(See also Appendix B)

- absolutely convergent 62
- absolute value function 1
- absolute value of a sign 258
- additions of signs 258
- $\sigma$ -additive measure on  $\mathbb{Z}_p$  275
- analytic function 68
- analyticity of  $p$ -adic zeta function 186
- antiderivation 93 ff, 241, 248, 249
- antiderivative 59
- approximation of the identity 241
- archimedean valuation 18
- Artin–Hasse exponential 142
  
- Baire’s category theorem 270
- Baire space 270
- ball 47
- Banach algebra over  $K$  34
- Banach’s contraction theorem 269
- Banach space over  $K$  30
- base, Mahler’s 149
- base, van der Put’s 190, 205
- Bernoulli numbers 171
- Bernoulli polynomials 174
- best approximation 55
- between 65
- Borel set 274
- bounded 47
  
- category theorem 270
- $C^n$ -distribution 284
- $C^\infty$ -distribution 286
- centre of a ball 25, 47
- centre of a disc 25
- $C^1$ -function 77, 255
- $C^2$ -function 82, 256
- $C^n$ -function 86
- $C^\infty$ -function 86
- characteristic function 50, 73
- clopen 48
- ‘closed’ ball 25, 47
- ‘closed’ disc 25
- continuity 57
- continuously differentiable 76
- contraction theorem 269
  
- convergence in  $C^n$  118
- convergence, pointwise 58
- convergence, unconditional 61
- convergence, uniform 58
- convergent sequence in  $K$  56
- convex (subset of  $K$ ) 65
- convolution 106, 281
- $C$ -regular polygon 255
- $C$ -regular triangle 253
  
- $d$ -Cauchy 209
- $d$ -convergent 209
- dense metric 51
- dense valuation 26
- derivative 59
- diagonal 90
- diameter 47
- Diamond’s log gamma function 182
- diffeomorphism 224
- difference quotient 76, 82, 86, 255, 256
- differentiability, continuous 76
- differentiability, strict 77
- differentiability, uniform 77, 84
- differentiable 59
- Dirac measure 275
- disc 25
- discrete metric 51
- discrete valuation 26
- distance between sets 47
- distribution 284
- divergent 57
- $d$ -limit 209
- double sequence 57
  
- entire part,  $p$ -adic 189
- equidifferentiability 209
- equivalence (of norms) 32
- equivalence (of valuations) 20
- exponential function 70, 128, 142
- extension of  $C^n$ -functions 248
- extension theorem for valuations 34
  
- first class of Baire 212
- fixed point 269

- gamma function, complex 107  
 gamma function,  $p$ -adic 109  
 gap 203  
 Gel'fand Mazur's theorem 35  
 $G_\delta$ -set 204
- Haar integral 286  
 Hahn–Banach theorem 288  
 Hensel's lemma, algebraic form 8  
 Hensel's lemma, analytic form 80
- increasing function on  $K$  66  
 indefinite sum 106  
 integer,  $n$ -adic 4  
 integer,  $p$ -adic 7  
 $\mu$ -integrable 280  
 integral, on compact space 276  
 integral, Volkenborn 167  
 integration 93 ff, 167 ff, 274 ff  
 interpolation,  $p$ -adic 98  
 interpolation polynomial 99, 151  
 isometry 47  
 isosceles triangle principle 47  
 Iwasawa logarithm 132
- $K$ -algebra 34  
 Kaplansky's theorem 127  
 $K$ -automorphism of  $L$  41  
 $K$ -Banach algebra 34  
 $K$ -Banach space 30  
 Krull's theorem 34  
 Kummer congruence 188  
 $K$ -valued characteristic function 73  
 $K$ -valued measure 276
- limit (of a sequence) 57  
 Liouville number,  $p$ -adic 201  
 Liouville theorem, ultrametric 124  
 Lipschitz condition 74  
 Lipschitz constant 74  
 local analyticity of  $\Gamma_p$  178  
 local analyticity of  $G_p$  183  
 local invertibility 79, 237  
 locally analytic (function) 69  
 locally constant 73  
 locally convex space 31  
 $\log_p 2$  180  
 logarithm 71, 128, 132  
 log gamma function 182
- Mahler coefficient 149, 160, 163, 166  
 Mahler expansion 149  
 Mahler's base 149, 158  
 maximally complete 54  
 maximum principle, complex 121  
 maximum principle, ultrametric 122  
 meagre 269  
 measure,  $\sigma$ -additive 275
- measure,  $K$ -valued 276  
 monotone function 263  
 monotone function, of type  $\alpha$  66  
 monotone function, of type  $\sigma$  259  
 monotone sequence 265  
 multiplicative norm 282  
 $n$ -adic integer 4  
 $n$ -adic valuation 9  
 negligible function 280  
 negligible set 280  
 Newton approximation 78  
 non-archimedean valuation 18  
 norm 30  
 normed  $K$ -algebra 34  
 normed  $K$ -vector space 30  
 nowhere dense 269  
 null sequence 33  
 null set 204, 221
- 'open' ball 25, 47  
 'open' disc 25  
 opposite sign 258  
 order, of a Lipschitz condition 74  
 order, of a locally analytic function 69  
 order, of a  $p$ -adic integer 8  
 order, of a  $p$ -adic number 11  
 orthogonal 146, 147  
 orthonormal 146, 147  
 Ostrowski's theorem 22
- $p$ -adic Dini theorem 267  
 $p$ -adic elementary school 7  
 $p$ -adic entire part 189  
 $p$ -adic Euler constant 110  
 $p$ -adic expansion 13  
 $p$ -adic exponent 100 ff  
 $p$ -adic gamma function 109  
 $p$ -adic integer 7  
 $p$ -adic interpolation 98  
 $p$ -adic Liouville number 201  
 $p$ -adic Lusin theorem 221  
 $p$ -adic monotone function 263  
 $p$ -adic monotone sequence 265  
 $p$ -adic number 10  
 $p$ -adic valuation 8, 11  
 $p$ -adic zeta function 186  
 Peano curve 225, 227, 229  
 pointwise convergence 58  
 positive element of  $K$  66  
 power series 59  
 product formula for valuations 24  
 property  $B_3$  253  
 property  $B_n$  255  
 property  $(N)$  221  
 pseudocontraction 233  
 van der Put's base 190, 205
