–76, 315, 353; frequency distribution of C¹⁴ dates in Europe, 72–3; frequency distribution of C¹⁴ dates in sub-Saharan Africa, 73–4
- Clactonian, 16, 41, 369
- Clark, J. Desmond, 4, 25, 405, 410
- Clarke, D. L., 3; *Analytical Archaeology*, 34, 400–1
- cleavers, 158, 163, 367, 369, 371; efficiency of, 129, 130
- climate, 108, 170; climatostratigraphic divisions, 74; *see also* environment
- communication systems, 29, 94, 290, 309, 380, 390; *see also* language
- computers, use of, in archaeology, 402
- containers, carrying devices, 52, 277, 306–7, 368, 383–4, 389
- core-scrapers, 130, 240, 367, 368
- cores, flaked pieces, 88, 89, 121, 129, 163, 240, 253–4, 266, 374–5
- cultural evolution, 13–14, 15–16, 29, 34, 37–59, 112–17, 322, 381–90
- cultural transmission systems, 29, 34, 55, 322
- culture history, 34, 43, 339, 341, 347, 351
- cut marks on bones, 9, 131–7, 245–6, 254, 256, 318, 322, 330, 369; analysis of, 129, 133, 134, 185; co-occurrence of marked bones and hominid fossils, 134, 135, 173; distribution patterns of marked bones, 131, 133, 134, 135, 147, 167
- Danakil depression, 68–9
- Dar es Soltan, 68
- Darwinian theory, 14, 92, 96, 97–8, 104, 108, 112, 118, 132
- debitage/waste, 88, 89, 129, 159, 367; distinction between 'tools' and, 163, 266, 341, 343, 358
- Developed Oldowan, 63, 80, 164; artefact morphology, 121, 162, 185; sites, 171, 181
- developing countries, sponsoring palaeoanthropology in, 405–11
- diet, 46, 47, 82, 111–12, 117, 175–6, 271–88; *see also* meat; plant foods
- digging sticks, 364, 365, 383
- dimorphism, sexual, 106
- discoids, 90, 131, 160, 162, 240
- division of labour, 19, 57, 92, 93, 94; sexual, 272, 277, 288, 305–6, 308, 310
- Djetis Beds, Java, 61, 63
- Dolni Věstonice, 46, 55
- East Africa: archaeological sample densities, 23, 24, 44; land-use patterns, 210, 211; Late Tertiary hominid occurrences, 60; Lower Pleistocene, 60–3, 120–87; Middle Pleistocene, 23, 24, 63–5, 66; sites, 124, 326, 327; as source of early hominid fossils and archaeological traces, 78–94, 352; Upper Pleistocene, 69–70; *see also* individual sites
- East Rudolf, *see* Koobi Fora
- East Turkana, 2, 4, 5–6, 8, 9; *see also* Koobi Fora
- ecology, 98; early hominid ecological relationships, 91, 176–7; hominid ecological range, 45–6, 108, 288, 382
- elephant bones, 133, 136,

- 165, 282, 284, 285, 332, 369
- environment, 54, 78, 97–8, 108, 168–75, 320
- equids, 86, 133, 165, 166, 242, 243, 244, 284
- Ethiopia, palaeoanthropological studies in, 408
- ethnic groups, evidence of, 161, 164
- ethnoarchaeology, 7, 8
- ethnography, 17–18, 48, 55, 350, 403
- evolutionary theory, *see* human evolution
- exchange networks, *see* interaction networks
- fauna, 86, 170, 242, 243, 244, 282, 284, 303; microfauna, 166, 167–8, 282, 284, 292; *see also* bones and individual species
- feeding behaviour, 114–18, 273–5, 332–3, 335; preparation of food, 293; provisioning of infants, 122, 333, 335; *see also* food sharing; transport of food
- fire, 106, 107–8, 150–1, 214, 293
- First Intermediate industries, 41, 74
- fish, 263, 286
- flakes, 88, 128, 129, 154, 159–60, 162–3; efficiency of, 130, 131, 331–2, 366, 370; retouched, 89–90, 121, 162, 240–1, 374; terminology, 163, 266; *see also*debitage/waste
- 'flow systems', artefact, 158, 159, 177, 334, 361, 362
- food, *see* diet; feeding behaviour; food refuse; food-sharing; gathering; hunting; meat; plant foods; transport of food
- food refuse, 19, 85–7, 214, 271, 273–6; plant-food refuse, 275–6; *see also* bones
- food-sharing, 19, 87, 122, 289–311; definitions, 335; as element of adaptive complex, 57, 93, 94, 295, 392; evidence of, 46, 52, 63, 107, 121, 149, 281, 332–3, 391; and evolution of brain-culture system, 114–17, 137, 310–11, 322–4; human and ape behaviour compared, 92, 114, 272–3, 290–2, 293–4; and tolerated scrounging, 333, 335; and use of containers, 277, 306; *see also* central-place foraging model
- Fort Ternan, 60
- France; Palaeolithic studies, 31; sites, 44, 60, 70, 74–5, 285, 286
- Gadeb, 121, 135, 151, 165, 181, 314, 315; palaeoenvironment, 169; stone artefacts, 157, 162, 164, 329
- gathering, 93, 94, 113, 187, 272, 282; female, 97, 114, 277, 288, 306
- geochronometry, 38–41, 57, 59, 79
- geographic expansion, hominid, 45–6, 108, 288, 382
- Gibraltar skull, 97
- giraffids, 86, 165, 166, 170, 244, 282, 303; body-part representations, 242, 243; cut marks on, 133, 368
- glaciations, 108; Gunz, 74; Mindel, 31, 74; Riss, 31, 67; Würm, 31; Würm II, 70
- Gombe National Park, chimpanzees of, 293–4, 364
- gorillas, 99, 100, 104, 105, 106, 207, 364
- Gwisho Springs, Zambia, 286
- habitat, 170, 320; shifts, 97–8, 108
- Hadār, 90, 180, 295, 296, 313; artefacts, 107, 126, 180, 355, 390
- Haldane, J. B. S., 398
- hammerstones, 241, 300
- handaxes, 28, 31, 47, 90, 158, 163, 369–71; efficiency of, 129, 130
- Haua Fteah, 47, 71, 73
- Hawkes, Jacquetta, 397, 398, 399, 402, 404
- Higgs, Eric, 3
- High Lodge, 17
- hippopotamus, 133, 165, 242, 243, 244, 285, 298–300, 303; butchery sites, 85–6, 136, 181, 283, 297, 368
- Holocene, 54, 55, 74, 286
- home-bases, 5, 7, 8, 121, 149, 226, 376, 391; classification of, 125, 277; as element of adaptive complex, 19, 93, 94, 306; evidence of, 46, 57, 63, 121, 281; human and ape use of, compared, 92, 114, 272–3, 292, 293; interpretation of, 107, 116, 137–40, 179, 225, 314, 325, 326; movement patterns from, 208, social implications of, 82, 87; *see also* central-place foraging model
- hominid fossils, 60–76 *passim*, 78–82, 283, 390; anatomical shifts, 105–7; co-occurrence with cut-marked bones, 134, 135, 173; discovery of, 101–4, 120, 121; environmental context, 91, 108, 170–3; relationship to archaeological traces, 91, 123, 173, 280, 281, 298, 354–6
- hominoid fossils, 104–5, 108, 175
- Homo* genus, 42, 106–7, 108, 128, 173, 179, 298
- Homo erectus*, 109, 110, 233, 353; location and dating of fossils, 63, 65, 70, 121, 128, 182, 183
- Homo habilis*, 111, 128, 136, 354, 355, 356; cranial capacity, 106, 109; location and dating of fossils, 121, 182, 183
- Homo palaeohungarica*, 67
- Homo sapiens*, 53, 70, 109, 290; 'archaic', 107, 110, 353, 355; *sapiens*, 58, 354; *see also* Neanderthal man
- Hope Fountain assemblages, 121
- Hottentot bone refuse, 204, 274
- Hoxne, 369
- human evolution, 8, 9, 18–19, 91–4, 96–118, 132, 294–6, 308; biological, 57–8, 105–7, 312, 313, 354–6; gradualist and punctuated equilibrium models, 110; *see also* cultural evolution
- Humbu Formation, 63–4, 370
- hunter-gatherers, 72, 94, 98; studies of modern, 207, 289, 290, 292–3, 306, 323, 325, 340, 350
- hunting, 46–7, 97, 122, 247, 282, 287–8, 300; cooperative, 285, 287, 311; difference between human and ape behaviour, 92, 292, 364; distinction between

444 *Index*

- scavenging and, 136, 137, 166, 178–9, 257, 332; and division of labour, 306, 308; equipment, 131; evidence of, 25, 46, 107, 284; evolutionary significance of, 17, 52, 113, 132, 271, 311, 322–3, 393; as part of adaptive complex, 19, 57, 94, 273
- Huxley, Julian, 398
- Huxley, T. H., 97
- hyenas, 170, 201, 203, 204, 331, 332; role in site formation, 146, 147, 148
- infant dependency, 112–13, 376
- interaction networks, 29–30, 55–6
