

## *Contents*

<i>Preface</i>	<i>page ix</i>
<b>PART I WORLD BAYESIANISM</b>	
<b>1 Utility theory and the Bayesian paradigm</b>	<b>3</b>
0. Introduction	3
1. Utility theory	4
2. The problem	5
3. A reaction: Insist on complete basic alternatives	9
4. Utility theory within a more general theory	13
5. Summing up	26
<b>PART II PROBLEMS FOR EVIDENTIAL DECISION THEORY</b>	
<b>2 Newcomblike problems</b>	<b>31</b>
0. Introduction	31
<i>A. Analysis and variety</i>	32
1. An analysis of Newcomblike problems	32
2. The variety of Newcomblike problems	33
<i>B. Objections</i>	36
1. These are problems for space cadets	36
2. Deliberators cannot view their choices as signs of prior conditions	38
3. Agents who believe in causes for their actions	41
4. Agents who believe in causes for their choices	45
5. Newcomblike problems are not possible for ideally rational agents	48
6. Conclusions	58
Appendix I: Statements of some Newcomblike problems	60
Appendix II: Further structure for “Brian Skyrms’s Uncle Albert” and “How do you spell relief?”	63
Appendix III: Dominance problems	65
Appendix IV: Further structures for Newcomb’s Problem	66
Appendix V: Ratificationism	68

<b>3</b>	<b>Not every prisoners' dilemma is a Newcomb problem</b>	77
0.	Introduction	77
1.	Near-certainty Newcomb problems	78
2.	Near-certainty prisoners' dilemmas	80
3.	Near-certainty Newcomb problems and prisoners' dilemmas compared	80
4.	Conclusions	86
<b>4</b>	<b>Some versions of Newcomb's Problem are prisoners' dilemmas</b>	89
0.	Introduction	89
1.	Preliminaries	90
2.	Some, but not all, versions of Newcomb's Problem are prisoners' dilemmas	92
3.	Further questions	94
4.	Concluding remarks	96
<b>5</b>	<b>Infallible predictors</b>	100
0.	Introduction	100
1.	Predictors who are certainly incapable of error	101
2.	Predictors who are certainly unerring	105
3.	Conclusions	111
<b>6</b>	<b>Kent Bach on good arguments</b>	119
<b>7</b>	<b>Maximizing and prospering</b>	126
0.	Introduction	126
1.	Gauthier's pragmatism	127
2.	Implications for Newcomb problems	128
3.	Possibly disturbing aspects of these implications	130
4.	Judgmental conclusions	132
	Appendix: Socializing sentiments	136
PART III CAUSAL DECISION THEORY		
<b>8</b>	<b>Notes on decision theory: Old wine in new bottles</b>	141
0.	Introduction: Bayesian decision theory	141
1.	Jeffrey's logic of decision	143
2.	The popcorn problem	145
3.	A causal decision theory	152
4.	Conclusions	164
	Appendix: Demonstrations of partition theorems	165
<b>9</b>	<b>Partition theorems for causal decision theories</b>	174
0.	Introduction	174
1.	A causal decision theory	175

Cambridge University Press

Jordan Howard Sobel

Table of Contents

[More information](#)

2. Causal decision theories need partition theorems	178
3. Two partition theorems	181
4. Fishburn and conditional acts	185
5. Armendt on conditional preferences	187
6. <i>Partitions for U</i> and <i>Exclusive Partitions</i> compared	191
7. Uses of partition theorems	192
Appendix: A theorem for sufficiently fine partitions	195
<b>10 Expected utilities and rational actions and choices</b>	197
0. Introduction	197
1. Definitions, assumptions, and restrictions	198
2. The ideal stability of rational decisions	200
3. Principles that apply tests of expected utility to actions	202
4. A principle that confines tests of expected utility to choices	212
5. A principle for agents who are sure they can make mixed choices	215
6. Conclusion	215
<b>11 Maximization, stability of decision, and actions in accordance with reason</b>	218
0. Introduction	218
1. Positions	218
2. Arguments and perspectives	227
3. The maximization and stability theory: Restatement and elaboration	233
<b>12 Useful intentions</b>	237
0. Introduction	237
1. Senses in which the rational cannot intend irrational actions	238
2. Forming and adopting intentions	240
3. Magical bootstrapping, and rational intentions and preferences	243
4. Rational adoption of intentions to do things that would otherwise be irrational	246
5. Conclusion	251
6. Postscript	252
<b>PART IV INTERACTING CAUSAL MAXIMIZERS</b>	
<b>13 The need for coercion</b>	257
0. Introduction	257
1. The hyperrational community	258

Cambridge University Press

978-0-521-03898-0 - Taking Chances: Essays on Rational Choice

Jordan Howard Sobel

Table of Contents

[More information](#)

2. The community's need for coercion	262
3. The individual's need for coercion	270
Appendix: The Farmer's Dilemma and mutual trust	276
<b>14 Hyperrational games</b>	<b>283</b>
0. Introduction	283
1. The concept of a hyperrational normal-form game	283
2. Resolutions of hyperrational games	294
<i>Necessary conditions for, or limitations on, resolutions</i>	294
<i>Sufficient conditions for, and ways to, resolutions</i>	303
3. Problems for members of hyperrational communities	313
<i>Games in which they would not do well</i>	313
<i>Games in which they could not do anything at all</i>	315
<i>The significance of these problems</i>	324
Appendix: Lewis domination	325
<b>15 Utility maximizers in iterated prisoners' dilemmas</b>	<b>330</b>
0. Introduction	330
1. The defeat of utility maximizers in iterated prisoners' dilemmas	331
2. The significance of this defeat	338
<b>16 Backward induction arguments: A paradox regained</b>	<b>345</b>
0. Introduction	345
1. Indicative rationality and belief premises	346
2. A backward argument for defection	348
3. Subjunctive rationality and belief premises	351
4. Interlude: Defense of common-knowledge premises	358
5. The paradox and its solution	363
