

Index

In this index, no references are given to items in the bibliography.

- absolute neighbourhood retract (ANR) 281
- Adams, J.F. (1930–1989) 88
- acyclic fibration 178
- acyclic models 286
- addition law (L3) 263
- adjoint (of a simplicial map) 157
- adjoint functor generating principle 303
- adjunction of n -cells 12
- adjunction space 258
- admissible pair (of maps) 292
- affine embedding 91
- affinely independent 89
- Alder, M.D. 127
- Alexander, J.W. (1888–1971) 131
- Alexandroff, P.S. (1896–1983) 131
- Allaud, G. 272
- anodyne extension 172
- approximation 68
- associated simplicial set (to an ordered simplicial complex) 152
- attaching map 12, 259
- attaching (simplicial) 144
- attaching space 258
- axiom of choice 31
- axiom of countable choice 31
- axiom of multiple choice 31
- ball 1
- Barratt, M. 131, 222
- barycentre 92
- barycentric coordinates 90
- barycentric refinement of a covering 248
- barycentric subdivision 111
- base (of a euclidean cone) 92
- base (of a Kan fibration) 171
- base space (of a fibration) 255
- based homotopy 286
- based map 286
- Borges, C.R. 33, 304, 305
- Borovikov, V. 131
- Borsuk, K. (1905–1982) 282, 283
- boundary (of standard p -simplex) 142
- bouquet of spheres 18
- Bourbaki, N. 252, 303
- Brouwer, L.E.J. (1881–1966)
 - Brouwer theorem 300, 302
 - Brown, R. 54, 88, 242, 251, 252, 259, 266, 271, 279, 298, 299
 - canonical CW-structure of a ball 24
 - canonical simplicial map 200
 - Cantor, G. (1845–1918)
 - Cantor set (middle third set) 224, 252
 - convenient 242
 - carrier 23, 90, 98, 112
 - Cartesian product 241
 - category of finite ordinals 132
 - category of n -ads with type of CW- n -ads TCW^n 230
 - category of presimplicial sets $PSiSets$ 165
 - category of simplices functor 141
 - category of simplicial sets $SiSets$ 139
 - category of small categories 141
 - category of spaces with type of CW-complexes TCW 223
 - category of topological spaces Top 241
 - category of weak Hausdorff k -spaces $wHk(Top)$ 243
 - Cauty, R. 33
 - Ceder, J.G. 250
 - cell (closed, open, regular) 11
 - cell complex 51
 - cell path-connected 41
 - cell subcomplex 51
 - cellular approximation theorem 73
 - cellular map 56
 - cellular map of (relative) CW-complexes 56
 - cellular partial map 62
 - chain complex functor 284
 - characteristic map 12, 259
 - classifying set 192
 - closed cofibration 251
 - closed n -cell 11
 - closed regular n -cell 11
 - closure finite 40, 52
 - cogluing theorem 270
 - collar 20
 - collaring 19
 - Columbus, C. (1451–1506) 2

- compact-open topology 241
- compactly closed 242
- compatible sequence of maps 273
- complementary face 89
- complete weak homotopy equivalence 231
- composable (pair) 139
- cone 269
- cone (Euclidean) 92
- cone (of a presimplicial set) 167
- cone functor (of presimplicial sets) 167
- connected simplicial set 194
- convex covering 118
- convexly independent subfamily 95
- coproducts of CW-complexes 57
- coreflective subcategory 152
- Curtis, E.B. 220
- cosimplicial map 146
- cosimplicial object (in a category) 138
- cosimplicial set 146
- countable CW-complex 40
- countable family 248
- countable simplicial complex 121
- covering dimension 299
- covering projection 256
- covering space 256
- covering transformation 291
- covering 248
- cross-section 270
- cube 96
- CW-complex 22
- CW-complex of finite dimension 46
- CW-complex of finite type 40
- CW- n -ad 230
- CW-structure 22
- degeneracy operator 135
- degenerate simplex 144
- degree 90
- determined (by a family of subspaces) 246
- diameter (of a geometric simplex) 91
- tom Dieck, T. 221, 271, 280, 287
- dimension (of a Euclidean complex) 100
- dimension (of a minimal pair) 149
- dimension (of an operator) 132
- dimension (of a simplex) 139
- dimension (of a simplicial set) 146
- dimension (of a CW-complex) 46
- dimension and embedding 46
- directly equivalent pairs 149
- Dold, A. 131, 272
