Preface	xix
About the Author	xxiv
<b>1 Introduction: Space, a Tale of Several Europes</b>	<b>1</b>
A Space Phenomenon on Earth	1
Approach	1
<b>PART I – THE GENESIS OF COOPERATION</b>	
<b>2 Rockets, the Cold War and Sputnik's Civilian Legacy</b>	<b>3</b>
1 The Challenge of Spaceflight	3
2 The Origins and Strategic Applications of Space Technology	4
2.1 Early Developments	4
2.2 Sputnik and the Age of the ICBM	5
3 The American Mobilization for Space	6
3.1 The US' Strategic Reaction to Sputnik	6
3.2 The First Civilian Space Agency: NASA	7
3.3 Fruits of the US' Early Space Activities	9
4 Britain, Blue Streak and the Space Option	10
4.1 The Development of British Strategic Missile Technology	10
4.2 First UK Civil Space Initiatives	12
<b>3 Blue Streak's Fate and the End of British Tripartism</b>	<b>17</b>
1 From Blue Streak to Skybolt	17
2 The Consequences of Blue Streak's Cancellation for UK Geopolitical Strategy	18
3 The Decision to Realign the UK towards the EEC	19
4 The Offer of Blue Streak to Europe	21
5 The Policy Dimension: The Price Report	21
6 Political Salesmanship: Clinching a Deal on Blue Streak's Use	22
6.1 The French Connection	22
6.2 The Conversion of the Reluctant	24
7 Conclusion	25

4	Going from The Very Small to The Very Big: The Impulse towards Space Research in Europe	28
1	European Reactions to US/Soviet Space Physics Research	28
2	Self-Organization: The European Fundamental Physics Community's Space Science Initiative	29
3	Establishing British Leadership: The Royal Society Conference	31
4	From Embryo to Foetus: GEERS and COPERS	31
4.1	The European Space Research Study Group (GEERS)	31
4.2	Institutional Bifurcation: The Meyrin Conference	32
4.3	COPERS	33
5	Conclusion	35
PART II – EUROPE'S FIRST SPACE ORGANIZATIONS		
5	Parallel Paths into Space: ELDO, ESRO and their Charters	39
1	The Wild Blue Yonder: The Space Race, Polaris and de Gaulle	40
2	Signed, Sealed But Not Yet Delivered: ELDO and ESRO's Interim Regimes	41
2.1	The ELDO Preparatory Group	42
2.2	The 1962 Final Act and COPERS as ESRO's Forward Base	42
3	The ELDO Convention: A Charter for a Joint Venture in Space	43
3.1	ELDO's Purpose and Scope	44
3.2	Programme Structure	44
3.3	Infrastructure	46
3.4	Transfers of Technology	48
3.5	Organs and Powers	50
3.6	Finance	52
3.7	Cooperation and Liability	54
3.8	Disputes	54
3.9	Evaluation	54
4	The ESRO Convention – An Organic Law	55
4.1	Purpose and Scope	55
4.2	Programme Structure	56
4.3	Infrastructure	56
4.4	Information	57
4.5	Organs and Powers	58
4.6	Finance	59
4.7	Cooperation	60
4.8	Disputes	60
4.9	Entry into Force	60
5	Conclusion	60

<i>Contents</i>	xi
<b>6 The Building of Europe's Early Space Capacity</b>	<b>66</b>
1 ESRO's Infrastructure System	66
1.1 The Build-Up of ESRO's Establishments	66
1.2 Commencement and Alteration of ESRO's Programme	67
1.3 ESRO's Internal Organization	70
1.4 Agreements on Infrastructure and Services	71
2 ELDO's Infrastructure Relationships	75
3 Pulling the Levers of Industry: Procurement Approaches and Industrial Management in ESRO and ELDO	76
3.1 Space Procurements and Their Economic Implications	76
3.2 The Space R&D Contract as Management Tool	78
3.3 Privileges and Immunities in an R&D Setting	78
4 The Growth in Space Capacity at National Level	78
4.1 Britain	79
4.2 France	80
4.3 West Germany	83
4.4 Italy	87
4.5 The Rest	88
5 Conclusion: The Economic Impact of Early Space Investments	89
<b>7 The Advent of International Satellite Communications and Europe</b>	<b>95</b>
1 The Nature of the Communications Satellite	96
2 The Market: Satellite versus the PTT Wire	96
3 America's Private Enterprise Answer to Cable – Comsat	97
4 Initial Moves to Establish a Global System	98
5 Europe's Reaction and the Creation of CETS	99
6 The Intelsat Negotiations and Interim Arrangements	100
7 CETS' Further Role	102
7.1 Structure	102
7.2 CETS' Five-Year Strategy and First Activities	103
7.3 The First ESRO Satellite Study	104
7.4 The Rise of National Projects – Symphonie	105
7.5 ESRO's Further Study Work and CETS' Decline	106
8 Summary and Conclusion	107
<b>8 Now Let's Play Launcher Redesign – ELDO's Early Tribulations and Attempts at Reform</b>	<b>114</b>
1 ELDO's Initial Situation	114
2 The Pressures on the Initial Programme's Goals	115
3 The French Crisis	116
4 The British Crisis	117

*Contents*

5	The Resolution of the British Crisis and the 1966 Reforms	117
5.1	Reorientation of ELDO's Programme	117
5.2	Reform of Cost Control and Contract Management	118
6	The Initiative to Create a European Space Policy Body	120
9	A Forum for Crisis – The European Space Conference	124
1	The ELDO Terms of Reference for the Conference	124
2	The Paris Inaugural Conference	125
3	The 1967 Rome Conference	125
4	Causse's Road-Map for Space – The Advisory Committee's Report	127
4.1	The Report's Outlook and General Principles	127
4.2	Missions	128
4.3	Technologies	129
4.4	Organization	129
4.5	Industrial Policy	130
4.6	Financing	130
5	The Rupture of Europe in Space: The UK's Rejection of the Causse Report	130
6	After Nemesis: The Search for a Survival Strategy	132
6.1	The ELDO Ministerial Council of July 1968	133
6.2	Post-Causse Proposals on Institutional Reform	133
7	Accommodating the UK Position: The Compromises of November 1968	135
7.1	The ELDO Ministerial Conference of 11 November 1968	135
7.2	The Bonn (Bad Godesberg) ESC of 12-14 November 1968	136
8	The Long Road from Godesberg into the Post-Apollo Era	138
8.1	The ELDO Ministerial Conference (December 1968/April 1969)	138
8.2	The Close of ELDO's Initial Programme	140
8.3	The Post-Apollo Age	141
8.4	The Puppi Report	143
8.5	The Brussels ESC of July/November 1970	144
8.6	The 1971 American Offer on Launch Services	145
8.7	1971/72: A Crisis in Space on Both Sides of the Atlantic	146
8.8	The Kourou F11 Launch	147
9	Summary and Conclusion	149
10	Metamorphosis: The Transformation of ESRO, ELDO's Downfall and a Franco-German Space Pact	155
1	Reaching Maturity: ESRO's Profile in Early 1971	155
2	The Effect of the French Denunciation of the ESRO Convention	156
3	Progress on Missions for Applications Programmes	157
4	Movement on Principle: The ESRO Council of 13/14 July 1971	158
5	The December 1971 ESRO Reform Resolution	159
5.1	Programme Aspects	159
5.2	Institutional Aspects	160

<i>Contents</i>	xiii
6 The ESRO Applications Satellite “Arrangements”	161
6.1 The Model Agreement	162
6.2 The Aerosat, Meteosat and Communications Arrangements	162
7 ELDO's Final Days	163
7.1 The Effort to Save ELDO	163
7.2 The December 1972 ESC: Recoupling Launchers and Post-Apollo without ELDO	164
7.3 ELDO's Collapse	165
8 A New Machine – The LIIS	165
9 A Package Deal: LIIS + Spacelab + Marots	166
9.1 Consolidating a Franco-German European Space Pact	166
9.2 Cutting the Deal: The July 1973 ESC	166
9.3 Structural Implications	168
9.4 The 1973 Package Deal Arrangements	169
10 The ESC of April 1975 and the Founding of the European Space Agency	172
11 Summary and Conclusion	173

## PART III – THE EUROPEAN SPACE AGENCY

11 The ESA Convention and ESA's Basic Institutional System	179
1 Comparison with the 1962 ESRO Convention	180
2 Purposes and Scope	180
2.1 ESA's Policy-Formation and Integrative Role	181
2.2 ESA's Space Competence	183
2.3 ESA's Civilian Role	184
2.4 ESA's R&D Role and the Policy of Divestment	187
3 Programme Structure and Procedures	189
3.1 Mandatory Activities	189
3.2 Optional Activities	189
4 Organs and Their Powers	195
4.1 The Council	196
4.2 Types of Subordinate (and Quasi-Autonomous) Bodies	199
4.3 The Executive	203
5 Infrastructure and Launcher Policy	205
6 Technology Transfers	207
6.1 Transfers among Member States and ESA	208
6.2 Transfers to Operating Agencies	208
6.3 Transfers beyond Member or Participating States' Territories	209
7 Industrial Policy	209
8 Finance	209
9 Cooperation	210
10 Continuity of Obligations and Privileges and Immunities	211
11 Dispute-Settlement	211
12 Signature and Entry into Force	212

Cambridge University Press

xiv	<i>Contents</i>	
13	ESA's <i>de facto</i> Succession Arrangements	212
14	Summary and Conclusion	214
12	ESA's First Generation and Continuation Programmes	222
	<i>A. Mandatory programmes</i>	223
1	The Space Science Programme	223
	1.1 Missions Approved Before 1985	223
	1.2 Missions Approved After 1985: The Horizon 2000 Programme	229
	1.3 Horizon 2000's Fortunes and Horizon Plus	232
2	Technology Programmes	234
	<i>B. Optional programmes</i>	235
3	Ariane	235
	3.1 The Initial Programme and its Commercialization	235
	3.2 Follow-On Programmes	237
	3.3 The Changing Shape of Ariane Programme Arrangements	241
4	Spacelab	241
	4.1 The Entry into Manned Spaceflight Systems	241
	4.2 The Development Phase	242
	4.3 Spacelab's Delivery and SL-1's Operation	245
	4.4 Financial Control on Shifting Sands	246
	4.5 The Impact of Cost Overruns on Spacelab's Utilization	247
	4.6 Spacelab Follow-On Development	248
5	Eureca	250
6	Applications Satellites: Telecommunications	252
	6.1 Satellite Programmes	253
	6.2 Industrial R&D Support Programmes – ASTP, TPP, PDSE and ARTES	260
7	Applications Satellites: Earth Observation	264
	7.1 Introduction	264
	7.2 Meteorology	266
	7.3 Remote Sensing: From Earthnet to ERS and the PPF	270
8	Conclusion	277
13	ESA's Second Generation Programmes: Man in Space and the Long-Term Plan	290
1	Introduction	290
2	The Origins of the Second Generation Programmes	291
	2.1 The Spacelab Factor and US Space Planning	291
	2.2 The Status of ESA's Programme Portfolio	292
	2.3 The STS Long-Term Preparatory Programme	293
	2.4 The US Space Station Decision and Preliminary Programme Decisions	294
3	The Opening of the Second Generation Era	294
	3.1 The 1985 Long-Term Plan (LTP) Proposal	294
