problems, 128–30
functions in community, 113
Social, Economic, and Health
Consequences Subsystem, 24–5
consumption level, 124–7
DPO, 124–7
economic consequences of problems,
130–1
interactions
Consumption Subsystem, 51
Legal Sanctions Subsystem, 112
other subsystems, 131, 132, 135
Social Norms Subsystem, 94
social environment
dryness, 48
individual in, 5
wetness, 48
social interaction theory, 5
social living settings, 129
social network, drinking pattern, 75
social norms, 30, 41–2, 44–5
consumption, 76–7
Social Norms Subsystem, 23–5, 74–5
alcohol-involved problems, 77–9
community concern about alcohol use,
84–8
drinking norms, 77–84
interactions
Consumption Subsystem, 30, 51
Formal Regulation and Control
Subsystem, 64, 71, 73
Legal Sanctions Subsystem, 111–12
other subsystems, 94–6
Social, Economic, and Health
Consequences Subsystem, 115, 131,
132, 133
salience, 90–1
social acceptability of drinking, 88–90
subgroup drinking norms, 91–4
social processes, 37
social services, 114, 129, 130
social structure
frustrations/tensions, 77–8
heavy drinking influence, 77
social-host liability, 66
socially acceptable consumption, 80–1
societal values, formal regulations, 64
sociocultural content of consumption,
40–1
special-purpose outlets, 56
spouse abuse, 113, 123
state monopoly, 69
statistical techniques
longitudinal, 19
multivariate, 19
substance abuse, 18–19
time-series, 19
stimulus factor response, 45–7
elasticity, 45
stochastic events, 12
stress hypothesis, 77–8
stressful life events, incidence, 78–9
strike of retail sales workers, 62
substance abuse, statistical techniques,
18–19
subsystem interactions, 25–6
suicide, 123
supply curve, 57, 58
swimming, 4
system-level changes, 14
systems dynamics, 17
taxes, local/regional on alcohol, 55
television, portrayal of drinking, 89
throat cancer, 128
tourism, retail sales, 60
traffic crashes, 11, 113
age groups, 36
alcohol-involved, 126
non-zero BAC, 136
BAC, 50–1, 126–7, 136
drinking and driving, 99
intermediate variables and interventions,
135–6, 137, 138
minimum drinking age, 44
risk of arrest, 105
risk-lowering measures, 138
traffic fatalities/injuries, 122
trauma
alcohol-involved, 11
risk and BAC distribution, 124–5
trauma care, demand, 26
underage drinking, 24
community concerns, 26
consumption, 43
deterrence, 67
Index

valid interference, rules of, 6
values, community, 23
variables, dependent/independent, 6
vehicle miles traveled, 150
victimization, 114
risk, 31
violence
alcohol-related events, 2, 115
drinking location, 31
family, 114, 130
intentional, 115
non-family, 123
risk, 113
violent crime, 98
Weber–Fechner law of proportionate effects, 41
workplace
accidents, 24
alcohol-involved problems, 123–4
disruption, 115
services, 129–30
young people, 1–2
youth crime, 12–13
youth drinking, concern, 94, 95
