 Weissman, D., 136n.
 Whittaker, E., 124.
 Williams, B., 271n.
 Wittgenstein, L., xv, 140.

Index of subjects

- Abduction, 92–6, 120–2.
- Acceptance, xii, xiv, 3, 15, 35, 88; and high probability, xii, 22, 43–5, 223–4; and maximizing probability, 58; and the seriousness of mistakes, 4–6; as evidence, xiv, 45, 88; as strongest via induction, xii, 45–6, 54, 93; mere, xiv; tentative, 51n.
- Acceptance rules, caution dependent family of, 217–19; caution dependent family of deductively cogent, 219n., 222; feebly cogent, 219, 224–6; piecemeal cogent, 219, 223–4; deductively cogent and relative to ultimate partition, 48–50.
- Agent, 87.
- Allais paradox, xivi, 257n., 266–9.
- Arrow's impossibility theorem, 269–70.
- Ascendancy value, 231–4.
- Avoidance of error and seriousness of mistakes, xi, 4, 5, 79–82, 98, 117–22, 143, 158.
- Background knowledge and observation, 71–5.
- Bayes method, 35, 36, 41, 53.
- Bayesianism, xvi, 91–2, 128–31, 133, 147, 265–9; strict, 147–8, 202, 215–17, and sure thing principle, 265–9.
- Belief, degrees of, 135; acceptance based, 216, 218–19; probabilistic, 215–16; as lower probabilities, 215–16.
- Boredom, 146.
- Caution (boldness), xi, xii, 22–5, 30–2, 60–4, 77–8, 98–9, 142n.
- Chance (statistical or objective probability), 180–2, 192; and covering laws, 189–90; and direct inference, 182–4; and dispositions, 180–2; and frequency, 192–6; and propensity interpretation, 185n., 185–6; single case and long run, 187–9, 193n.
- Cognitive state, 87–92.
- Cognitive values (see epistemic utility).
- Cognitive goal, 15.
- Combining evidence, 226–8.
- Commitment and living up to a commitment, 147–8.
- Conceptual change, 140.
- Conditionalization, 149; confirmational, 149, 204, 206–8; inverse temporal credal, 149, 204; temporal credal, 149, 204.
- Confirmation, 20n., 34; degrees of, 9–10, 15.
- Confirmational commitment, 89, 148–9, 201; and credibility, 166n.
- Confirmational tenacity, 90.
- Conflict between values, x.
- Consistency and possibility, 148–51.
- Content, 36, 39, 41, 43, 65–7.
- Contractarianism and states of ignorance, 133–4.
- Contraction, 90, 116, 122–5, 149, 169; and corrigibility, 124–5; and eliminating inconsistency, 123–4, 123n.; and giving a hearing to a worthy hypothesis, 124; and minimizing loss of information, 123, 169.
- Corpus of Knowledge, 88, 113–15, 148, 167–8, 201.
- Corrigibilism, xiv–xvii, 112–13, 116, 124–5; and fallibilism, 112–13, 116–27, 168; and truth as an ultimate or a proximate aim, 126–7.
- Corrigibility, grades of, 122.
- Corroboration, 20n., 34–41.
- Credal state, 89, 147–8, 120, 214–16; and credal coherence, 201, 206–8; and credal consistency, 201, 206–8; and credal convexity, 202; and credal uniqueness, 202; indeterminate, 98, 132.
- Decision making, cognitive, x, 142, 144–5; under uncertainty, 228–31; open ended decision problem, 6–8.
- Deductive closure, xii, 44–5, 88, 113–15, 148.
- Deductive cogency, 44–5, 88.
- Direct inference, 182–4, 192–213.
- Dispositions, 176–80; as placeholders, 178–80; explicit, 176, 178–80.

INDEX OF SUBJECTS

- Dissonant support functions, 225–7.
 Dominance principle, 246–7, 250–1.
 E-admissibility, 228, 233, 278.
 Edification and hermeneutics, 136, 138, 146.
 Epistemic utility, ix, xiii, 22–5, 36–40, 52, 56–64, 75–82, 96–9, 142–3; expected, ix, 22–5, 36–40, 63, 75–84.
 Error, partial, 76, 79–81; risk of, 52; types I and II, 26–31.
 Estimation, 96.
 Expansion, 90, 115–22, 149, 170; deliberate, inferential or inductive, 90, 92–106, 116; deliberate and trade off between risk of error and information; deliberate as not injecting contradiction, 119; routine, 90–2, 116–17; routine and routine decision making or inductive behavior, 91–2, 117n.; routine and trade off between risk of error and information, 118–19; routine as contradiction injecting; routine via observation, 91, 117n.; routine via the testimony of witnesses, 91.
 Evaluation of experiments, 70–86.
 Explanation, deep, 179.
 Fallibilism and infallibilism, xiv–xv, 51n., 110–16, 124–5, 168; and gulf between theory and practice, 112.
 Falsifiability, 36, 39.
 Falsificatory potential, 236–40.
 Fiducial argument, 209n., 211–13.
 Foundationalist epistemology, 87, 109, 136, 140, 143.
 Gambler's indifference map, 232.
 Hacking's principle of irrelevance, 209n.
 Ideally situated rational agent, 147–8.
 Ignorance, 128–35, 217; Laplace = probabilistic, 129–30, 217; modal, 128–9, 217; probabilistic = extreme probabilistic, 132–4, 217; Shackle-like = extreme modal, 135, 217.
 Improvement of knowledge, 87, 90.
 Incognisables, xvi.
 Incommensurability, 136, 138, 143–4.
 Inconsistent corpus, 114–15.
 Indeterminate situation, 92, 105.
 Individual and social decision making, 257, 264, 269–70.
 Individualism and social agency, 257–63.
 Inductive behavior, 6n.
 Inductive logic, 131, 202–3; coherentist, 203; objectivist, 203.
 Inductive support and inductive probability according to L. J. Cohen, 235–41.
 Inductivism and anti-inductivism, 51n.
 Information, demanded by a question, 45, 52–3, 67–9, 100–1, 117–22; semantic conception of, 54–6.
 Informational value or utility, xi, 57–9, 64–9, 76–7, 139, 169; and grades of corrigibility, 169; and simplicity, explanatory value *et al.*, 69n., 99–102, 139.
 Insufficient reason, 130–1.
 Interpersonal comparison of utility, 269–70.
 Intervalism, 215–16.
 Knowing that one knows and that one does not know, 158–60.
 Knowledge and belief, 151–4.
 Knowledge as a resource for deliberation and inquiry, 88, 109, 151–4.
 Liberalism or libertarianism, 106, 146; as a condition on a social choice mechanism, 272–5; rugged, 273n., 273–4, 280.
 Lottery 'paradox', 44, 48–8, 67–8.
 Maximizing preference, 263.
 Maximizing expected utility, 19–21, 35–7, 53, 229, 246–7, 247–50; a second version when states causally independent of options, 251–5.
 Maximum likelihood point estimation, 31.
 Maximin (or minimax), 31, 132–3, 229, 267–8; and pessimism or paranoia, 230, 233, 256.
 Miller's 'paradox', 193n.
 Modal realism, 154–7, 167.
 Myopia, 126–7.
 Naturalized epistemology, 87, 109.
 Necessitarianism, 203, 205.
 Neutral outcome, 232.
 Newcomb's problem, xvi, 245–56.
 Nondictatorship, 269.
 Normal and revolutionary science, 137, 140n.
 Null hypothesis, 26–31.
 Objectivity, 53n., 69.
 Observation report, 91.
 Open ended decision problem, 6–10.
 Optimism–pessimism, 229, 232–3.
 Paretian liberal, xvi.
 Pareto principle, 273n.
 Pedigree epistemology, 87, 109.
 Personalism, 131–2.
 Political epistemology and objectivity, 101.
 Possibility, as ability, 151; logical, 150; serious, 111–15, 128–9, 147–61, 166–7; standard for serious possibility, 88, 111–15n., 148; knowledge as standard for serious possibility, 151–4; double standard, 152.

INDEX OF SUBJECTS

- Potential (relevant) answers, 46–50, 53–6, 92–6.
- Potential resolutions of value conflict, 97–8.
- Pragmatic, 53n., 69.
- Pragmatism, 141, 270.
- Probability, expectation or betting rate determining, 56n.; information determining, 66–8; logical, 56n.; regular, 208; subjective or credal, 56n., 165.
- Probabilistic relevance, xi.
- Problems or questions occasioning inquiry and determining epistemic utility, 52, 53–4.
- Professionalization of philosophy, 136.
- Quantifying into epistemic contexts, 160–1.
- Random selection vs. random membership, 196–8.
- Randomization in the selection of controls, 211.
- Reference class, 198–200; reference descriptions in lieu of, 208–9.
- Relief from agnosticism or doubt, see informational value.
- Repeatability, dogma of, 209–10.
- Replacing doubt by belief, 23; by true belief, 15–16; by true belief tempered by additional desiderata, 16, 18, 24–5, 96.
- Replacement, 116, 125–6.
- Research program, 101.
- Residual hypothesis, 94.
- Residual shift, 116.
- Sample space, 180.
- Security level, 132, 267.
- Sen's condition L (libertarianism), 271, 274, 280.
- Seriousness of mistakes, 4, 5, 14–33.
- Simple vs. composite statistical hypotheses, 180.
- Simplicity and truth, 121–2.
- Social states and aspects of social states, 271–2, 275–9.
- Social welfarism, 272–5, 280.
- Social welfarist libertarianism, 275, 280.
- Spreads in the odds, 230.
- Standards of social value and views of social welfare, 272.
- Standard designator, 161, 193n.
- Stochastic irrelevance, 209.
- Subjunctive conditionals, 170–6; and chances, 188–9, 194–5; and cotenability, 173–4; and laws and dispositions, 170–1; counterfactual, 170–3; open, 170–1.
- Surprise, potential, 134–5, 214–42.
- Suspension of judgement, 22–5, 28–1, 95–6, 270.
- Theoretical goals, 16, 32.
- Theory and practice, 112–13.
- Ties in epistemic utility, 97.
- Total knowledge requirement, 89–90, 114n.
- Truth, 52, 114–15, 157–8; and nothing but the truth, 15, 18, 21–2, 32, 57–9; utility of, 57–9, 157–8.
- Ultimate partition, 47–50, 68, 71–5, 93–5, 102–6.
- Urcorpus (incorrigible truths), 113, 148, 150, 201.
- Utility, 20–5.
- Value conflict, 97, 139, 257.
- Value neutrality, ix, 3, 9–13; and autonomy of science, 194–5.
- Variants, 236; normal and abnormal, 236.
- Verdoppelte Metaphysik, 177.
- Weight of argument, 72, 83, 221n.
- Welfarism, 273n.
