Preface

I.L. Ryhming

Invited Lecture: Developments in Computational Modelling of Turbulent Flows	1
<i>J.C.R. Hunt</i>	
Test Case T1: S-shaped Duct	77
Test Case T1: Boundary Layer in a "S"-shaped Channel	78
<i>T.V. Truong and M. Brunet</i>	
Case T1: a Boundary-Layer Computation	116
<i>M. Bettelini and T.K. Fanneløp</i>	
Calculation of Test Case T1 at Onera/Cert/Derat	122
<i>C. Gleyzes, R. Houdeville, C. Mazin, and J. Cousteix</i>	
"S"-Channel Calculations	128
<i>P-Å Krogstad and P.E. Skårre</i>	
An Anisotropic Eddy Viscosity Model, Using the k- ϵ Model or an Extended Johnson & King Model for Solving the Boundary Layer Equations	133
<i>P-Å Lindberg</i>	
Calculation Results of the NLR BOLA Method for the Ercoftac Test Case T1: 3D Turbulent Boundary Layer in an S-shaped Duct	139
<i>J.P.F. Lindhout and B. van den Berg</i>	
An Algebraic Model Based on the Velocity-Profile Skewing	146
<i>A. Nakkasyan, T.S. Prahlaad, and P. Gilquin</i>	
Calculation of Three-Dimensional Turbulent Boundary Flow in an S-shaped Channel	152
<i>W. Rodi and J. Zhu</i>	
A Pseudo-3D Extension to the Johnson & King Model and its Application to the EuroExpt S-Duct Geometry	158
<i>A. M. Savill, T.B. Gatski, and P-Å Lindberg</i>	
Computation of the 3D Turbulent Boundary Layer in an S-shaped Channel	166
<i>J. Wu, U.R. Müller and E. Krause</i>	
A New Statistical Approach to Predict Turbulence	172
<i>A. Nakkasyan</i>	
Problem T1: Predictions of the Boundary Layer Flow in an S-shaped Duct	178
<i>D.S. Clarke</i>	
A 3D Compressible Navier-Stokes Code for a Boundary Layer in a S-shaped Channel Calculation	185
<i>D. Dutoya and P. Poncelin de Raucourt</i>	
Problem T1: Boundary Layer in a "S"-shaped Channel	192
<i>M. Gabillard, G. Marty and P.L. Viollet</i>	
Summary and Conclusions for Test-Case T1	197
<i>I.L. Ryhming, T.V. Truong and P-Å Lindberg</i>

978-0-521-06345-6 - Numerical Simulation of Unsteady Flows and Transition to Turbulence

Edited by O. Pironneau, W. Rodi, I. L. Ryhming, A. M. Savill and T. V. Truong

Table of Contents

[More information](#)

Test Case T2: Array of Cylinders	245
Parallel Spectral Element Solutions of Eddy-Promoter Channel Flow <i>P.F. Fisher and A.T. Patera</i>	246
2D and 3D Simulations of the Periodic Flow around a Cylinder between 2 Walls <i>M. Buffat</i>	257
N3S (Release 2.1) 2D-Computations, Test T2 <i>L. Janvier, J.P. Chabard and T. Bidot</i>	264
Ulysse (Release 4.0) 2D-Computations, Test T2 <i>D. Laurence, T. Goutorbe and S. Sebag</i>	271
Numerical Simulation of a Periodic Array of Cylinders between Two Parallel Walls <i>J. Liou and T.E. Tezduyar</i>	277
ERCOFTAC Workshop Lausanne March 1990 Numerical Simulation of Unsteady Flows, Test Case: T2 <i>M. Ravachol</i>	284
Calculation of Laminar Flow around a Circular Cylinder between Two Flat Plates <i>W. Rodi and J. Zhu</i>	291
Summary and Conclusions for Test Case T2 <i>O. Pironneau</i>	294
Invited Lecture: Transition Description and Prediction	303
<i>D. Arnal</i>	
Test Case T3A, T3B: Free Stream Turbulence	317
Introduction <i>A.M. Savill</i>	318
The Influence of a Turbulent Free-Stream on Zero Pressure Gradient Transitional Boundary Layer Development including the Conditions Test Cases T3A and T3B <i>P.E. Roach and D.H. Brierley</i>	319
A Correlation Analysis Approach to the T3 Test Case <i>P.E. Roach</i>	348
Calculations for the T3 Transition Test Cases <i>N.T. Birch, Y.K. Ho and P. Stow</i>	355
Prediction of the Effect of Free Stream Turbulence on a Laminar Boundary Layer and Transition <i>J. Bernard, J.M. Fougères and J.L. Manderlier</i>	361
Test Case T3 - Free Stream Turbulence <i>G. Theodoridis, P. Prinos and A. Goulas</i>	368
A New Version of the k- ϵ Model of Turbulence Applied to Boundary Layer Transition <i>F. Tarada</i>	374
Calculation of Transitional Boundary Layers under the Influence of Free-Stream Turbulence <i>W. Rodi, N. Fujisawa and B. Schöning</i>	381
Application of a Low-Reynolds Number Reynolds Stress Transport Model to the Prediction of Transition under the Influence of Free-Stream Turbulence <i>A.M. Savill</i>	387

978-0-521-06345-6 - Numerical Simulation of Unsteady Flows and Transition to Turbulence
Edited by O. Pironneau, W. Rodi, I. L. Ryhming, A. M. Savill and T. V. Truong

Table of Contents

[More information](#)

Contribution to the ERCOFTAC Workshop at EPFL, March 26-28, 1990 Flat Plate Transition Test Case T3 <i>H.E. Mårtensson, L.-E. Eriksson and P.J. Albråten</i>	395
Numerical Simulation of Boundary Layer Transition in the Presence of Free Stream Turbulence <i>Z.Y. Yang and P.R. Voke</i>	398
Synthesis of T3 Test Case Predictions <i>A. M. Savill</i>	404
Invited Lecture: On Recent Numerical Simulations of Compressible Navier-Stokes Flows <i>J. Périaux (M.O. Bristeau, R. Glowinski, L. Dutto, J. Périaux and G. Rogé)</i>	443
Test Cases T4; T5: Confined Axisymmetric Jet	473
Introduction of Test Case T4 <i>W. Rodi and J. Zhu</i>	474
Problem T4: Predictions of an Axisymmetric Jet Flow in a Diverging Duct <i>D.S. Clarke</i>	479
Problem T5: Predictions of the Turbulent Flow in an Axisymmetric Geometric Configuration <i>D.S. Clarke</i>	484
Test Case T4: Confined Axisymmetric Jets <i>P. Di Martino</i>	488
Modelling ERCOFTAC Test Case T4 <i>J. R. Noyce</i>	495
Calculation of a Coaxial Jet in a Diffuser <i>W. Rodi and J. Zhu</i>	501
Summary of Predictions for a Coaxial Jet in a Diffuser (Test Case T4) <i>W. Rodi and J. Zhu</i>	505
