FOREWORD

This is a remarkable piece of work, a quantum step forward in the political science research of American scholars of South Asia. It combines the best of many strands only now beginning to emerge: a fluent command of a local language, a detailed substantive knowledge of a local situation, the insistence on a set of controlled comparisons beyond the single phenomenon or single time–single place style of analysis, the careful collection of fresh primary data from controlled interviewing and local records, the difficult translation of such data into measurable variables, strengthening the reference point to disciplinary theory, the framing of testable hypotheses, the application of the most sophisticated statistical techniques available to test the hypotheses and the interpretations of the results in tangible, substantive conclusions. This is the mix that promises to enrich our understanding of phenomena in South Asia and to link this understanding to the mainstream of disciplinary advance. Dr Carras has carried them all out well and I can report every one of the skills was acquired from scratch for the project through a mixture of personal perseverance and good taste that is truly remarkable.

The conclusion is a bit too clearcut for my own bias in favor of the impenetrable complexity of human behavior. The fact that this study finds that the prime mover of factional formation lies in the economic sphere makes me even more wary, perhaps because several generations of doctrinaire theoreticians bereft of data have insisted it must be so. Nonetheless, her basic finding is an interesting one that the fundamental political cleavage in India – or in Maharashtra, at any rate – is traceable to competing forms of economic organization represented by private enterprise groups on the one hand, and collective or cooperative economic interests on the other, and that this dichotomy is reflected, in turn, in competing policy orientations within and between party and government. Recent regional and national events could well have been predicted by focussing on this division.

But in all, this is a most worthwhile venture and I commend it to your careful reading.

TABLES

Chapter 2

1	Average Size of Landholding Owned by Respondents on a District-Wise and All-District Basis	<i>page 42</i>
2	Landholding Pattern Comparing Large with Small Landholdings	42
3	Revised Budget Estimates, 1965–6, of Expenditure for Schemes in the State Five-Year Plan and Similar Revised Estimates for the Same Year, on Schemes Transferred to Zilla Parishads and Panchayat Samitis	44
4	Ranking of the Constitutional Right to Private Property According to Respondents' Perceived Order of Importance	45

Chapter 3

A	Strength, Predictive Scope, Predictability and Stability of Variable Clusters on a District-wise and All-District Basis	53
---	---	----

Chapter 4

1.1–5	Discriminant Analysis Findings: Coefficients for Canonical Variable Ranked in Order of Importance	71
2	Discriminant Analysis Findings: Canonical Correlation – Ranked in Order of Importance	78
3	Discriminant Analysis Findings: Accuracy of Prediction of Factional Alignment (% of Correct Classifications)	78

Chapter 5

1	Frequencies Indicating Respondents' Views Regarding District's Leader	83
2	Average Loan Per Acre (Net) Sown, Distributed Taluka-wise by Agricultural Primary (Village) Credit Cooperative Societies	89
3	Average Loan Per Member Distributed Taluka-wise by Agricultural Primary (Village) Credit Cooperative Societies	90
4.1–5	Discriminant Analysis Findings: Coefficient for Canonical Variable Ranked in Order of Importance (for each variable cluster)	94
5	Discriminant Analysis Findings: Canonical Correlation – Ranked in Order of Importance	103
6	Discriminant Analysis Findings: Accuracy of Prediction of Factional Alignment Achieved by Each Variable Cluster (% of Correct Classifications)	103

Chapter 6

1	Crop Pattern Indicating Incidence of Cash Crop Cultivation on a Taluka-wise Basis in the District of Aurangabad	page 106
2	Frequencies Indicating Past Membership by Congressmen in Parties Other Than the Indian National Congress	112
3	Cross-Classification of Predisposition to Resign from Congress Party by Attitude to non-Congress Movement (Samyukta Maharashtra Samiti or Others)	113
4	Cross-Classification of Predisposition to Resign from Congress Party by Other-Party Sympathizer	114
5	Cross-Classification of Predisposition to Resign from Congress Party by Other-Party Membership	115
6	Cross-Classification of Factional Alignment by Attitude to non-Congress Movement (Samyukta Maharashtra)	116
7.1-5	Discriminant Analysis Findings: Coefficients for Canonical Variable Ranked in Order of Importance	119
8	Average (Mean) Value of Shares (in Rupees) in Cooperative Institutions Owned by Factions	125
9	Discriminant Analysis Findings: Canonical Correlation – Ranked in Order of Importance	126
10	Cross-Classification of Factional Alignment by Exposure to News Media	126
11	Discriminant Analysis Findings: Accuracy of Prediction of Factional Alignment (% of Correct Classifications)	127

Chapter 7

1	Frequencies Indicating Level of Political Ambition Displayed by Respondents in Each District	143
2	Cross-Classification of Factional Alignment by Number of Offices Held in Congress Party	145
3	Cross-Classification of Factional Alignment by Period of Enrolment in Congress Party	146
4	Cross-Classification of Factional Alignment by Age	147
5	Cross-Classification of Involvement in All Spheres by Involvement in Party Organization	148
6	Cross-Classification of Involvement in All Spheres by Involvement in Cooperative Organization	150
7	Cross-Classification of Involvement in All Spheres by Involvement in Local Government	151
8.1-5	Discriminant Analysis Findings: Coefficients for Canonical Variable Ranked in Order of Importance	152
9	Discriminant Analysis Findings: Canonical Correlations – Ranked in Order of Importance	156
10	Indices of Multiplicity of Castes in the Akola Zilla Parishad and in the District of Akola	158
11	Frequencies Indicating Whether Congressmen Interviewed in 1965 had Contested in 1962 Z.P. Elections as Independents or on the Congress Ticket	159

ACKNOWLEDGMENTS

I am thankful for the opportunity to acknowledge even a small part of the debt of gratitude I owe to many people who have contributed to this work in some way – either directly or indirectly.

A principal debt is owed to all those who graciously allowed me to interview them, for without their cooperation this work would not have been possible. Their hospitality added joy to my work. I am equally grateful to those administrative officials of the Government of Maharashtra who greatly facilitated my research, in countless ways. In particular, Mr R. G. Salvi, Secretary, and Mr V. Prabhakar, Deputy Secretary, respectively, of the Rural Development Department, were most cooperative and courteous, as were the administrative officers in each of the districts I visited. Mr V. V. Satav, an elected official of the Poona District Council, and Mr C. S. Natu, Secretary of the Poona City Congress Party, were especially helpful to me during the early phases of my work, giving me freely of their time, knowledge and hospitality. I must, however, reserve a special word of acknowledgment for my friend and colleague, Mr R. P. Nene, who gently, sensitively and intelligently guided me through the barriers of an unknown culture. His assistance and advice in so many aspects of the field surveys proved invaluable.

I also wish to thank all those who contributed in some way toward the final written product. Richard D. Lambert provided guidance throughout the preparation and execution of the study, and I am very grateful to him for his advice, for his suggestions regarding the manuscript, and for his many kindnesses to me. I am also indebted to Norman D. Palmer, not only for reading and commenting on the manuscript but also for his good will toward me. Henry Teune, Paul E. Green and Mark Levine provided much-needed help in the area of statistics and computer analysis, and for this I am very much in their debt.

I have reserved my warmest words of acknowledgment for W. Norman Brown whose generous spirit, kindness and confidence in me these past years have been a source of continual encouragement and comfort to me.

Acknowledgments

Finally, I wish to acknowledge the support of the following institutions: the United States Department of Education for fellowships which helped to sustain me throughout the period of graduate study, including my field work in India; the University of Pennsylvania for a Dissertation Fellowship and for a grant through their Computer Center which allowed me the use of its facilities; and the American Institute of Indian Studies for a travel grant within India and for all other manner of assistance rendered to me.

Only that which is of value in this work may be claimed by my teachers. The responsibility for errors and other inadequacies is mine alone.

There are a few good and loving friends whose names are meaningful only to me and to them. They must know in their hearts how each, in his or her own way, has helped me. Before each of them, I bow my head in love and humility.

Above all else, I am and always will be grateful to all members of my family whose great and abiding love was a source of strength that helped to sustain me during the less joyful hours of my work.

The author and publisher also wish to thank the following for permission to include material previously published elsewhere:

The editor of the *Economic and Political Weekly*, Bombay, for part of Chapter 2, which appeared as an article entitled 'Congress Factionalism at the State and District Level in Maharashtra: Some Theories' in *Economic and Political Weekly*, Vol. VI, Nos. 3, 4 and 5, Annual Number, January 1971.

The University of Chicago Press for part of Chapter 5, which appeared, as an article entitled 'The Economic Determinants of Political Factionalism: A Case Study of an Indian Rural District' in *Economic Development and Cultural Change*, Vol. 21, No. 1, October 1972.

The University of California Press for part of Chapter 7 ('Factionalism in Maharashtra: A Case Study of the Akola Zilla Parishad', © 1970 by The Regents of the University of California. Reprinted from *Asian Survey*, Vol. X, No. 5, May 1970, pp. 410-26, by permission of the Regents).
